AN

Analysis and Compendium of all the Returns made to Parliament,

SINCE THE COMMENCEMENT OF THE 19th CENTURY,

RELATING TO THE

INCREASE OF POPULATION,

AND THE

Amount and Appropriation of the Parochial Assessments, Tithes, &c.,

Arranged as follows, viz.:

I. A District arrangement of 6000 of the principal Towns and Parishes of ENGLAND and WALES; classed in reference to the preponderance of their productions, and the occupation of their Inhabitants, numbered in consecutive order; showing the locality and relation of each place, the number of Inhabited Houses in each in 1801, and 1821; the number of FAMILIES in 1821, distinguishing the proportion returned as being employed in AGRICULTURE, distinct from those returned as being chiefly employed in TRADE, MANUFACTURES, or HANDICRAFT; and all others not included under either of the two preceding heads: the Annual Value of Real Property as assessed to the PROPERTY-TAX, in 1815; the amount annually expended for the MAINTENANCE of the POOR, on an average of three Years, at each of two periods, ending the 25th of March, 1815, and the 25th of March, 1824; the number of Persons relieved out of the PAROCHIAL RATES, distinguishing the proportion in WORKHOUSE, and of those out of Workhouse; the proportion relieved occasionally, from those relieved permanently; the number of Persons in FRIENDLY SOCIETIES, and the amount of CHARITABLE BEQUESTS at the disposal of the Parochial Officers, in each of the 6000 Parishes and towns enumerated. This arrangement was adopted, to enable the conclusions to be arrived at, of the proportion of the Population engaged in, or dependant upon, each great branch of PRODUCTION or OCCUPATION, for subsistence, as exhibited in the annexed Summary on the following page, the places not enumerated in this arrangement being

Small Parishes, Townships, Hamlets, or Tithings exclusively Agricultural, as exhibited in line 25 of that page.

II. A Statistical Display, in which the AREA, or SUPERFICIES in Statute Acres, as deduced from the Trigonometrical Surveys made by order of the Board of Ordnance, is exhibited in juxta-position with the Annual Value of Real Property as assessed to the Property Tax in 1815; the amount expended for the maintenance of the Poor, in the Year ending the 25th of March, 1829; and the total number of Persons, as returned to Parliament, at each of the four periods of 1801, 1811, 1821, and 1831, in every County, Hundred, Division, City, Town, Parish, Chapelry, Hamlet, Tithing, Liberty, and Extra Parochial Place in ENGLAND, and separately (without the Area) in WALES, each respectively arranged Alphabetically. In this arrangement, all the new Sub or Electoral, and Sessional Divisions of the Counties under the act of 2nd of Wm. IV. cap. 45. [1831] are exhibited, and the

Rectories, Vicarages, Parochial Chapelries, and Curacies,

are distinguished by their respective initials. The CITIES are printed in Old Roman, the MARKET TOWNS (those being distinguished that make weekly returns of the average price of Corn) are printed in SMALL CAPITALS; Sea Ports having Custom Houses; the Towns and Places with resident Deputy Postmasters; those at which Fairs are held, and those at which Sittings are held for collecting of Excise Duties; the recently disfranchised, as well as the newly enfranchised, and Old Boroughs; Polling Places for County Members, &c., &c., are all distinguished by characteristic notations. (Vide pages 91 and 197.)

III. A Synoptical view of SCOTLAND, in which the number of HOUSES, FAMILIES, and PERSONS, and the proportion of the Population engaged in Agriculture, and in Trade, Manufactures, &c., in every County, District, and Parish, are perspicuously displayed in a Geographical arrangement, in which the 970 Parishes, &c., are numbered in consecutive order, from 1 to 970, accompanied by an Alphabetical display in which every County, District, and Parish is referred by its number to its place in the Geographical or District arrangement, and in which the Annual Value of Real Property, the Population in 1755, and 1793-8, and as returned to Parliament at each of the Ten Yearly Periods of 1801, 1811, 1821, and 1831, in every County, District, and Parish, are exhibited. The Cities and Royal Burghs, are all distinguished by being printed in Old Roman, the 14 Electoral Districts are interestingly exhibited, and the Sea Ports, Post and Fair Towns, &c., distinguished as in England and Wales by characteristic notations. See page 231.

ACCOMPANIED BY

A Classified Statistical Display,

SHOWING

THE PROPORTION OF THE MALE POPULATION OF GREAT BRITAIN EMPLOYED OR ENGAGED IN EACH OF 600 VARIOUS OCCUPATIONS OF PRODUCTION OR SERVICE, IN EACH COUNTY OF GREAT BRITAIN, IN 1831;

AND A VARIETY OF OTHER ACCOUNTS ILLUSTRATIVE OF THE NATURAL INFLUENCE OF EACH COUNTY, AS INDICATED BY THE NUMBER OF BIRTHS AND DEATHS IN EACH YEAR, THROUGH A PERIOD OF MORE THAN HALF A CENTURY, AND THE RESOURCES AND CONDITION OF EACH, AS EXEMPLIFIED IN ITS

Production, Rental, Taxation, Pauperism, and Crime.

15,609 places in ENGLAND and WALES, made separate returns of Population in 1831, but as in the Alphabetical arrangements herewith, all the places with compound or subjoined names, as well as Joint Townships, being specified under both names; and all the Hundreds or other subdivisions of Counties being also included, it extends the number to upwards of 20,000, exclusive of Scotland; each place enumerated in the district arrangement, being referred to by its number, and the small Agricultural Parishes, &c., not included, being referred to their nearest place in the district arrangement, it enables the

LOCALITY, RELATION, RESOURCE, CIRCUMSTANCE, AND CONDITION OF EVERY PARISH, TOWN, &c., IN

GREAT BRITAIN,

As well in regard to the Amount and Inequality of the

Ecclesiastical Assessments, or Tithes,

AS OF

PAROCHIAL OR LOCAL ASSESSMENTS IN GENERAL, &c.,

ROYAL COLLEGE OF SURGEONS OF ENGLAND

to be determined with a facility and precision, and an approximation to accuracy, never before arrived at, and which renders them the most interesting and important development of the resource and relation of this or any other community, ever yet portrayed. To Professional Men, whose attention is frequently directed to the Value of Property in different parts of the Kingdom, and to the Man of business desirous of extending his operations, they will serve as a constant and unerring guide; while the results deduced from the facts in detail, contained in a series of Summaries or Abstracts, commencing at page 239, disclose the most egregious fallacies that prevail in regard to the assumed and generally supposed preponderance of the Manufacturing Population, and the assumed importance of the Manufacturing over the Agricultural Interest; and the equally fatal and hollow delusions that so extensively prevail respecting the effect of the CORN LAWS, FREE TRADE, the CURRENCY, NATIONAL DEBT, &c., all these great and important subjects, as far as they depend on Number, Quantity, Amount, and Proportion (and they depend exclusively thereon for a right understanding respecting them, and the means of giving them a right direction), being placed in such simple, clear, and perspicuous points of view, as to enable all who are desirous of arriving at just conclusions, so to do; and to leave the Statesman and Legislator without an excuse for any longer subjecting this unparalleled combination of interests to the speculative expediency, to which they have so long and so fatally been exposed.

INTRODUCTION.

1. The following district arrangement of about 5,000 of the principal Towns, and most populous Parishes of England and Wales, is part of an arithmetical inquiry and investigation, which I sometime since imposed upon myself, into the extent and number, resource and condition, of the Population, in the different Counties, Districts, and Divisions of the United Kingdom; of the nature of their relation to each other, as well as to the nature and extent of their relation to the several distant parts of the Empire, and to the several Empires and States, of the social world, separately and collectively.

2. The more immediate incentive however, to this part of my inquiry, resulted from a desire to arrive, with as near an approximation to accuracy, as the highly involved state of British Society admitted of, at the proportion of the Population engaged in, or dependant upon, each great branch of production, or occupation, for subsistence, and thereby, in the hope of correction, expose the mistake which had so long prevailed, in regard to the assumed preponderence of numbers engaged in Manufacturing, over those employed in Agriculture; a mistake in some measure superinduced by the mode in which the returns of the occupations of the Population were made in 1811, and 1821, and busily availed of by a pedantic and presuming class of would-be-thought Political Economists, the mischievous tendency of whose pedantry and doctrines will be found more fully elucidated in another place.

3. At the commencement of the undertaking it was impossible to foretel exactly to what the inquiry would lead; and when entered into, it became difficult to know where to stop; and after becoming involved in a much greater extent of detail than was originally thought would be necessary for the attainment of my object, in having selected all the Mining, Manufacturing and Maritime Towns, many of the Country Towns seemed so blended, some with Manufactures, and others with Agriculture, as to render it difficult to decide to which class to assign them; which led to the resolve of enumerating every Town and Parish except those which presented themselves as exclusively Agricultural; this being done, with a transposition of every place into alphabetical order, with its number in the District arrangement to facilitate reference, and a comparative view of the Total Population of each place at each of the three Ten Yearly Periods of 1801, 1811, and 1821, the details appeared sufficiently interesting in themselves, abstracted from the more general object of my inquiry, to justify my claiming for them public attention.

4. This however was no sooner done, at a very considerable expense of time, labour, and means, than the official compiler of the Returns for 1831 presented to Parliament for the first time, a Comparative View of the Population, in every Town and Parish of the Kingdom, at each of the four Ten Yearly Periods of 1801, 1811, 1821, and 1831, which rendered my partial alphabetical arrangement valueless, and I consequently abandoned it as such; but as there has since been a more amplified account of the Census of 1831 presented to Parliament, exhibiting in addition to the usual items the Area in Statute Acres, and the Occupations of the Population in every Town and Parish in the kingdom under twelve, instead of under only three heads, as in the three previous Returns of 1801, 1811, and 1821; which details of 1831 confirming in a singular degree of approximation, the conclusions to which I had algebraically been led by my own mode of analysis, induced me a second time to impose upon myself the labour, and incur the expense of offering the results of my investigation to the notice of the public, a conclusion to which I was additionally induced by the opportunity which the Returns of 1831 afforded, for a more interesting development of the relation, resource, and condition of this or of any other country, than has ever before been exhibited.

5. For although the Returns of 1831, as far as they go, are of singular interest, and intitle Mr. Rickman, the assistant clerk of the House of Commons, under whose immediate superintendance they were prepared for publication, to the most unqualified praise for their elaboration of arrangement, they are exceedingly defective in a geographical point of view, and in themselves totally inadequate to aid the Statesman and Legislator in those high and important considerations which the present state and circumstances of the country call upon them profoundly to entertain: much being done, more seemed absolutely called for; and as my District Arrange-

ment determined the locality and relation of every place therein enumerated, the Annual Value of Property, and expense of maintenance of the Poor appeared to be wanted in comparison with the Area; this I have accordingly exhibited, together with the Total Population at each of the four periods of 1801, 1811, 1821, and 1831, in each of the 14,397 Parishes, Townships, Hamlets, &c., in England which made separate returns in the latter year, arranged in alphabetical order, with number of reference to their place in the District Arrangement; whereby, not only is the locality, and relation, but also the circumstance, and condition of each place determined with a facility, and an approximation to accuracy never before arrived at.

6. The Area of the Parishes in Wales not having been obtained, a separate alphabetical arrangement is given, exhibiting the same results as in England with the exception of the Area in each of the 1,212 Parishes, Towns, &c., in that very interesting division of the Kingdom. As Scotland makes no return of maintenance of Poor, another and a distinct order of arrangement has been adopted for that part of the Country; first, in an exhibition of the extent of Superficies, as far as it could be ascertained, and the Total Number of Houses, Families, and Persons in 1801, 1811, and 1821, in each of the 948 Parishes and Places, arranged geographically in regard to their relation to each other, and numbered in consecutive order, followed by an Alphabetical Display of the Annual Value of Real Property, and Total Number of Persons in 1755 and 1798, as well as at each of the four Ten Yearly Periods of 1801, 1811, 1821, and 1831, in each Parish, Town, &c., with number of reference to their place in the geographical arrangement.

7. After the Alphabetical Display of England had been proceeded in as far as Brig., page 104, the prevailing excitement of the time in regard to the Church Establishment led, in addition to the numerous other notations as explained at page 91, to the distinction of R., V., and P. C., for *Rectory*, *Vicarage*, and *Perpetual Curacy*, to all the remaining Parishes and Chapelries of England and Wales; by this addition the Value of the *Benefice* and *Lay Impropriation* of every Parish of England and Wales may be inferred with as near an approximation to accuracy as is necessary for all legislative purposes, and in conjunction with the other details presents a mass of information, and such a development of the involved relations, circumstances, and condition of every part of Great Britain, and such a combination of resource and power, as to have no parallel either in the history of bookmaking, or of human institutions.

8. That some inaccuracies of detail, and some defect of arrangement, may not be pointed out, is what I do not pretend to dispute; but when it is considered that I originally had no intention of publishing the details at all, but merely arranged them to enable me to arrive at certain just conclusions, and that upwards of 20 of the first pages of the District arrangement had been printed without my being able to draw any thing like an accurate conclusion as to what use could be made of them, it will I hope suffice as an ample apology for the want of uniformity which appears in that part of the work. At page 35 I resolved on the endeavour, as expressed in section 3, to make the details interesting in themselves as a Topographical and Statistical Display, abstracted from the more important objects which first led me into the inquiry; and from page 34 a greater uniformity of design will be found to prevail. Still as I proceeded I felt regret at not having taken a better view of the subject from the commencement, and wished I had resolved on exhibiting every Parish, Town, &c., as I have done in regard to the Metropolitan Counties of Middlesex and Surry, and of Kent and Sussex, commencing at page 75.

9. Perfect and more interesting however, as the detailed display of those Counties may appear when compared with the other parts of England and Wales in regard to their Topographical and Statistical development, separately considered, such an arrangement will be seen to have been altogether incompatible with the more important object which originally actuated me to make the Analysis as stated in section 2, nor indeed would any other mode have sufficed for that object but the one which I resorted to unless I had exhibited the whole Kingdom in the same order as I have done the four home Counties, and after that exhibited the Mining, Manufacturing, Maritime, Metropolitan, and Inland Towns in a different form, a course which I afterwards wished had been adopted, but which course circumstances have prevented me from pursuing; and I hope that the more perfect form and interest of the Alphabetical Arrangement of England and Wales, and the complete Geographical Display of Scotland, will be deemed an ample compensation for the defects which I have pointed out in the District arrangement; more especially so when I refer to the Series of Summaries which follow page 238, and a reprint, with some important additions of a series of Statistical details previously published, which I have hereunto annexed, containing together an additional mass of information which in a manifold degree justifies the eulogy I have offered in conclusion of section 7.

10. It will be seen by column 2 of page 244 that the several subdivisions of the Counties of England into Parishes and Townships is exceedingly unequal; Norfolk having an Area of 2,024 square miles being subdivided into 730 Parishes, having 684 Parochial Benefices for a population of 390,000 inhabitants; while Lancashire, with an Area of 1,766 square miles, has only 70 Parochial subdivisions and 282 Episcopal Churches and Chapels for 1,500,000 inhabitants. The Counties of Lincoln, Essex, and Suffolk, exhibit equal disproportions when contrasted with the subdivisions of the four Northern Counties of Westmoreland, Cumberland, Durham, and Northumberland, and also of Chester. These disproportions occasion a complication, and involve considerations in

regard to the Church Establishment which would not exist under a more equal subdivision. The inequality has occasioned the Establishment to become involved in pecuniary considerations beyond those which apply to the ordinary Revenues of Tithes and Benefit of Glebes. Before, however, I proceed to show the nature and extent of that pecuniary involvement, it will be more in place first to show the origin of the distinction, between the *Vicarage, and Perpetual Curacy,* and the *Rectory.*

11. The appropriation of the Church Benefices took place soon after the Norman Conquest, from which period the Monastic Establishments commenced obtaining as many of the Benefices as possible, and by the close of the 12th and commencement of the 13th centuries they had obtained full one-third of the total number, including nearly the whole of those the most extensive and valuable; *Vicarating,* deputing, or delegating (from the Latin word *vicarius*), one of their own body to perform masses, administer sacraments, &c., allowing a trifling stipend for such performances, and appropriating the greater portion of the emoluments to the general uses of hospitality, alms, &c., at the Monastery. Abuses imperceptibly, and almost of necessity, growing out of this vicarious mode of proceeding, in progressive extortions and impositions on the part of the Vicar, creating increasing complaints among the people, it led to the assignment of what are now termed the small tithes, fees, and occasional glebe, as a permanent provision for the Vicar, independant of the Monastery, which continued to draw the great tithes for its exclusive appropriation; the Perpetual Curaeies are a distinction in name rather than in effect, the *Curate* having assigned to him, a similar portion of the Benefices as the *Vicars,* while the *Rector,* which in Norman French signifies Lord or Ruler, enjoys the entire Revenues of the Benefice which he holds.

12. It will be seen by page 244, where the number of Episcopal Benefices in each County of England and Wales, is exhibited in comparison with the number of Dissenting Congregations, that the *Rectories* amount to 4,978, and the *Vicarages and Perpetual Curacies* to 5,255; and if estimated in proportion to value, the latter will be found as two to one, compared with the Rectories; the influence and diligence of the Monastic Authorities continued to increase up to 1535; when, by an Act of Henry VIII., the dissolution of those Establishments was effected, and the Benefices then held by them were vested in the King, in as ample a manner as they had previously been held by the Abbots, &c., of the several Monastic Houses. At this period new Ecclesiastical arrangements were formed, and the Abbey Lands, with the Tithes, &c., attached to them, were divided among the new created Bishops, Deans and Chapters, Colleges, and other Corporations, and favoured individuals, who, up to this time, continue to draw the Great Tithes for their exclusive benefit; and as much to the exclusion of the support of the Clergy, as in the time of the Monastic Institutions, and more so to the exclusion of the support of the Poor, for which the Tithes were originally, in part, intended; inasmuch as the Abbots did dispense in Charity from the gates of their houses, what is now absorbed in individual enjoyment, and luxury.

13. Page 245 shows the proportion of the Benefices at present retained by the King, and the proportion vested in the Heads of Colleges, of the two Universities of Oxford and Cambridge, and other public bodies; and pages 246—255, exhibit a complete view of the nature, extent, and resource, of each of the Benefices in the Counties of Chester and Lancaster, of Cumberland, Westmoreland, Northumberland, and Durham, these Counties having been selected for this Ecclesiastical Display, in consequence of the extent of the Parishes, as observed upon in section 10, and as serving at the same time to show more of the singular complication and nature of the Church Establishment, than any other part of the Kingdom would have done, and also the inutility and disgraceful character of all existing Publications, in regard to this most important of all our Institutions. The Clerical Guide, or Ecclesiastical Directory; published Periodically, by one of the most distinguished Bookselling Establishments in the Metropolis, and deemed the standard authority in all matters relating to the Church Establishment; represents the Benefice of Whalley, in Lancashire, as follows, viz.: Population 1,658, [misprinted for 1,058]; Value in the King's Books, £6. 3s. 9d.: Patron, Archbishop of Canterbury: and Lewis's Topographical Dictionary, a work, generally speaking, of very great merit, recently published at a cost of 10 to 14 Guineas for England and Wales; gives no better idea of the value of the Benefice than that contained in the Clerical Guide.

14. It will be seen on reference to No. 37, of the Ecclesiastical Display of Lancashire at page 248, that the Parish of Whalley comprises upwards of 108,000 acres, and an Annual Value of Real Property in 1815, of £141,236, greatly increased since that time; and a Population, in 1835, exceeding 100,000, it being the Township of Whalley merely, that in 1821 contained 1,058 inhabitants; the Benefice, however, extends over the whole Parish, and instead of its value at the present time being £6. 3s. 9d. per annum, it probably exceeds £6,000; yet, notwithstanding this large Revenue, 18 Chapelries within the Parish, have obtained money endowments to the amount of £25,000, see page 249; this, it is true, is an extreme case, but all the Representations of Value are equally inapplicable to the present time; while, in all cases of subdivision of Parishes, the Population of the Township only, is given, instead of the Total of the Parish.

15. The Value assigned in all the existing Topographical and other Works, which contain any reference to the Church Establishment, are the Valuations taken at the time of the Dissolution of the Monasteries in 1535, and are the amounts on which the First-fruits and Tenths are levied; which Imposts, previous to the disavowal in England of the supremacy of the Church of Rome

were paid to the Pope; from 1535, down to 1703, these Imposts formed part of the Revenues of the Crown, except, that all Vicarages under £10, and Rectories under 10 marks per annum, were exempted from the payment of First-fruits. In 1703, these Imposts were formed into a Fund, denominated Queen Anne's Bounty, for augmenting the Smaller Livings, all at the same time being exempted from the payment of First-fruits, the clear improved Yearly Value of which did not exceed £50 per annum; and the Valuations as they then stood from 1535, were enacted *perpetual;* although provision was made in the original Act for their periodical revision. The principle originally acted upon, by the Governors of this Fund for its appropriation was, to grant £200 to any Poor Living, to which any private person would give an equal sum; another mode of distribution has been by *Lot.*

16. Since 1799, Queen Anne's Bounty has been augmented by £1,100,000 of Parliamentary Grants; and, since 1703, upwards of 3000 Livings in England, and 400 in Wales, have been augmented by £600,000 of Private Benefaction, £1,600,000 of Royal Bounty, and £1,100,000 of Parliamentary Grant; *Vide col.* 56, *fo.* 195, *of my Digest of the Parliamentary Papers, presented to the two Houses in the Session of* 1833: *cols.* 31, 35, 36, and 61, 62, *of the same Page, will show other large money Expenditure out of the Public Revenue, on Account of the Church Establishment.* This Fund it is that constitutes the money consideration in which the Church Establishment is involved, in addition to its ordinary Revenue derived from Tithes, Fees, and Glebes, adverted to in conclusion of section 10: how far the intentions of the Founders of the Fund, in its appropriation, have been fulfilled, may in some measure be inferred, by the endowments bestowed on the Parochial Benefices, and Perpetual Curacies, of the Six Counties exhibited at pages 247—255.

17. In regard to the Annual Value of the several Ecclesiastical Benefices of England and Wales, with the view of showing how far the Value of the present time bears an analogy to past time. In the Six Northern Counties, (the Ecclesiastical Relations of which I have exhibited in detail at pages 246—255,) I have not only exhibited their present state, in comparison with the Amounts in the *Valor Ecclesiasticus* of 1535, but also with those in the *Taxatio Ecclesiastica* of 1291, and the *Nova Taxatio* of 1317, as far as that Valuation extended, vide page 250; to render, however, these several Valuations intelligible and interesting, it will be necessary to take into consideration the Relative Value of the products of the soil, and of labour at the respective periods. In the *Chronicon Preciosum* of Bishop Fleetwood it is stated that in 1286, Wheat was at the Quarter 2s. 8d., but that such a storm of rain, thunder, and lightning, fell on St. Margaret's night; that Wheat came by degrees to the Quarter 16s., and this dearness continued off, and on, for about 40 years, so that sometimes it was sold at London, according to H. Knighton, page 2468, for £4 the Quarter." Yet, notwithstanding this last quotation, Bishop Fleetwood proceeds to state, that in 1287, Wheat was so cheap, that it was sold at the Quarter 3s. 4d., and in 1288, so great the plenty of corn, and scarcity of money, that Wheat was sold, by the Quarter, at 1s. 6d.; then follows a quotation from the *Waverley Annals*, which says 2s., and that Mr. Stow says that Wheat was sold (though the hottest summer that was remembered,) at London for 3s. 4d., in other parts of England at 1s. 8d., 1s. 4., and 1s.; nay, in the North and West parts, at 8d. the Quarter. Barley at 6d., and Oats at 4d., and Pease and Beans very cheap; and yet Fabian sets it down this year at 9s. 4d., which is very dear; but, Bishop Fleetwood proceeds to state, "that it is easy to be mistaken in setting down one year for another, and therefore, when H. Knighton says, that great dearness continued off and on, for 40 years, we must understand him candidly; for now and then, it was, in that space of time, exceedingly cheap."

18. In 1289, Walsingham says, Wheat was so cheap, that in some places it was sold the Quarter at 1s. 8d.; in others at 1s. 4d., and in others at 1s.; which does not certainly belong to the year foregoing. Fabian makes this a dear year, and says Wheat was by the Quarter, at 12s.; and says it went on increasing till it came to Edward II.'s time, to £2 the Quarter. *Stow's* account of this year is, that by reason of great hail and rains, Wheat rose from 2s. the Quarter, to 10s. 8d.; and by degrees, came to 20s. the Quarter, while *Dugdale*, in his Antiquities of Warwickshire, gives the following rates, viz.: Wheat, the Quarter, 6s., Rye 5s., Barley 3s., Beans and Pease 2s. 8d., Oats 2s., a Swan at 3s. 4d., and a Duck at 1d. In 1290 Walsingham, and from him the author of *Antiq. Britan.*, in *Vita* Joseph Pecham says, that Wheat which had been at 2s. the Qaarter, rose (by reason of great rains and storms) to 16s., which scarcity continued off and on, for many years; in 1297 Wheat (dear) by the Quarter, according to Fabian, 16s., and sometimes, according to H. Knighton, 20s.; in 1298, at Scarborough, in Yorkshire, the price of an Ox 6s. 8d., a Cow 5s., a Heifer 2s., a Sheep 1d.; in 1299, the Common Council of London enacted, by consent of the King and Nobility, the following scale of prices, viz.: a fat Lamb, from Christmas to Shrovetide, 1s. 4d., for the remainder of the year, 4d.; a Swan 3s., a Crane 1s., a Heron 6d., Geese and Pheasants 4d. each, fat Cocks, Mallards, and Partridges 1½d. each, Pullets and Woodcocks 1½d. for two, Plovers 1d. each. Dugdale, in his History of St. Paul's, represents Wheat by the Quarter, in 1302, at 4s., ground malt at 3s. 4d., Pease at 2s. 6d., Oats at 2s., a Bull at 7s. 4d., a Cow at 6s., a fat Mutton at 1s., an Ewe Sheep at 8d., a Capon at 2d., and a Cock or Hen at 1½d.

19. On the installation of *Ralf de Born* to the Priory of *St. Augustine, in Canterbury*, in 1309, 6000 guests were entertained at a feast, which cost £287. 7s.; being rather less than 11½d. for each guest; this not only included the cost of the provisions, but the cost of tables, tressells, and dressers; dishes and platters; 3000 ells of canvass; provender for the guests' horses; and *douceurs*

to the cooks and minstrels, 11 tons of wine, cost £2. 3s. 7½d. per ton, the spice £28, almonds £3. 18s., saffron £1. 14s., 9600 eggs cost £4. 10s., 24 Swans 5s. 10d. each, 200 Pigs [de porcellus] 6d. each, Partridges, Mallards, Bitterns, and Larks, cost £18, 53 Quarters of Wheat, 7s. 2d. per Quarter, 58 Quarters of Malt, 5s. per Quarter, 30 Oxen, 100 Hogs, 290 Sheep, cost respectively 18s., 3s. 2½d. and 3s. each, and 1000 Geese, 500 Capons and Hens, and 473 Pullets, 3½d., 3d., and 1½d. each, 600 pair of Rabbits, 6d. each. Among other things in this year, shoes are stated to have cost 4d. per pair. Of all the articles or things, the prices of which are enumerated, at this period, the price of Swans is the most remarkable, being disproportionately high to all other animals, and still more remarkable for their non-edible appreciation at the present time.

20. It is recorded in the *Antiq. Oxon.*, that in 1314, the Chancellor and Proctors of that University complained to the King, (Edward II.) that the market of Oxford ran so unreasonably high, that poor scholars could hardly live, upon which the King sent down his mandate to regulate the affair, the Parliament at the same time took the same thing (with respect to the whole nation) into consideration, and enacted the following rates, viz.: for a stalled or corn fed Ox £1. 4s., a grass fed Ox 16s., a fat stalled Cow 12s., an ordinary Cow 10s., a fat Mutton, unshorn, corn fed, 1s. 3d., if shorn 1s. 2d., a fat Hog of 2 years old (the *Antiq. Oxon.* say it should be *ovis bima*) at 3s. 4d., a fat Goose in the City 3d,, a fat Capon 2½d., a fat Hen 1½d., two Chickens 1½d., but each of these in all other places ½d. less; in the City, 3 Pigeons for 1d., and 20 Eggs for 1d., but in all other places 4 Pigeons, and 24 Eggs for a like sum; upon this attempt at fixation of Value, Bishop Fleetwood observes, that, "notwithstanding this Act of Parliament, things could not be purchased at these Rates, for people would not bring them to Market (and that is a thing that Parliaments cannot remedy); and so the King was fain to revoke the former Act, and leave the people to sell as they could (for a trade will do as it can, and never be forced one way or other). The Bishop appears to have been a *Doctrinaire!!* in 1315 and 1316, the price of Pease and Beans, and of Wheat, was by the Quarter, at £1., Malt at 13s. 4d., and Salt at £1. 15s.; nay, says Walsingham (by the rains in harvest), the dearth was such, that Wheat came to 30s. and 40s. the Quarter, and good Ale was at the Gallon (*per Lagenam*, from whence the word *Flagon*, which used heretofore to hold 4 Quarts, was derived), 2d.; the better sort 3d., and the best of all 4d., so that a Proclamation was fain to be issued out, that a *Lagena* of Ale should be sold for 1d., and that no Wheat should be malted, (*imbrasiatum*) which the Londoners had usually done, to the great consumption of Corn, and sold it at the Flagon 1½d., and the viler sort at 1d.

21. In 1316, Wheat exceeding dear, (Fabian), at the Quarter £1. 12s. In 1317, so great a scarcity of Corn, that at Leicester, (the abode of H. Knighton,) on a Saturday, Wheat was sold at per Quarter, £2. 4s., and the Friday following, at the same place at 14s. the Quarter, so H. Knighton; Fabian, puts it this year at £2. 13s. 4d.; and yet of this very year, [1317] Stow says, that the Harvest was in so early, that all was housed before St. Giles's day, which is *September* 1st.; and Wheat that was before at £4. the Quarter, was now at 6s. 8d.; and Oats, that was before £3. 4s., now at 5s. 4d.; from these quotations of prices it is seen that the fluctuations in past periods were much greater than at the present time, and it is equally evident that the prices were exceedingly variable in different parts of the kingdom; a little consideration, however, in regard to the altered circumstances of the country, will suffice to reconcile many otherwise seeming discrepancies; at the period here exhibited, Leicester, Shrewsbury, and Leeds, were as distant from the Metropolis in point of time and facility of transport of large supplies of subsistence as Lisbon, Amsterdam, or Hamburgh, are at the present time; so that Wheat, or any other equally bulky commodity, might be at 5s. in one part of the country, and 50s. in others. There is also another circumstance in addition to the bare quotations of price, which requires consideration in regard to a fair comparison of Value at the different periods.

22. It was enacted in 1290 [28 Edward I.] that the lb. Troy, containing 11oz. 2dwts. of pure Silver, and 18dwts. of alloy, should be converted into 20s.=£1. This Standard continued until 1337, when the same quantity of metal was coined into 22s. 6d., and subsequently varied as exhibited in detail at page 252; the greatest extremes prevailing between 1533 and 1553. In the latter year 3oz. of pure Silver and 9oz. of alloy were coined into 72s., being at the rate of 24s. per oz. for pure Silver against 1s. 8½d. in 1290, and 5s. 2d. at the present time. It will be seen from this, that a two-fold consideration is requisite in forming a fair comparison of prices of any commodities at different periods, first as respects a corresponding Value in the denomination of the money; and secondly, in respect to whatever difference may exist as a consequence of a scarcity or abundance of either money or commodities. Independant of the change in the denomination of the money; Money, at the present time, is relatively far more plentiful than in the periods heretofore referred to; and so of Metallic money, independant of paper and confidence, which increase the proportion as 10 or 15 to one; and in that degree will it be necessary to look at the Valuations of the respective Parishes, at the different periods, to enable any thing like a fair opinion to be formed, how far they have increased or diminished in interest, and relative importance, since 1291.

23. Independant, however, of the comparative Value of the several Parishes to themselves, at different periods; their relative Value to each other, in their respective districts, at the same period, is, in itself, a feature of no common interest. It will be seen that some Parishes which in 1291 were highly Valued, and indicated great importance, are now inconsiderable, and some entirely

obsolte; while, in other cases the rule is reversed, in Parishes formerly obscure, having become of first-rate importance; the following example will place these changes in a prominent point of view: in 1291 the Benefice of Stanwell, in the Metropolitan County of Middlesex, was valued at £40., and the Vicar at £5. 6s. 8d.; while the Benefice of St. Pancras was valued at only £8. 13s. 4d. In 1815 the Annual Value of the Real Property in Stanwell was returned at £9,455., and that of St. Pancras at £238,661, and Mary-le-bone, so late as the last Century an obscure Village, now the most Populous and Wealthy in the Kingdom, and rated in 1834 at £750,000. per annum. A thousand instances of changes, if not to the same extent, not less interesting, might be adduced, affording at delightful and instructive lesson in respect to the mutations and changes which States and empires, as well as Parochial Districts, and all organised bodies, are constantly undergoing. The Notes to pages 247 and 258 supply some further evidence of Parochial changes, while the details of the Benefices at large in the Six Northern Counties, exhibited at pages 246—255, afford an extensive range for comparison, reflection, and deduction.

24. The Valuations in the *Temp.* Henry VIII. [1535] indicate on the whole a less favorable condition of the Country than those of 1291. The arbitrary and avaricious character of the period of 1535, however, occasions great doubt to be entertained of the impartiality of that Valuation; but it will be seen as I proceed in the exhibition of the Prices of Commodities that no improvement had taken place, and in the absence of all data in regard to the increase or decrease of Population, much must be left to conjecture. The exhibition of the Prices of Commodities having already been carried to a greater extent than I thought would be necessary before I entered on this part of my subject, it now appears desirable to continue it down to 1535, as far as the intermediate period affords satisfactory data; I will therefore proceed accordingly. *Inquisitio unum capitale Messuagium* represents 70 acres of Arable land at Tunbridge in Kent in 1326 to have been worth 35*s.* per annum; 80 other acres of ditto 3*d.* per acre; 20 acres of pasture 1*d.* per acre; 14 acres of meadow 4*d.* per acre; 18 other acres of arable at 3*d.*, and 27 at 4*d.*, and 2 acres of meadow at 10*d.* each acre; in 1331, such plenty of corn and scarcity of money, that Wheat was at London by the Quarter, at 2*s.*, a fat Ox at 6*s.* 8*d.* H. Knighton and Fabian represent a fat Sheep at 6d., and at most 8d., a fat Goose at 2d., 6 Pigeons for 1d., and a Pig for 1d.; and observe upon these low prices that they were occasioned by King Edward III. gathering up all the money he could get to carry on his wars in France, and Scotland!! In 1357, John, King of France, who had been taken prisoner by the English at the battle of Poictiers, was ransomed for 3,000,000 crowns of Gold, equal to about £1,500,000; a vast sum at that time.

25. In the ten years following 1336 but little information is given. In 1339 several undertakers promised to deliver at the Town of Berwick-upon-Tweed, and in Leith Road, 10,000 Quarters of Wheat and Malt, each Quarter at 9*s.* This brings the elucidation down to the most extraordinary period in the History of Europe; the great Pestilence, which desolated all the then known parts of the habitable Globe: see my *Statistical Details and Development of the Diseases and Mortality of the Metropolis, which contains the fullest account, in the English language, of that fatal malady.* In 1348 H. Knighton says, that in consequence of the Pestilence then raging, things sold almost for nothing. A Horse worth 40s. was sold for 6s. 8d., and other animals in proportion, and a Stone of Wool at 9d.; upon which the historian says, *Erat leve precium cunctis præ mortis timore:* They were not only afraid of their cattle dying, but themselves, otherways Wool need not have been so cheap. In 1349 Wheat was at 2s., in 1359 at 26s. 8d., in 1361 at 2s., in 1363 at 15s., and in 1369 at 24s., in 1379 at 4s., in 1390 at 16s. 8d., in which year H. Knighton states that Wool was so cheap (by reason of a law that forbade men to carry it but to such and such places, for stranger-merchants to fetch it, and might not export it themselves), that it was sold by the Stone at 3s., and at 2s., and at 1s. 8d. In 1401 and in 1416 Wheat is stated to have been very dear at 16s. the Quarter.

26. In a *Computus* relating to the Prior and Canons of *Burcester, Oxfordshire*, in 1407, a new Plough is valued at 10d., a Dung Cart and all that belonged to it at 1s. 2d., and a pair of Cart Wheels at 3s. 2d.; and again in 1425, 23 Tod of pure Wool sold at 9s. 6d. the Tod, 5 Ox-hides for 12s., 16 Calf-kins for 2s., and 36 Sheep-skins two years old for 9s. In the same year Stone-cutters, Tilers, and Sawyers were remunerated for their labour at the rate of 4d. each per day, while a man for 12 days' labour at ploughing and harrowing was paid only 1s., or at the rate of 2d. per day. A great Flesh-axe was charged 1s. 4d.; 30 pair of Winter Gloves for the servants 4s., and 12 pair of ditto for the Bishop of Worcester's servants 5s. In 1434 the Autumn is stated to have been so wet, that for almost two years following in many places of the Kingdom Wheat was sold the Quarter at 26s. 3d., and yet at the end of the year following the *Hist. Croyland Continuatio* states that it came again to 5s. 4d., which, says Bishop Fleetwood, seems to have been the usual common price of a Quarter of Wheat, about that time; in 1439, Stow says there was such scarcity, that Wheat was sold at £1. the Quarter, and Fabian says at 26s. 8d.. In 1440 the scarcity continued; Wheat was at the Quarter 24s., Malt 13s., Oats 5s. 4d., Wine 1s. per Gallon, and Bay Salt 1s. the Bushel.

27. Bishop Fleetwood now states, under the year 1440, that if he was not misinformed, the Statutes of a College (which he does not name) enacted that the Weekly Allowance for every *Fellow, Chaplain*, and *Scholar*, shall be at 1s. 4d, and in times of Scarcity 1s. 5d. and 1s. 6.; but if Corn should be (and continue for 20 days) above 2s. the Bushel, then their allowance shall be 1s. 8d. the week, and no farther. Wheat, therefore, (says the Bishop) at 16s. the Quarter must be accounted exceedingly dear, and

yet in 1440 it was at the lowest reckoning of Mr. Stow, at 20s. the Quarter. But indeed from that year to 1460, I have never found Wheat at above 8s. the Quarter; and here (continues the Bishop) if it would avail me anything, I might justly bemoan our want of History for these last 250 years and upwards: but as to the purpose in hand, I have had the good fortune to meet with the *Computus* of 9 or 10 years of very great credit, which shall go under the name of E. C., [doubtless Eton College is meant] first giving an account of the Price of things, received from a private but very creditable hand, of the year 1444; Wheat 4s. 4d. the Quarter, Porkers 3s., Calves 2s., Geese 3d. each, 146 dozen of Pigeons at 4½d., 5½d., and 6d. per dozen, 8 Cygnets [young Swans] 3s. each; [I have before observed upon the relatively high price of this Bird over all other Commodities; next to which the price of Salt, and of Fish, which follow, deserve the first consideration.

28. At this time [1444] it appears that Master Traders wrought by the day for 3d., and their labourers or servants at 1d.; but then I believe they had their Meat and Drink. The Yearly Wages were, some £1. 6s. 8d., others £1.; in this year there was paid for 26 Warp of Ling £1. 10s. 4d., for 100 Stock-fish 17s. 6d., and for a Barrel of Herrings of 30 Gallons capacity, fully packed £1.; in the following year 3000 Red Herrings cost £1. 11s. In 1448 a Cade of Red Herrings for E. C. [Eton College] cost 5s. 8d., and a Barrel of White Herrings 2s. 3d.; in 1449 6s., and 10s.; in 1451 7s. 4d. and 13s. 7d. respectively; in 1453 the Cade of Red Herrings 7s. 6d.; in 1457 6s. 8d.; in 1459 7s. 10½d.; and in 1460 7s. In 1463 the first trace of a CORN LAW presents itself; it was in that year enacted in Parliament that no Corn should be imported if Wheat were not above 6s. 8d., Rye 5s., and Barley 3s. the Quarter, which signifies those prices to be high; the price in London this year was for Wheat by the Quarter 2s., Barley 1s. 10., Pease 3s. 4d., Oats 1s. 2d.; and in Norfolk, Wheat was 1s. 8d., and Barley and Oats 1s. the Quarter. In 1486 Wheat very dear, and Bay Salt the same price per Quarter, £1. 4s. In 1494 Wheat (cheap, and Bay Salt the same), 4s. In 1499 Wheat per Quarter 4s., Bay Salt 2s. 8d. In 1475 the Load of Hay 6s. 8d., and in 1498 8s. 2d. Mr. Stow says Hay was usually at 5s., but now it was 10s. or 12s. In 1511 the Load of Hay is given at 5s.; in 1560 a Load of Old Hay 12s. 6d., and New 6s. 8d.; in 1562 a Load of Hay 13s. 4d., and of Straw 6s. In 1504 Red Wine was £4., Claret £3. 13s. 4d., White £3. 6s. 8d., Malmsey £4., London Ale, 30s., Canterbury 25s., and Beer 23s. 4d. per Dolium [Pipe or Butt of 105 Imperial Gallons]; in the same year Wheat was 5s. 8d., between which date and 1521 I find no quotation, in which year Stow writes *Dearth;* Wheat by the Quarter £1.

29. In 1533 Stow states it was enacted that Butchers should sell their Beef and Mutton by Weight; Beef for a halfpenny the Pound, and Mutton for three farthings; which being devised for the great commodity of the Realm (as it was thought) hath proved far otherways; for at that time (i. e. 1533) fat Oxen were sold for 26s. 8d., fat Weathers for 3s. 4d., fat Calves of the like price, a fat Lamb for 12d.; the Butchers of London sold *Penny Pieces* of Beef for the relief of the Poor, every piece 2½lbs, sometimes 3lbs. for a penny; and 13, sometimes 14 of these pieces for 12d; Mutton 8d. the Quarter, and 1cwt. of Beef for 4s. 8d.; at this time also, and not before, were *Foreign* Butchers permitted to sell their flesh in Leadenhall Market of London; by Foreign Butchers such as lived not, or had not served their Apprenticeship, in London, is probably meant. This brings the exhibition down to the time of Henry VIII. [1535], when the *Valor Ecclesiasticus* took place, at which period the quotations of prices are very scant. Oats are quoted at 2s. 8d., and in 1237 and 1543 at 3s. 4d. per Quarter; but there is no quotation of Wheat before 1551, in which year both Wheat and Oats are stated at 8s., which rate appears to have prevailed for several years before and after 1535. In 1551 Coals are given at 12s. a Load, upon which it is observed, that whenever Coals are met with in old accounts, you are to understand thereby *Charcoal*, not Sea Coal, which had not been in common use (as well as I can guess) 150 years, at least not in London; though *M. Paris* speaks of them under the name of *Carbo Marinus*, in the time of Henry III. in. *Additament.*

30. The six preceding Sections exhibit a view of the prices of the products of the soil and other commodities, through a period of 350 years, from the time of Edward I., down to the *Valor Ecclesiasticus* of Henry VIII., at which latter period the Valuation indicates a less favourable condition of the country than in 1291. In 1460, it is stated that, Wheat was never above 8s. the Quarter, notwithstanding the sword was drawn between the houses of York and Lancaster, which usually cut down corn as well as men!! In 1551, Wheat and Oats are both stated to have been at 8s. per Quarter, and in each of the four years 1554—1557, Wheat at the same price of 8s. per Quarter, and Oats in the latter year 10s.; and the pay for the threshing of a Quarter of Wheat 13d., of Rye 10d. and of Barley 5d.; notwithstanding the quotation in one place of 8s. per Quarter for Wheat in 1557, *Stow* says, that in this year, before harvest, Wheat was per Quarter, £2. 13s. 4d., Malt £2. 4s., Beans and Rye £2., and Pease £2. 6s. 8d.; but after harvest, Wheat was at London per Quarter 5s., but in the country at 4s.; Malt, in London, 6s. 8d.; but in the country, 4s. 8d.; so that a penny-wheat loaf, which before harvest was eleven ounces, was after harvest fifty-six ounces. In each of the five years 1558—1562, Wheat and Rye are both quoted at 8s. the Quarter. Bishop Fleetwood, however, observes in regard to this uniformity of prices, that they were the Rates agreed upon between the Landlord and Tenant, in regulation of Rent rather than the actual selling prices.

31. Subsequent to the last mentioned year, 1563, about which time the American Mines began to pour forth supplies of gold and silver into Europe, a high money price for all commodities appears to have prevailed. In 1574, such a dearth at London,

that Wheat was the Quarter at £2. 16s., Beef (at Lammas) so dear that a stone came to 1s. 10d., five Herrings 2d., and Bay Salt never so dear, the Bushel selling at 6s.; after harvest, Wheat was the Quarter 24s., and so continued about a year. In 1587, Wheat was at London by the Quarter, £3. 4s., and in other places 10s., 12s., and 13s. the Bushel; this, it is observed, was occasioned by excessive Transportation. In 1594, Wheat £2. 16s., Rye £2. In 1595, Wheat, (by much Transportation), the Quarter at £2. 13s. 4d., a Hen's Egg at 1d., or at best three Eggs for 2d., and a pound of Sweet Butter 7d.; the sins of the times, (*Stow* says), deserving it. In 1596, Wheat (by reason of great rains), the Quarter at £4., Rye £2. 8s., Oatmeal by the bushel 8s. In 1597. Wheat fell from £5. 4s. the Quarter to £4., Rye from 9s. the Bushel to 6s., and then to 3s. 2d., and then rose again to the greatest price. In 1598, Pepper so dear as that a pound was sold at 8s., Raisins at 6d., Gascoigne Wine at 2s. 8d., and Sweet Wine at 4s, per gallon.

32. The fifteen preceding Sections contain all that is worth transcribing from Bishop Fleetwood's deservedly esteemed Work, *Chronicon Preciosum,* relating to the prices of commodities from 1286 down to the close of the 16th Century; thus far I was induced to transcribe, in reference to the Ecclesiastical Valuations of 1291, 1317, and 1535; but after all, it is still difficult, for reasons which will hereafter appear, to arrive at any very accurate conclusions in regard to the relative Value of the several Parishes at those past periods, in comparison with their Value at the present time; nevertheless, as the Bishop appears to have taken very great pains in the collation of his Work, and to have pursued his enquiries with great integrity of purpose; it may be regarded as containing, within a narrow limit, the best account extant of the Value of commodities during the period to which it refers, and as such, it may be considered quite in place here, as well in respect to the Ecclesiastical Valuations before referred to, as to the price of Corn and other commodities at the present time, to which I shall hereafter have occasion to advert.

33. In regard to the price of commodities, one class of Speculatists contend that, it is governed solely by the supply, or amount of the circulating medium; that the high prices of Corn, and other products of the soil, which prevailed between 1795 and 1819, resulted entirely from the extensive application of the representations of amount on Paper, and of Credit, to facilitate the exchange of commodities; and that the depression which has prevailed since 1819, has as certainly resulted from the return to an intrinsically valuable circulating medium; and some have as strenuously contended for variableness of season, obstruction to free exchange, either by enactment, or commotion, being the governing cause of high or low prices; while others assume, that price is governed entirely by supply and demand, and that it is wholly uninfluenced, in a general sense, or for any length of time, by any extraneous or special causes. Whatever respect, or otherways, may be due to either one or the other of these assumptions, it will be seen as the subject becomes more closely examined, that there is either some latent principle, or some undefined cause, which always has had, and which still continues to have, a greater effect upon the money price of all commodities, than any hitherto disclosed.

34. If there was any inherent tendency in the debasement of the coinage, which is the same in effect, with an enlargement of the circulating medium, whether of Paper or any other representation of amount, it would certainly have shown itself under the debasement that prevailed between 1536 and 1551; [see Statement, page 252], but as far as any evidence exists, no effect whatever was produced on the current price of commodities during that period; and under the extreme point of debasement in 1551, when the Intrinsic Value of the currency was only as one, to fifteen, in comparison with 1290, Wheat was quoted at 8s. per Quarter, which at various periods antecedent to any debasement having taken place is represented to have been at a much higher price, and continued, without any depression, subsequent to the restoration of the Silver Standard in 1552; and previous to harvest in 1557, Wheat is represented by *Stow* to have been at £2. 13s. 4d. per Quarter, and all other Grain in proportion. It is proper, however, to observe, that although the coinage was restored in 1552, to the same standard of purity which prevailed from 1290 down to 1535, the lb. Troy being coined into only 60s. instead of 48s. and 72s., as was done between 1535 and 1552; the debased coins of that period continued to circulate down to 1559, [II. Elizabeth] when they were all called in, and exchanged, as was done by the greatly abrased coins in circulation in 1816.

35. According to a statement deduced from the Saxon Chronicles by *Sir George Shuckburgh Evelyn, Bart.,* inserted in the Transactions of the Royal Society, towards the close of the 18th century, the price of Wheat in England, for a hundred years antecedent to the Norman Conquest in 1066, averaged about 1s. 6d. per Quarter; and for a century subsequent to that event, the same authority represents the average to have been about 3s. per Quarter; but having proceeded so far in the History of Price, with the view of making the subject as complete, as the imperfect records of the time admit, I will now introduce a few Extracts from the *Saxon Chronicles* direct. In *King Ina's* laws, enacted between 712 and 727, it is said, *Ovis cum Agno suo valet unum Solidum, usque ad* XIII. *Noctes post Pascha.* An Ewe, with her Lamb, is worth one shilling, till thirteen nights after Easter. *Bromton* Chron. fo. 766. In the 10th century, *Ednoth* bought 2 Hydes of Land, at *Stapleford in Bedfordshire* for C. shillings of the best silver, and gave them to *Ramsey Abbey.* At page 473, *Hist. Elien,* it is said that an Acre of Land was purchased at 1s., and a Hyde at Cs. from whence *Bishop Fleetwood* observes "one might think, that a Hyde contained 100 Acres, but it contained 120; and once for all," he

continues, "it will be well to remember, that a *Hyde*, a *Yard Land*, and a *Knight's Fee*, contain no certain number of Acres, but differ according to different places, as may be seen in the Glossaries.

36. In the *Senatus Consulta de Monticolis*, in the time of King Ethelred, about the year 1000, it is stated. that, if a Horse be lost, the compensation must be 30s., a Mare or Colt of a year old 20s., a Mule or Young Ass at 12s., an Ox 30d., a Cow 24d., a Swine 8d., a Man £1., a Sheep 1s., a Goat 11d.; *Saxon* money 6d. to the 1s., and 48s. to the £. 1043, is represented to have been a year of Famine, and corn so dear, as no one ever remembered it: insomuch that a *sester*, or *sextarius*, of Wheat was sold for LXd. *H. of Huntingdon*, and *Robert de Monte*, both of whom lived in 1140, explain the *sextarius*, which was equal to the *seam* of after times, or the *quarter* of the present time; to have been as much as would load a Horse, both say it was sold for V sol. *Sir H. Spelman*, in reference to the famine of this year, cites *Huntingdon* L. 6., as follows, viz.: *Circa hoc tempus (scil Ed. confess), tanta fames Angliam invasit quod Sextarius Frumenti, qui Equo uni solet esse oneri, venundaretur V solidis, et etiam plus.* Bishop Fleetwood here directs attention to the distinction between LXd., and V *sol*, and observes that, the Author here quoted, who lived after the Norman Conquest, translated LXd. into V sol, because in their days, [1140] the Shilling contained 12d., while in the Saxon times when this famine or scarcity happened, the Shilling contained, as previously stated, but 5d.; in support of which, he further quotes the Fragment of *Ælfric Grammaticus*, which states, *Anglia Sacr., p.* 1., *Libra on Leden is Pund on Englise, Fif Penegas gemacigath ænna Scillinge et XXX. Penega ænne Marcs: i. e. Libra* in Latin is Pound in English; Five Pennies make one Shilling; and 30 Pennies one Mark. The Bishop dwells upon what seemed to him a blunder of the Authors in question, and further observes, "Thus, in the Laws of King Athelstan, as they had been translated by *John Brompton*, (inter X. Scriptores, p. 847), an Offender is to forfeit for his first fault XXXd. for his second, LXd., and for his third Xs.; "now this," says the Bishop, "could not possibly be in King Athelstan's time, when LXd. made XIIs., and thus, in King *Ina's* time, Law 59, which enacted, that he who wounded or maimed the Horn of an Ox, should pay Xd., of a Sow 2d.; who cut off the tail of an Ox should pay IVd., of a Cow Vd., and the same for putting out the Eye of an Ox; for all these offences, *John Brompton* states 5d., and when the mulct for putting out the Eye of a Cow is stated at 1s. *Brompton* says 12d. Notwithstanding these strictures of the Bishop, he appears to have overlooked the fact, that although there was a difference in the number of Pence in a Shilling, as there were 48 Saxon Shillings to the £.; the number of Pence in the £ was the same prior to and after the Norman Conquest; this, however, is no excuse for *Brompton*, who appears to have quoted loosely; while, as respects both *Huntington* and *Rob. de Monte*, their quotations were correct for the time in which they wrote; and they perhaps, little thought that what they were doing would be matter of question in either 1835, or in Bishop Fleetwood's time.

37. The *Annales de Margan* represent 1125 [this is subsequent to the Norman Conquest] to have been another year of Famine, and quote Wheat at £1 the Quarter; but H. Huntingdon says, page 382, *Vendebatur onus equi frumentarium* VIs. [these will be Norman, not Saxon, s.] and Rob. de Monte in the same year says it was the dearest year in England that was ever known, for a Horse Load of Wheat was sold at VI. sol. This, upon the credit of these two writers, seems more likely than the price given in the *Annales de Margan*. In the *Liber niger Schaccarii* of *Eadmer*, written as is supposed in the time of Henry I. between 1100 and 1135, is the following, viz.:

1.	Pro Mensura Tritici ad Panem Centum Hominum - - - - - - - - - -	1s.
2.	Pro Corpore Bovis Pascualis - - - - - - - - - - - - - -	1s.
2.	Pro Præbenda xx. Equorum - - - - - - - - - - - - - -	4d.
4.	Pro Ariete vel ove - - - - - - - - - - - - - - - -	4d.

This was the exchange made by the King, that instead of Provisions for his Household he might have some ready money to defray the expenses of his Court and pay his Soldiery. Instead therefore of Bread for 100 men (for one meal it is supposed) the Tenant was to pay 1s., and instead of a Stalled Ox, the same. *Selden*, however, in his notes on *Eadmer*, says instead of the Ox it was 5s.; but *Sir H. Spelman*, who saw the Book, which he described as one on which the sun did seldom shine, writes *Solidum unum*, 1s. By *Pro Præbenda Equorum* is always meant Oats; and instead of bringing Oats for XX. Horses (for a night it is supposed) the Tenant was to allow 4d. In the Law of 1 Hen. I. cap. 76, Forty Sheep are valued at £1. About the year 1145 the Tenant of a Place was to pay Yearly XXs. or VII. Oxen, each worth IIIs.

38. In 1185 the Tenants of *Shireborn* were by Custom to pay either 2d. or 4 Hens, which they would; and by the custom of *Beleshall*, a Ram or VIIId., while in the Preface to King Athelstan's Laws it is said, *Vel unus Aries qui Valeat* IIII. *Denarios*, being a half less. In 1196 Corn is represented to have been so scarce, that at Salisbury a *Sema* of Wheat was sold at 13s. 4d., and in 1197 at 18s. 8d. The *Sema*, according to Dr. Gale, who quotes the above prices from the *Chron.* of *Tho. Wikes*, was only 4 Bushels, having put in a note to *Sema, quatuor modios;* but *Sir H. Spelman*, who appears a better authority, writes, *Seam* VIII. *modiorum mensura; sic de Frumento dictum quod unius Equi sit Sauma*, i. e. *Sarcina.* In 1199 it was ordered by King John that a Tun of

Poictou Wine should be sold for no more than £1., a Tun of Anjou at £1. 4s., and no French Wine above £1. 5s., unless so very good, that one would be glad to give £1. 6s. 8d. No Sextarium of Poictou Wine to be sold above 4d., nor any White dearer than 6d.; but the merchants would not bear this assise, and sold the Red for 6d., and the White for 8d. the Gallon, and the land, the Historian says, was filled with drink and drunkards. Neither the *Tun*, *Sextarium*, or Gallon, as here used, are sufficiently defined to determine what proportion they had to measures of the present time.

39. The *Waverley Annales* represent that in 1202 there was so great a scarcity (occasioned by continual rains) that a *Quarter* of Wheat was sold for more than 12s.; and in 1205, according to M. *Paris*, there was so great a Frost, lasting from Jan. 14 to March 19, that Wheat was at the Quarter 12s. *Stow* says the ground was so hard that it could not be tilled, and a Quarter of Wheat was sold the Summer following for a Marc, which in Henry II.'s time [1154—1189] had usually been at 1s.; Beans and Pease 6s. 8d., and Oats that were wont to be 4d., in this year were at 3s. 4d. Fabian puts Wheat this year [1205] at 15s. instead of 12s. the Quarter. In or about 1217, when the King came to *Redbourn*, only 4 miles from St. Albans, the *Camerarius* of the Abbey of St. Albans lost 3 good Horses, 2 Asses, and a good New Cart, all which were worth at least 50s. When *Fulco de Brent* came to *Langley*, the *Camerarius* lost 3 Houses, that were burnt, and 35 Hogs, which all came to at least £X., and a Plough that cost Xs., a mistake for Xd.; and when the King of France's *Mareschal* came, he lost many Oxen, Cows, Sheep, and other things, and 24 Horses, valued at 40 marks, i. e. £26. 13s. 4d.; *M. Paris*, p. 1059. The *Camerarius* was the receiver of the Rents for the Monastic Houses, and who provided Clothes for the Monks. In 1223 Wheat is again represented by *Stow* as very dear, and as having sold by the Quarter at XIIs. About 1232 the *Abbot of St. Albans* going a journey attended with 6 Esquires on Horseback, agreed that if the Horses died on the way, that there should be paid for each Horse Xs., the Horses to be strong and handsome; *decentes, et fortes ad portandum.* In 1237 Wheat was by the Quarter 3s. 4d., Barley 2s., and Oats 1s.; and in 1243-4 Corn so plentiful, that Wheat and Pease were each of them by the Quarter 2s.

40. In 1246 Wheat, according to *Thomas Wikes*, is represented so dear at 16s.; and by the same authority in 1247 still dear, 13s. 4d. In 1257, according to *Fabian*, excessively dear, 24s. In 1258, according to *Sir Walter Hemingford*, so great a Famine, that many people were starved, so that a Quarter of Wheat was sold at 16s.; this makes the account of *Fabian* in the preceding year doubtful, more so when it is considered that *Stow* says it was XVs., nay XXs. the Quarter. We now come to the most remarkable period in the whole History of Prices, the year 1270 [54 Hen. III.] in which year the Author of *Antiq. Britan* in *Vita Joh. Pecham* says that Provisions were so scarce, that Parents did eat their own Children!!! and that Wheat was so dear, that it was sold at the Quarter £4. 16s., and sometimes at 16s. the Bushel, which makes it at £6. 8s.; equal in the money of the present time to £15. 16s. 8d. and £21. 2s. the Quarter. Other accounts vaguely represent the misery of this time to have been so great that thousands died of Starvation on the Highways, but no clue is given to the cause; it was somewhat of a turbulent period, but it is difficult to conceive of any internal commotion, or indeed of any human circumstances occasioning such an extraordinary state of Society, while there is not the slightest trace of any interposition of nature having prevailed at the time. This brings the Review of the Prices of Commodities from the time of the Saxons down to the period commenced at in section 17, and 18—31 carry them down to the close of the 16th century. So far as respects the Price of Commodities.

41. Next, as respects the Stipends of the Clergy, section 11 explains the distinction between the *Rector*, *Vicar*, and *Perpetual Curate*, and the following will show the prevailing Stipends of the two latter through a period of two or three centuries. In a Council held at Oxford in 1222, it was decreed, that where the Churches had no greater Revenues than V. marks per annum, they should be conferred on none but such as should constantly reside in person over the Benefice, by which it is inferred that a single Priest might therefore subsist on V. marks, but he could not afford to keep a *Curate*. Accordingly *S. Langton*, Archbishop of Canterbury, in the same year decreed, that the *Perpetual Vicar* should have V. *marks* assigned him, i. e., as much as might be farmed out for V. *marks*. Except in Wales, where by reason of the smallness of the Livings, (and plenty it is supposed of Provisions) the Vicars were contented with less Stipends. In 1287 *Peter Quivil, Bishop of Exon*, in *Synodo Exoniensi*, decreed that in every Parochial Church the *Perpetual Vicarage* should be endowed with at least V. marks per *annum*, that the Vicar may in some measure keep hospitality; and in case he grow old, sickly, or impotent, may be thereby sustained. This must be done if the Living be really worth XL. *marks per annum*; but if it be of better value, the Vicar's portion must be increased; and as for a *Curate*, who is termed (*Parochialis Sacerdos*) he decreed the Rector should pay him 40s. per annum for his Stipend, and says, if the Rectors feel themselves aggreved by this, they may do their work themselves and save that money. The *Bishop of Exon* further decreed that the *Sacerdotes auxiliarii* of his Diocese should have 50s. *per annum* at least; and if they have agreed for less, such agreement to be void

42. *Bishop Fleetwood* observes upon the title *Parochialis Sacerdos*, that he should have thought *Sacerdos*, joined especially with *Parochialis*, should have signified a *Parish Priest, Rector*, or *Vicar*, as distinguished from the *Capellanus* or *Curate*; while he seems above, to have been a mere Stipendiary *Curate*, and removable whenever the *Rector* would do his business himself. The Bishop

also appears to have been at a loss to account for why an *Auxiliary*, or Assistant Priest should have had 50s. per annum, when the *Curate* had but 40s.; but observes that there was very good reason why such underhand bargains should be made void, which were so much to the prejudice of the poor Curate, and therefore it was, that in 1253 when *Articles of inquiry* were directed to all the Dioceses of England, one question was, Whether any *Rector* had made a bargain with their Curates, that besides the Stipends they received from the Rectors, they might receive from the people *Annualia, et Tricennalia;* because if so, it was to save the Rector (or Monastic Incumbent, whom by section 11 it may be observed had become the chief Impropriators of the Church Benefices) from giving so fair and reasonable a Stipend as they ought.

43. *Annualia, et Tricennalia;*—the first of these implies such Oblations as were made annually by Relations of Deceased Persons upon the day the person died, which was called the *Year's day*, or *Year's mind*, and upon which, *Mass* was celebrated with great solemnity by one of the most considerable Clergymen that the means and influence of the party could procure. *Tricennalia* were called *Trentals*, from Trigintalia, and in English a *month's-mind*, because the Service lasted a month, or 30 days, in which they said so many Masses. On this ceremony M. *Du Fresne* observes, *Tricenarium, Officium* XXX. *Missarum, quod totidem diebus peragitur, pro Defunctis vel Obventiones quæ obveniunt Sacerdotibus ratione ejusdem Officii.* In 1289 Gilb. Cicest. [Bishop of Chichester] decreed that Curates in poor Churches should have V. marks for their Stipends; in richer Churches more. In 1306 *W. Grenefield, Archbishop of York*, decreed the same thing, and in 1308 *Rob. de Winchelsea, Archbishop of Canterbury*, decreed that no Curate should serve under V. marks per annum. The Great Pestilence of 1348, (see section 25) *H. Knighton* states, had, among other people, swept away so many of the Priests, that a Chaplain could hardly be gotten to serve a Church under X. *marks* or X. *pounds* per annum, whereas before they might be had at V. or IV. marks, nay at II., together with their diet; while in 1348 men would hardly accept of a *Vicarage* of 20 marks or £20 per annum; this it is supposed was because *Vicars* were thought to be obliged to stricter residence, which in pestilential seasons was doubtless hazardous.

44. In 1360 *J. Thoresby*, Archbishop of *York*, confirmed the decree of his predecessor *Grenefield* in 1306. In 1362 *Simon Iselip*, Archbishop of Canterbury, decreed, that Chaplains *Annalia Celebrantes*, and having no cure of souls, should be content with V. marks per annum, and they who had cure of souls with VI. marks, unless the Diocesan for good cause should order more; but *Stow* observes "that these low Stipends occasioned many of the Curates to turn Robbers!!" The Pestilence of 1348 appears to have produced the same effects on the habits of the Clergy of England, as the *Villani* of Florence describe it to have done among those of Italy, (see section 31 of Introduction to my Display of the *Mortality and Diseases of the Metropolis* in each of 200 Years since 1628) inasmuch as the Archbishop of Canterbury in this same year [1362] complains that the Priests grew *wanton*, and were not content with reasonable Stipends for serving Parish Cures, but went about, rather choosing to say Masses for the living and the dead, and get what they could that way, than fix in any certain place; he therefore ordered and appointed the Salaries named, and if any one took any more, under any pretence whatever, they should be punished. This, Bishop Fleetwood observes, had been highly unreasonable, unless V. or VI. marks had been, at that time, thought sufficient maintenance for a single person; and so accordingly about that time he had found it to be the usual Salary. *Simon Sudbury*, Archbishop of Canterbury, in 1378 confirmed the decree of his predecessor *Iselip*, and with the same complaints, and further ordered, that every such unfixed *Mass-Priest* should content himself with VII marks per annum, either all in money, or with *diet* and III. *marks* in money; and he that took a Cure, to content himself with VIII. *marke* all in money, or with IV. *marks* and his *diet;* and all this under pain of excommunication.

45. On taking a retrospective view of the four preceding sections, it is seen, that while previous to the Great Pestilence of 1348 it was necessary to stipulate for an adequate maintenance for the inferior Clergy, subsequent to that calamitous event it became as necessary to counteract their endeavors to over-exaction so much so, that the Parliament of the 39 Ed. III. [1356] c. 8 enacted, that "if any Secular Man of the Realm pay any more than V. marks to any Priest yearly, in money, or in other things to the valure, or if he pay to such Priest retained to abide at his Table above 2 marks for his Gown, and other necessaries (his Table accounted to 40s.) and thereof be attainted, he shall pay to the King fully as much as he paid to the same Priest." This Act was amended in 1414, 2 Henry, s. 2 c. 2 as follows, viz.: "No Yearly Chaplain within the Realm shall take from henceforth more for his whole Wages by Year (that is to say, for his Board, Apparel, and other necessaries) but VII. marks. Nor the Parish Priests which be, or shall be retained to serve Cures, shall take from henceforth, for their whole Wages, by year (that is to say, for the things aforesaid) but VIII. marks, unless it be by License of the Ordinary, so that the whole sum shall not exceed IX. marks; and in 27 Henry VI. [1449] a pardon was passed for such Priests as had offended against these Acts.

46. In 1421 *H. Chichley*, Archbishop of Canterbury, at the very importunate instance of his Clergy, in *Convocation*, did, with the consent and advice of his Suffragans, confirm and ratify the decree of his predecessor *S. Sudbury* in 1378, repeating the very words of it; and in 1439 the same Archbishop decreed that Vicarages shall be augmented by the Rectors or Appropriators to XII. *marks per annum* if the whole Benefice be worth so much, to support the burthens incident to Vicarages, which were at first free from

all incumbrances and burthens; but by the artifice of the *Monks*, and *Religious*, the favour they found at Rome, the compliance of the Bishops, and by other means, the Vicars came by degrees to bear almost equal charges with the Rectors, though much less able to do it; and therefore although it was very well and wisely done by this Archbishop to augment Vicarages to XII. *marks*, yet considering the charges and burthens incident to Vicarages, they were not much advantaged by it; for a Vicarage of XII. *marks*, with the burthens which had been imposed upon it, might not be so good as a *Curacy* with VII. or VIII. *marks* without incumbrance.

47. In 1314 *Eliz.*, wife of *Rob. Bruce*, King of Scotland, being prisoner in England, was allowed for herself and family XXs. by the week. To *Robert Wychard*, Bishop of Glasgow, and *William de Lamberton*, Bishop of St. Andrews, prisoners, there was allowed to each of them 6d. a day, to a Valet 3d., to a Chaplain 1d.! and to their ordinary Servants 1d. In 1316 Edward II. gave to *Theophania*, a French Lady, a year £500 for ever, because she had been Nurse to Isabella his Queen. In 1330 *Joan* of *Oxford*, Nurse to the Black Prince, had a Pension of £X. per annum, and *Maud Plumpton* a *Rocker* had X. marks. Edward II. being deposed in 1326, had 100 marks by the month allowed to maintain him, being at the rate of £800 per annum, or each mark 13s. 4d. In 1495, when the Lady *Anne*, Daughter to Edward IV., was married to *Thomas L. Howard*, eldest Son of the Earl of Surrey, it was agreed that she should be allowed for Sustentation, and convenient diet of meat and drink, XXs. by the week, and for two Gentlewomen, a Woman Child (i. e. a Servant) a Gentleman, a Yeoman, and three Grooms, in all 8 People, £51. 11s. 8d. by the Year, and for the Sustentation of 7 Horses, £16. 9s. 4d.

48. The Salaries of the Learned Dignitaries of the Law appear to have been as follow, viz.:

The Chief Justice of the Common Pleas in 1262 had C*l.*, in 1281 XL*l.* in 1299 C. marks, in 1399 XL*l.*
A Baron of the Exchequer in 1243 had XL. marks, in 1265, 1299, and 1364 XL*l.*, reduced in 1399 to XL. marks.
Chief Justice of King's Bench in 1299 had L. marks, in 1367 C., and in 1402 XL*l.*

In 1440, upon a general complaint of all the *Benches*, and of the *Attorney General*, of the ill payment of their Fees, there was an inquiry made what they had usually received for the previous X. years, and what the Crown was indebted to them; by which, and by the answer that was made to it, it appears that the *Standing Fee* of each Chief Justice was £40 per annum, but that by private letters patent, the *Chief Justice of the Common Pleas* was allowed 180 marks per annum, and the *Chief Justice of the King's Bench* was allowed 140 marks per annum besides their Fees; and for their *Winter Robes* £5. 6s. 11¼d., and for *Summer Robes* £3. 6s. 6d. The Fee of the Justices of both Benches, was 40 marks per annum, their other allowance was 110 marks. The Fee of a Justice of *Assise* was £20., and that of the Attorney General £X. per annum; what their other allowance was does not appear. The allowance to the King's Serjeants, and the Attorney, for Robes, was £1. 6s. 11d.

49. In 1545, the Chief Justice of the King's Bench, had an addition of £30 to his fee; and each Justice of the same Bench and of the Common Pleas, had an addition of £20.; upon these amounts, Bishop Fleetwood observes, "that at the very best, their rewards seem to have been far from equal to the faithful discharge of their most painful, and most useful office; and yet it hath so pleased God, to bless their labours, that I do not think I misreckon, when I say, that the law hath laid the foundation of two-thirds of all the honours and great estates in all England." The yearly wages of a Bailiff for husbandries, together with his clothing, once by year at most, and his diet, in 1389, was 13s. 4d.; in 1446, £1. 3s. 4d.; in 1514, £1. 6s. 8d., and 5s. per annum for his clothing; in 1315, wages were paid as follows, in Wheat at the rate of Xd. the Bushel, viz.: Sarclers, (Weeders) and Hay-makers, by the day 1d., Mowing Meadows 5d. the Acre, or by the day 5d., Reapers of Corn 3d. by the day after the first week in August, in the first Week 2d., for threshing a Quarter of Wheat and Rye 2½d., of Barley, Beans, Peas, and Oats 1½d., without meat, drink, or other courtesy demanded. In 1557, there appears to have been paid for threshing a Quarter of Wheat 13d., of Rye 10d., of Barley 5d. In 1351, the wages paid, without meat or drink, to a master Carpenter, Mason, or Tiler, was by the day 3d., their workmen 2d., and other Servants or Boys 1½d., Plasterers, Workers of Mud Walls, and their Knaves, or Servants, at the same rate. In 1360, the rates of each respectively were 4d., 3d., and 2d. In 1389, the yearly wages, with clothing and diet, was for the Master Hind, or chief labouring husbandman, the Carter, Shepheard, and Swineheard, each 10s.; Ox, and Cowheard, each 6s. 8d.; a Woman Servant, and Dairy Woman, each 6s.

50. In 1446, the wages of the Chief Carter and Chief Shepheard was raised to £1., and 4s. allowed for clothing, diet still supposed, and other service in proportion, from Easter till Michaelmas. In this year the Freemason, or master Carpenter, had, with diet, by the day 4d.; a master Tyler, Slater, Rough Mason, a Mean Carpenter, and other Artificers by the day, with diet, 3d.; other labourers 2d., and without diet respectively, 5½., 4½., and 3½.; from Michaelmas to Easter, (September to April) they had a penny by the day less, the days being then shorter; in time of harvest, a Mower had 4d., a Reaper and Carter 3d., Women and other labourers 2½., all with diet, and without diet, each 2d. a day more; in 1514, the rates of wages for all kinds of service, appear to have been the same as in 1446. I have how transcribed from the *Chronicon Preciosum* of Bishop Fleetwood, all that is worthy of notice

relating to Value, Price of Commodities, and Remuneration for Labour and Service, from a period antecedent to the Norman Conquest, down to the close of the 16th Century ; and I now refer to page 97 of my display of the *Finances, Navigation, and Commerce, of the United Kingdom,* printed pursuant to the recommendation of a Select Committee of the House of Commons, and presented to the Members of the two Houses of Parliament in the Session of 1833, for an exhibition of the average price of Corn in England, in comparison with the price thereof in all the great Corn Markets of the World, in each year since 1649 ; while the following sections point to all such great Historical Events of the period, as may be considered likely to have had an influence on the Price of Commodities, and Standard of Value.

51. The first 20 years of Elizabeth's reign, which commenced in 1557, was occupied in intrigues and cabals. In 1560 a peace was ratified between England, France, and Scotland. In 1565 the potatoe was introduced into England by a captain Hawkins, from Santa Fe, the present capital of the Colombian Republic, and was first planted by Sir Walter Raleigh, on his lands in Ireland. In 1574, in which year the price of Wheat is quoted from 56s. to 24s. per quarter, a *sumptuary law* was passed in England, to repress the growing luxury then prevalent. In 1575 the Militia of England amounted to 182,930 men, and the total number of men fit for service, according to muster, are stated to have amounted to 1,172,674, although full one-third are supposed to have been omitted ; assuming this to be true, the population of that time must have been equal, or nearly so, to that of the present time. In 1577, the provinces of Holland renounced the authority of Spain, an event which tended greatly to enlarge the commercial intercourse of England, and in the same year, Sir Francis Drake embarked on his first voyage from Plymouth to the Pacific Ocean, and returned in 1580 with great plunder. In 1585, he plundered St. Domingo, and captured the city of Carthagena. Mary, Queen of Scots, was beheaded in 1587, in which year the average price of Wheat is quoted at 64s. ; and the following year is memorable for the defeat by the English of the Spanish naval armament, designated the Armada. In 1593, the Plague carried off 18,000 of the population of London, and in the following year the price of Wheat is quoted at 56s. ; and a high fluctuating price between 53s. and 92s., appears to have ruled through the four years 1596—1599, the causes for which high prices not being satisfactorily accounted for.

52. During the first 20 years of the 17th century, the price of Wheat experienced (comparatively with former periods) but little fluctuation, the average of the 20 years having been 41s. 7d., and the extremes 29s. 4d. in 1602, and 50s. in 1609. Queen Elizabeth died on the 24th of March, 1603, and was succeeded by James VI. of Scotland ; in the same year the Plague carried off 36,578 of the inhabitants of London, the total number of deaths therein being stated at 38,244. The value of the exports from England in 1612, were computed at £2,487,435, and the imports at £2,141,151, leaving a balance in favour of England, (admitting it to have been realized,) of £346,284, to have been reimbursed in specie, which appears not to have been included in the value of the imports ; the average price of Wheat, in that year, was 42s. 4d. With the year 1622 a higher range of prices commenced, which seem to have continued down to 1660, the average of the period having been about 50s. and the extremes 85s. in 1648, and 26s. in 1654. An increased supply of money about the commencement of this period seems to have prevailed ; as in 1624, the rate of interest was reduced to 8 per cent., having been at 10 per cent. per annum, previous to that date ; and in 1625, the Plague is stated to have carried off 35,417 of the inhabitants of London. In 1641 the Long Parliament commenced its sittings, in which year the Windsor price of Wheat is stated at 48s., and for the four following years 1642—1645, no price is quoted. In 1646 the price is again quoted at 48s., but the annual average of the five following years, 1647—1651, was 77s. 6d. How far the internal commotions of this period tended, either to cause no quotation of prices during the years 1642—1645 ; or the high quotations during those of 1647—1651, must be left to conjecture. Charles I. was decapitated in January of the latter year ; and the annual average of the six years 1652—1657 was only 39s. per Quarter, although the rate of interest on money had further been reduced in 1650 to 6 per cent. per annum ; the quotations for the years 1658, 1659, 1660, are respectively 65s. 66s. and 50s. 6d. On the 8th of May, in the latter year, the monarchy was again restored in the person of Charles II. ; *and one of the first acts of the legislature, subsequent to the Restoration, was, to sanction a compromise between the monopolists of the land and the regal sovereignty, by relieving the occupants, or possessors of the soil, from wardships, purveyance, and other exactions, to which it had been subject up to that time, for (with the exception of ship money) the exclusive support of the crown, and levying the taxes on beer, and other commodities, being, in fact, the foundation of the system of Excise ;* a change in the mode of levying taxes, which would be less objectionable had the crown reserved to itself the power of controlling the rent of the land.

53. Another act of the first year of the Restoration of monarchy (in 1660), historically recorded as the 12th Car. 2, c. 4, was to permit the export of Corn whenever the price of Wheat did not exceed 40s. per Quarter, and that of other Grain in proportion, and in 1663, 15 Car. 2 c. 7, the permission to export was extended from 40s. to 48s. per Quarter for Wheat, and other grain in proportion. Section 4 of the same Act prohibited the buying of Corn to sell again, and the laying it up in granaries, when the several sorts of grain were at or above certain prices ; and by another Act of the same year, cap. 13, the privilege of exporting was extended, without any reference to price, on payment of a duty on export of 1s. per Quarter on Wheat, 4d. per Quarter on Oats,

and 6d. on all other Grain; and by the same Act, corn was allowed to be imported, when the price of Wheat did not exceed 48s. per Quarter, at a duty of 5s. 4d. per Quarter on Wheat, 4s. per Quarter on Rye, Pease, and Beans, 2s. 8d. per Quarter on Barley and Malt, and 1s. 4d. on Oats. The average prices of Wheat in the Windsor market, in each of the four years 1660—1663, was as follows, viz.: 1660, 56s. 6d.; 1661, 70s.; 1662, 74s.; 1663, 57s.; by which it would appear, that the Acts here specified were passed more as *pro forma* proceedings, than for practical purposes. The annual average of the seven following years 1664—1670, was 41s., the extremes having been 49s. 4d. in 1665, and 36s. in 1666-7; the year 1665 is memorable for the last great Plague, which carried off 68,596 of the Inhabitants of the Metropolis, *(see p. 68 of my Display of the Mortality and Diseases of the Metropolis,)* before referred to in section 44; and the year 1666 is equally memorable for the great fire in London. In 1659 the revenue of the protectorate was £1,868,717, and in 1665 that of the monarchy had been increased to £2,477,500. In 1670, by the Act of 22 Car. 2. c. 13, the duty on Wheat imported, was increased as follows, viz.:

to 16s. per Quarter,	⎫	when the price did not	⎧	53s. 4d. per Quarter,
8s.	⎭	exceed	⎩	80s.
and 5s. 4d.		when it exceeded		80s.

the average prices during the three years 1671-3 were respectively 42s., 41s., and 46s. 8d. In 1674-5, 68s. 8d. and 64s. 8d. In 1676-7, 38s. and 42s.; and in 1678-9, 59s. and 60s.; the average of the 6 years 1680-5 was 44s. 4d., the extremes having been 46s. 8d. and 40s.: and in the four years, 1686-9, the price was as follows, viz.: 1686, 34s.; 1687, 25s. 2d.; 1688, 46s.; 1689, 30s. These prices appear to have led to further legislative expedients to obtain higher rates, and in 1689, was passed the memorable Act of the 1st of William and Mary, allowing a *bounty* of 5s. per Quarter on Wheat exported, as long as the price remained at or below 18s. per Quarter; in that and the following year the price remained at 34s. 8d.; in 1692 it attained 46s. 8d.; and in 1693, 67s. 8d.; the annual average of the seven years 1693-9, was 64s., the extremes having been 53s. in 1695, and 71s. in the following year. In 4699, an Act was passed to prohibit the exportation and suspend the bounties for one year.

54. Pages 88 and 89 of my Display of the Finances, Navigation, and Commerce of the United Kingdom, before referred to in section 50, not only exhibit the price per Bushel (of 9 Gallons) of the best Wheat and Malt in the Windsor market, at Lady-day and Michaelmas in each of the 121 years 1700—1820,—the price of the Quartern Loaf in London at the commencement of each Mayoralty in each of the 80 years 1735—1814, when the Assize was abolished,—but also the quantities of each kind of Grain exported and imported in each of those years. The large exportation in 1706 appears to have been occasioned entirely by the abundance of the Harvest, the season having been remarkably favorable; and from the low money price the exportation would appear to have been forced, rather than to have resulted from demand: three years afterwards, however, the reverse was the case; an exceedingly cold and humid season not only in England, but more especially in France, gave rise to such an extensive demand for export to that country, as to more than treble the money price, and which led, in 1710, to the exportation from England being prohibited one year. No such extreme in money price again took place until 1796, when £25,000,000 of Exchequer, Navy, and Victualling bills, (being nearly treble the amount in circulation on an average of years previous to the declaration of war in 1793,) first laid the foundation of that artificial and fluctuating course of money prices which has tended to demoralise and pauperise three-fourths of the British people, and which now portends the speedy annihilation of all social order through the British dominions. A somewhat high and irregular order of prices, as well as irregular extent of export, followed for eight or ten years subsequent to 1710, and for five or six more years the prices somewhat declined, until 1725-26, when the demand for export, or some other cause which has not been satisfactorily explained, led to some advance; and in 1728-29, for the first time after the passing of the Act of 1688, the quantity of Grain imported exceeded the quantity exported. In 1728 an act was passed to regulate the price of imported Corn; and in the following year another act was passed to amend the preceding.

55. During the ten years 1730-9, although the extent of export was irregular, the prices will be seen to have been moderate and equable; a very severe winter in 1739-40, followed by an unfavorable harvest, occasioned a considerable rise in price in that and the following year; and by Acts 14 Geo. II. c. 2 and 7, exportation was prohibited with a discretionary power in the king to remove the prohibition. The seasons of the ten years 1742—1751 appear to have been exceedingly favorable, and the export during the three last years of that period, unusually great. Notwithstanding which, the average price of the ten years, in the London market, did not exceed 22s. to 26s. per Quarter, the minimum having been 18s. to 20s. only in 1754. A considerable advance in price took place in 1752, and the export, although much less than in either of the three preceding years, was very considerable. In the four following years, 1753-56, although the price gradually receded to the level of the ten years 1742-51, the complaints of the people were loud and general against what they then called a high price for provisions; and at Christmas, 1756, the exportation was again prohibited by Act 30, Geo. II. c. 1, and continued by subsequent Acts in 1757-8, and 9; in the latter year the prohibition was removed; and in the years 1757-8 a partial supply of Wheat was imported; yet the price gradually rose in the London market from 22s. to 26s. per Quarter, in June 1756, to 67s. to 72s. in June 1757; from which price it gradually receded to about 24s. in 1761,

when the export again became very considerable; and which continued during the three following years, with an advance in price of from 10s. to 15s. per Quarter, when both the export and the price became again a subject of general complaint.

56. With the year 1765 there commenced a succession of precarious harvests, and from which date a new era in the trade in Corn may be considered as having commenced, and a permanently higher range of prices established; the exportation was prohibited from year to year, until 1774, and foreign Grain admitted duty free. In 1767 an embargo was laid on all Grain destined for exportation, and Wheat prohibited being used in the distilleries. From 1765 down to 1796, the importation and exportation, by the statement at page 89, will be seen to have been very irregular: notwithstanding which, no very marked variation in price seems to have taken place. In 1774, by the Act of 13 Geo. III. c. 43, the preamble of which stated, "that the several acts previously made concerning the duties and bounties on the importation and exportation of Corn, had greatly tended to the *advancement of tillage and navigation*; yet, nevertheless, as it had of previous years, been found necessary, on account of the small quantity of Corn on hand, and of the shortness of the crops, to suspend the operation of those laws by *temporary* statutes, it was desirable that a *permanent* law should be passed, to render such *temporary expedients* unnecessary;" consequently, the high duties enacted in 1670, (see section 12,) were repealed, and whenever the prices of British Corn at the *port of importation*, should be at or above the following prices, viz.

Wheat - - - -	48s.	they should respectively be admitted at duties per Quarter of	6d.
Rye, Peas, and Beans -	32s.		3d.
Barley, Bear, or Bigg -	24s.		2d.
Oats - - - -	16s.		2d.

and Wheat Flour at 2d. per cwt., and the exportation of all the several kinds of Grain remain prohibited, as well as Meal, Flour, Malt, Bread, and Biscuit made therefrom, when British Corn at the port of exportation, was at or above the following prices, viz.

Wheat - - - -	44s.	and when under these rates to be entitled to a bounty per Quarter of	5s.
Rye, Peas, and Beans -	28s.		3s.
Barley, Bear, or Bigg -	22s.		2s. 6d.
Oats - - - -	14s.		2s.

Under this Act, in the five years, 1774-78, the importation was considerable, and in the next four years there was again an excess *exported*, although in 1781, by Act of 21 Geo. III. c. 81, the payment of bounty on the exportation of Wheat was *suspended* for a limited time. An unfavourable harvest in 1782 led to a great importation in the following year; and although in the nine following years the import and export of Wheat was very irregular, the importation of Oats continued progressively to increase; and in addition to the quantities imported, as exhibited in the statement at page 89, there was occasionally considerable quantities of Rye imported; viz. in the two years 1767-68, 123,600 Quarters; in the two years 1774-75, 75,000 Quarters; in the three years 1783-85, 134,800 Quarters; and in the seven years 1789-95, an average of 31,000 Quarters per annum; and in 1796, 163,650 Quarters.

57. Notwithstanding the pretended *permanency* of the Act of 1776, independent of the temporary violation in 1781, other temporary enactments were passed in 1789, 1790, and in 1791. By the Act of 31 Geo. III. c. 30, the Act of 1774 was wholly *repealed*, and whenever the *district* price of Wheat at the port of importation was under 50s. per Quarter, it was to be subject to a duty of 24s. 3d.; and if at or above 50s., but under 54s. per Quarter, a duty of 2s. 6d.; other Grain in proportion. Bounties allowed on the export on the same terms as under the former Act; but by Order in Council of the 9th November, 1792, exportation was prohibited; this brings the history of the operations and Legislative interference in Corn down to the commencement of the war in 1793, and as such it will not be irrelevant to take a retrospective view of the variation in the money price of Grain through a period of nearly eight centuries, with reference to the three leading causes usually assigned as tending to produce such variation, (see section 34); viz. 1st, an influx, and consequent depreciation of money; 2nd, extremely favourable, or unfavourable seasons; and, 3rd internal commotion, or external war. That all these circumstances have each in themselves a tendency to produce a variation in the money price of all commodities of great and general consumption, and more particularly so of Grain to a certain extent, cannot be questioned; but on a close investigation either of the details of variations in price exhibited in the preceding pages, the Eton prices of Wheat and Malt, and the London price of the Quartern Loaf, as exhibited at pages 88, 89, or the more circumstantial detail of average prices in each year since 1800; it will prove, that the same effects have not resulted from the same causes in any thing like relative degrees in any two instances; and in some cases a converse effect has resulted from similar causes; more especially so under those of changes in the circulating medium, and of war or peace. The inferences deducible, therefore, from these facts are, that all which has hitherto been said or written on the subject of an external trade in Corn, and the fluctuation in its money price, has fallen far short of a fair elucidation thereof; and that the just principles of Legislation, and the just relations of society, as far as such fluctuations are concerned, are but very imperfectly understood.

58. In looking at what appears to have been the feelings of the people, in relation to the money price of Grain at different periods, it will be important to take into consideration the situation and condition of the country, with reference to its means of transit by canals and roads. It was not till towards the close of the 18th century, that these important sinews of empire became efficient in tending to produce an equilibrium in the money price of staple commodities, over all the several parts of the kingdom; hence it may have been, that neither the price of the Quartern Loaf in London, nor the Eton prices of Wheat and Malt, at the periods when loud and general complaints of dearness or scarcity of food are stated to have prevailed, afford any just criterion for the cause of those complaints. In 1753, for instance, eight persons are represented to have been killed at Leeds in suppressing a riot, which the high price and scarcity of provision had occasioned, while the Eton and London prices of that year, compared with former periods, do not seem to have justified any violent measures for their modification. The complaint, therefore, had probably other grounds of justification, such as an inadequate remuneration for labour, or probably a disproportionately high price in that part of England, compared with the prices in other parts of the country, arising from local circumstances; and it will be proper to understand, that the prices at Windsor, as recorded at Eton College, have not been selected as intending to represent any thing like a fair average price of Grain throughout the country, but that they were the only, or the most authentic series of prices, that could be obtained for so long a period back; their authenticity being deserving of reliance, in consequence of their being the prices at which the rents of part of the College lands were regulated and discharged, being let pursuant to the grant of the testator, at a Corn-rent. The variation in the relative prices of Wheat and Malt, at different periods, is a feature in the list that will be found deserving of attention.

59. England, subsequent to the French Revolution, which led to a declaration of war on the part of England against the French people, in 1793, assumed a position in social polity so novel and extraordinary, as to render all the ordinary modes of inquiry and elucidation of her relations, either internal or external, inapplicable to the purpose. Among the causes which accelerated that memorable event, the French Revolution, was the clamour for bread on the part of the populace of Paris, in 1792, in which year, by the statement at page 89 of the Statistical Display before referred to, it will be seen, a larger export of Wheat from England took place, than for near thirty years previous; whilst in the following year, a very considerable importation will be seen to have occurred, but without any marked variation of price, through either of the two years. It was immediately after the declaration of war against France, on the part of the British Government, in February, 1793, that Great Britain resorted to the equivocal *expedient* of endeavouring to aggravate the calamities of the French people, by not only prohibiting the exportation of Grain from England to France, but to intercept the supplies directed to that country from all other parts of the world; and it was this interference, and not any necessity, that occasioned the importation into England in 1793: and such an additional supply, uncalled for by any necessity, would doubtless have had a powerful effect in depressing the money price, had not the Government carried their experiment still farther, by creating a paper money representation, wherewith to become the purchasers, and thereby to sustain the then money price. This year's transaction, whilst it tended to excite the still further creation of paper money, until in 1796 it had amounted to no less a sum than £25,000,000, as previously stated in section 54, involved the Government in the new, and politically equivocal character, of the most extensive Corn Jobbers in the world. The measure, as soon as it was known through the country, became a subject of general reprehension; but the difficulty which the Government had in extricating themselves from the dilemma into which the transaction involved them, may in some measure be inferred from the fact of one of their agents, Mr. *Claude Scott*, since created a Baronet, only having, on the 18th of March, 1810, delivered in an account to the amount of £1,778,728. 19s. 5d. for the produce of Corn, Flour, and sundry other articles, received and sold on account of the Government, between the 2nd of August, 1793, and the 29th of January, 1806, and which account was not finally settled until the year 1819.

60. In 1795 another experiment was resorted to, which had a powerful tendency to support the foundation of that inordinately high money price, of which the enormous amount of Exchequer, Navy, and Victualling Bills in circulation at this time, may be regarded as the basis. In that year an Act was passed, granting a bounty of 16s. to 20s. per Quarter (according to quality) on Wheat, till the quantity imported should amount to 900,000 Quarters, from the south of Europe and America; and from 12s. to 15s. per Quarter, from the contiguous parts of Europe, till the quantity should amount to another 500,000 Quarters, and from 8s. to 10s. per Quarter on any additional quantity that might be imported up to the 30th Sept. 1796. The amount paid for bounty up to this date was £573,418. (See the quantity imported in the latter year, page 89; and compare the rate of bounty with the prices at the different Corn-markets of Europe, page 99). In 1797 all Gaain was admitted free of duty. In 1798, Wheat at a duty of 2s. 6d. per Quarter, in the following year at a duty of 6d., until October, when it was again admitted free of duty; and in 1800, a bounty was again resorted to, at a graduated scale, according to the average price; and in the spring of 1801, notwithstanding the vast importation in that and the previous year, Wheat of the finest quality in the London market attained the enormous price of 180s. per Quarter, and the Quartern Loaf for four weeks 22½d., and all articles of subsistence attained a corresponding price; (compare this with the price in 1340, section 40). The amount paid for bounty in the years 1800, 1801, and 1802 amounted to £2,135,678. This may be considered the period of a confirmation of that artificial and fluctuating order of money prices which the Government Bills of 1794, 1795,

high bounties of 1796, and the Bank-note system of 1798 tended to establish; and which, in addition to the inordinate extent of state and local taxation which it has occasioned, has also led to a rent-tax, both for land and houses, without any parallel, in the ratio of its extent and pressure, on the productive energies of the country.

61. An additional incentive to high money prices for grain, grew out of the high prices of 1800 and 1801; in the latter year an act was passed *"for the better cultivation of arable land, wastes, &c.;"* this, in conjunction with the prevailing high prices which had given rise to it, led to very extensive loans and advances of money on the security of land, in the way of mortgages; and thus, money-lenders, lawyers, and others, all became partizans to, and advocates for, high money prices, as necessary to sustain *high rents*, as the means of paying the interest on loans and mortgages;—(for the increased number of inclosure bills consequent on these incitements, see page 175 of Display of Finances, &c.): comparatively low prices having prevailed for three successive years subsequent to 1801, another Act was passed 15th of November, 1804, 44 Geo. III. c. 109, extending the price below which Wheat should not be imported at a less duty than 24s. 3d. per Quarter from 50s. (the limit assigned by the Act of 1791) to 63s., and a duty of 2s. 6d. if at or above 63s. but under 66s., above which price it was to be subject to a duty of only 6d, per Quarter: all other Grain in proportion. Bounties the same as per Act of 1791, to be paid on export when Wheat was at, or under 48s., and the export prohibited when the price was above 54s. From the 16th of July, 1806, by Act of 46 Geo. III. c. 97, the free interchange of every species of Grain was allowed between Great Britain and Ireland, subject only to the regulations attaching to goods removed coastways; Grain imported into Great Britain from Ireland, having previously been subject to the same rates as that imported from British colonies in North America: these Acts continued in force up to the termination of the war in 1814, when the Landed Proprietors again took alarm, and by the Act of 55 Geo. III. c. 26, obtained the entire *prohibition* of importation of all Grain for Home consumption, until the price of British Wheat was at or above 80s. per Quarter, except from British Colonies in North America, from whence it was admitted when the price was at, or above 67s.; an unexampled unfavourable harvest in 1816, tended to render the effect of this Act imperceptible; but the consequence of that exceedingly unfavourable harvest had no sooner subsided, than all the productive interests and labour of the country became a second time, (since the termination of the War,) involved in the extreme of depression and derangement, and by the year 1822, the inefficacy of the Act became too apparent to be longer persisted in, and in that year the Act of 3 Geo. IV. c. 60, was passed, modifying the Act of 1815, as exhibited in detail in the Statistical Display of the Finances, &c.

62. It will be seen, however, on reference to the statement of imports, at pages 104 and 105, that the Act of 3 Geo. IV. c. 60, was nugatory or tantamount to a prohibition during the three years 1822—1824; but a considerable quantity of Grain imported, under the Act of 1815 (55 Geo. III. c. 26), remaining warehoused, an Act was passed in the Session of 1825, 6 Geo. IV. c. 65, allowing all Corn, Grain, or Flour, warehoused prior to the 15th of May, 1822, to be taken out for Home consumption between the 15th of June and 15th of August, 1825, on payment of modified duties; (it is here desirable to understand, that Corn, Grain, and Flour, was not prohibited being imported for re-exportation, under any of the Acts since 1660). By another Act of the same Session, c. 64., Wheat was allowed to be imported from Canada, at a duty of 5s. per quarter, under which Act about 55,000 Quarters were imported. For the aggregate extent of the operations under the Acts of 1825, see statement, page 104; by which it will also be seen, that either in anticipation of some further modification of the law, or such enhancement of price as would render it admissible for consumption, a considerable quantity of Wheat and other Grain was imported in that year; the price, however, receded instead of advancing; but the wide-spread misery resulting from the periodical revulsion which commenced at the close of the year 1825, led to another Act in 1826, (7 Geo. IV. c. 70), permitting all Corn, Grain, or Flour, warehoused prior to the 2d of May in that year, to be entered for Home consumption at the following rates of duties, to which the quantities of each kind of Grain, entered for consumption in 1826, up to the 30th of November, were as follow, viz.: Wheat, 285,645 Quarters at 12s. per Quarter; Barley, 333,558 Quarters at 6s. per Quarter; Oats, 1,019,419 Quarters at 4s. per Quarter; Beans, Peas, and Rye, 191,209 Quarters at 8s. per Quarter. The spring and summer of 1826, proving remarkably arid, the Corn crops, but more especially the spring crops, indicated a general scarcity; to provide for the exigencies of which, another Act was passed, Cap. 71, authorizing the king, by order in council, to admit, for Home consumption, any quantity of Wheat, not exceeding 500,000 Quarters, at such a rate of duty as might be deemed desirable: this statute, however, was not acted upon in regard to Wheat; but the price of Oats and other Grain having attained a price which rendered them admissible, even under the Act of 1815, an order of council was issued on the first of September, admitting Oats at a duty of 2s. per Quarter, and Rye, Peas, and Beans, at 3s. 6d. per Quarter. The quantity entered for consumption in all the ports of Great Britain, under such order, between the first of September and the 30th of November, was 682,484 Quarters of Oats, and 126,235 Quarters of Beans, Pease, and Rye; and the statement, page 167, shows that the importation into the port of London, subsequent to the 30th of November, up to the close of the year, was unprecedentedly great, whilst the supply of British and Irish Oats will be seen to have been as unprecedentedly limited. Such is the history of the legislative enactments, variation in price, and commercial extent of the external trade in corn, between Great Britain and other parts of

the world, up to the close of the year 1834. Page 206 of the *Display of the Finances, &c.*, shows the Weekly average price of Wheat, Barley, Oats, and Sugar, in each of the years 1822—1833.

63. The events which have followed the memorable period of 1793; the progressively increasing privation and degradation of a great portion of the population, amid a progressive accumulation of Capital; ascendency of money influence, and consequent display of luxury; an unparalleled extension of mechanical power, and increased facility of intercourse; successive alternations of seeming prosperity and extreme depression; progressively increasing pauperism and its concomitant crime; and threatened change of long-established Institutions; are all circumstances which call imperiously for the most profound consideration and regard, of all the friends of social order, and integrity of interests. The relation, influence, and effect, of each of these great and prominent features of British Society, and their combined influence and effect on the interests of the social world at large, will be elucidated in another place.

J. MARSHALL.

London, January, 1835.

*** The convenience of the accompanying Statistical Details, may, in some degree be inferred, when it is stated that, the Area, Annual Value of Property, Maintenance of Poor, and Population, have been collated from Five different returns, forming Six Folio Volumes. The return of the Maintenance of the Poor, in the three years 1813—1815, as given in the District Arrangement, having become scarce, gives an additional interest to that part of the Work. The *Taxatio Ecclesiastica*, from which the Valuation of the Benefices in the six Northern Counties, in 1291 and 1317, was taken, is one of the Old Records, upon the collation and re-printing of which, upwards of £175,000 has been expended since 1800, in addition to nearly £2,500,000 for the printing of other Papers for the public service; (see page 174 of my Display of the Finances, &c.): the *Taxatio Ecclesiastica* is one of the most valuable of the whole collection of Records, but interesting as it is in itself, its interest is increased in a ten-fold degree by the comparative position in which it is placed at pages 246—255. Independent of the labour and pains-taking requisite to bring the results of five different returns of 16,000 places into one point of view; that of determining the locality and relation of each place, involved still greater labour and perplexity; and should any one be disposed to not duly appreciate the accompanying Statistical Display, no greater resentment will be indulged in, than to wish that they might be forced to a hundredth part only of the toil which it has occasioned.

The very nature of the Ecclesiastical Revenue of England, derived as it is from Glebes and Fees, as well as Tithes, precludes the possibility of any very accurate conclusion being arrived at, respecting its amount. In the parishes exclusively Agricultural, it may be estimated at 6 to 7 per cent on the Annual Value of the Real Property as returned in 1815; while in the towns it is liable to great change; take *Paddington* as another example to those offered in section 23; this parish, which in 1291, appears in the *Taxatio Ecclesiastica*, page 17, as follows, viz.: "*Ecclia Sce Margarete cu Capella de Padinton*, £20;" and "*Vicaria ejusdem* £8," in the Valor Ecclesiasticus of 1535, is returned as not in charge; on reference to Paddington in its place in the Alphabetical Arrangement, its population will be seen to have increased to 14,540 in 1831, from only 1881 in 1801; and on reference to page 10 of my "Statistical Display of the Mortality, Diseases, &c., of the Metropolis,", it will be seen that the Rateable Property of the parish in 1829, was £73,949; which in 1815 was only £24,712;—it will also be seen, that the Bishop of London is the Patron of the Benefice; he is also the impropriator of its Revenue, which in 1834 is estimated to yield from £12,000 to £15,000 per annum, from Ground Rents of a part of the Glebe, consequent on the extension of the Metropolis in the direction of that parish, the Benefice of which in 1291, was valued at only £48.

Statistical Details of all the Towns and Populous Parishes of England and Wales, arranged in Districts, with the view of enabling the proportion of the Population engaged in, or dependant upon each great branch of Production or Occupation for Subsistence, being arrived at, as exhibited on the following page . . . . . 9—74

II. A similar, but more complete Statistical Display of the Metropolitan and Contiguous Counties of Surrey, Kent, and Sussex . . 76—90

III. A Statistical Display, in which is exhibited the Superfices in Statute Acres; Annual Value of Real Property, according to the Property Tax Returns of 1815; the Amount expended for the Maintenance of the Poor, in the year ending the 25th of March, 1829; and the Total Number of Persons at each of the four periods of 1801, 1811, 1821, and 1831, in every County, Hundred, Division, City, Town, Parish, Chapelry, Hamlet, Tithing, Liberty, and extra Parochial Place in England, which made a separate return of Population in 1831, distinguishing the Rectories, Vicarages, and Perpetual Curacies; arranged Alphabetically, whereby it serves as an Index to the preceding District Arrangements . . . . . 91—192

IV. An Alphabetical arrangement of 1257 Villages, Townships, Hamlets, Liberties, Extra Parochial Places, and other Localities in England; the Area, Annual Value, and Population of which are included, with the Parishes in which they are respectively situated . . . . 193—196

V. An Account of the Annual Value of Real Property, as Assessed to the Property Tax in 1815; Amount expended for the Maintenance of the Poor for the year ending the 25th of March, 1829, and the Total Number of Persons at each of the four periods 1801, 1811, 1821, and 1831, in every County, Hundred, Town, Parish, Chapelry, Hamlet, &c., &c., in the Principality of Wales . . . . 197—206

VI. A District Arrangement of 970 Parishes, &c., of Scotland; showing the Locality and Relation of each Parish, together with the Superfices of each, either in Statute Acres, or in length and breadth; the number of Inhabited Houses in each in 1801, and 1821, and the number of Families in each, at the latter period, showing the proportion returned to Parliament as being employed in Agriculture, distinct from those employed in Trade, Manufactures, or Handicraft, and those not included under either of the two preceding heads; with Notes, Topographical and Historical . . . . . 207—230

VII. An Account of the Annual Value of Real Property, as Assessed to the Property Tax in 1815; and the Total Number of Persons in 1755, and 1798, and as returned to Parliament at each of the four periods of 1801, 1811, 1821, and 1831, in every County, District, City, Borough, Town, and Parish of Scotland; arranged Alphabetically as an Index to the preceding District Arrangement . . . . 231—238

VIII. A Comparative View of Agricultural Parishes and Districts exhibiting the inordinate disproportion in the pressure of Parochial Assessments and Tithes 239, 240

IX. An Alphabetical Arrangement of 340 Parishes and Districts, comprising the greater portion of the Heaths, Moors, Wolds or Downs, and Forests of England, showing the Area, Annual Value, Condition, Population, and Agricultural force of each 241, 242

X. A Compendious View of the Extent and Revenues of the Church Establishment, and of the other Religious and Charitable Institutions in each County of England and Wales, contrasted with those of Scotland, France, the Netherlands, Spain, &c, in detail, as follows, viz.:—

Numbers educated by the National and Sabbath Unions, and the British and Foreign School Society; Amount of Charitable Bequests at the disposal of the Parochial Officers; Income of Endowed Public Charters; of Deposits in Savings' Banks; and of Voluntary Contributions in aid of the British and Foreign Bible Society, and of the Church, London, Baptist, and Wesleyan Missionary Societies, in each County of England and Wales 243

A Comparative View of the Area in square miles, the Number of Parishes, Parish Registers, and Population Returns; Parochial Benefices, distinguishing Rectories, Vicarages, and Perpetual Curacies, and the proportion of each in the Patronage of the Lord Chancellor, and of each of Ten Denominations of Dissenting Congregations in each County of England and Wales 244

A Statistical View of the extent of the Jurisdiction of each of the 26 Ecclesiastical Dioceses of England and Wales, showing, first, the Number of Parishes, and Number of Churches and Chapels within each Diocese, and the proportion in each of the Counties into which the several Dioceses extend; secondly, the Rated Value of each See in the liber regis of 26 Henry VIII. Total number of Parishes, and of Churches and Chapels within each Diocese, and the proportion in the Patronage of the Diocesan and Dignitaries of their respective Cathedrals, distinguishing the proportion of Rectories, Vicarages, Perpetual Curacies, and also the Number of Benefices in the Patronage of the King, the Lord Chancellor, the Chancellor of the Duchy of Lancaster, in the Heads of Colleges and Halls of the two Universities of Oxford and Cambridge, and the Dignitaries of sundry Collegiate Churches . 245

Statistical Display of each of the Parochial Benefices, distinguishing the Rectories, Vicarages, and Perpetual Curacies, showing the Valuation of each Benefice in the time of Pope Nicholas in 1291 and in 1317, and in the time of Henry VIII. [1535]; compared with the extent, Annual Value, Population, Condition, and Agricultural force of each Parish in 1831, in each of the undermentioned Northern Counties, viz.:

91	Parochial Benefices and	46	Perpetual Curacies in	Cheshire .	246, 247
68	ditto	196	ditto	Lancashire	248, 249
76	ditto	35	ditto	Durham .	250-252

32	ditto	36	ditto	Westmoreland	253
102	ditto	31	ditto	Cumberland	254, 255

XI. A Summary View of the Extent, Resource, Population, Occupation, and Condition, of the several Manufacturing, Metropolitan, and Agricultural Districts of the United Kingdom 256, 258

XII. Conclusions, Expository and Demonstrative, deduced from the foregoing and following series of Statistical Details.

SUMMARY of the 82 Pages 9 – 90, shewing the proportion of the POPULATION of GREAT BRITAIN; engaged in, and dependant on, each great branch of PRODUCTION and OCCUPATION.

The first Lord Ellenborough in his place in parliament once stated that there were upwards of 3,000,000 Persons in Great Britain, engaged in, and dependant on the Woolen Manufacture; the Edinburgh Review more recently asserted, that upwards of 1,000,000 Persons were so occupied and dependant; from the Statement below, it will be seen to be doubtful, whether in all its varied operations, more than 250,000 (certainly not 300,000) Persons, are engaged in, or dependant on that branch of industry:—similarly mistaken notions almost universally prevail, in regard to the greater or lesser extent and importance of each great branch of Production and occupation: in a work entitled "*Results of Machinery,*" published in 1831, under the superintendance of the Society for the *Diffusion of Useful Knowledge*, it is stated that "in consequence of Machinery having rendered productions of all sorts cheaper, and therefore causing them to be more universally purchased, it has really increased the demand for manual inbour," and in support of this assumption, at page 93, it is asserted that "Richard Arkwright, a barber of Preston, invented in 1769, the principal part of the Machinery for spinning Cotton, and by so doing, he gave bread to about two millions† of People, instead of fifty thousand;" and at page 106, in adverting to the Silk Manufacture, it is further asserted that "the higher pride of the present day, is, that we buy three millions and a half pounds of Raw Silk from the Stranger, employ half a million† of our own people in the Manufacture of it, by the aid of Machinery, and sell it to the Stranger, and our own people at a price as low as that of the Calico of half a Century ago. *In refutation of the false assumption and equally false assertion here set forth, the attention of the advocates and friends of truth is directed to the Analysis of occupations below; at the period of 1769, and for 20 Years subsequent thereto, the habitations of Nos. 1-2 and 4-5, noted with an* were so many Manufacturing Establishments, earning on an average from 2l to 6l 6s Week, which earnings supplied the means of domestic comfort and tended to social and moral order;—the introduction of Machinery has concentrated the operation of Spinning with an imposing effect upon the minds of superficial thinkers, but it has annihilated the domestic operation, and deprived from 1,200,000 to 1,500,000 Families of the means of comfort, and substituted in the habitations of the Farmers, mawkish pretensions for appropriateness of manner; and in the cottages of the Labourer, recklessness of purpose for the social order which heretofore prevailed.—For the immoral effects which have followed the introduction of Machinery and destruction of domestic industry,—see the Statement relating to Crime, which shews a progressive increase from 4,263 in 1806, to 19,647, in 1831.*

	do. do. 1831.	*Army & Navy.*							

The following STATEMENT *shews the progressive increase of the Population in England, Wales, and Scotland, at each of the Six Ten Yearly Periods, since* 1780; *and the annexed Statement shews the estimated proportion of the Population in* 12 *Classes, instead of under three heads only, as exhibited in the return made to Parliament. Notwithstanding, the prevailing notion of Manufacturing, being the predominating interest of Great Britain; by these Analyses of the Population, it is seen, that five-sixths of the Number are dependant on Agriculture for subsistence.*

Years	Army & Ny.	England	Wales	Scotland	Great Britain	Ireland

STATISTICAL DETAILS OF ALL THE TOWNS AND POPULOUS PARISHES

OF

England and Wales,

ARRANGED IN DISTRICTS;

Showing the Population of each Place at each of the three Periods 1801, 1811, and 1821, distinguishing the proportion in 1801 and 1821, employed in AGRICULTURE, distinct from those returned as employed in TRADE, MANUFACTURES, or HANDICRAFT; and all others not included in the two preceding Classes: the Amount of the Estimates of the Annual Value of the REAL PROPERTY in each Parish or Place as assessed to the PROPERTY TAX in 1815; the Amount *Annually* expended for the RELIEF OF THE POOR in each place on an average of three Years at each of the two periods ending Easter 1815, and Easter 1824; the Number of Families *Annually* relieved in each Place, on an average of the three Years ending Easter 1815; the Number of Persons in FRIENDLY SOCIETIES in 1815; and the Amount of CHARITABLE BEQUESTS at the disposal of the Parochial Officers in each Town and Parish;—arranged in Districts, with the view of enabling the Proportion of the Population engaged in, or dependent upon, each great Branch of PRODUCTION or OCCUPATION for subsistence being fairly deduced, as exhibited on the preceding page.

(The Places not here enumerated are small Parishes, Villages, Hamlets or Townships, exclusively agricultural, as stated in line 25 of the preceding page.)

COAL-MINING DISTRICT OF DURHAM, NORTHUMBERLAND, AND CUMBERLAND.

In the Statement below the places are arranged in reference to their Topographical position enumerating at the North. *Bedlington* is an insulated part of the County of Durham in Northumberland 13 Miles N. E. of Newcastle, after South Shields the places are arranged in reference to their no ably shewing their distance *East, West, North, South, N. East, N. West, S. East and S. West* to their nearest Central or principal Town which is also all printed in *Small Capitals* with their distance in miles from London. The places noted by a † return two Members to Parliament

POPULATION, &c. &c. of the Coal and Iron Mining Districts in the Counties of *Gloucester, Somerset, Monmouth, Brecon & Glamorgan.* — *For remainder of Coal district see Nos.* 339–350

The very confused way in which the returns of Population, Poors Rates, &c. &c. have been made from Wales, the places sometimes being written in English and sometimes in Welsh and frequently inaccurate in both, has rendered it difficult to accurately define some of the places in this Statement, for instance Mountyhoslen (No. 190), in some of the returns is written in Welch Mynyddyslyn and comprises 3 Hamlets *Viz.* Glanypiwyf, Mynyddmaen,Rod Penmain. Bedwlty also comprises 3 Hamlets, *Viz.* Blaenwrod, Manhoie, and Ychlwrycoed, and Merthyr-Tydvil (No. 198) comprises 6 Hamlets, Viz. Forest, Garth, Gelliderj, Heolyrerwood, Tuf, and Cyfoin; the utmost pains have been taken to render further explanation unnecessary.

			No. of *Persons* in 1801					Number of *Families* in 1821							*No. of Families relieved permanently*			Number of Persons in Friendly Societies	Amount of Charitable Bequests at the disposal of the Parochial Officers

TOPOGRAPHICAL POSITION, POPULATION, &c. &c. of various Places, which concludes the specification of the Mining Districts, as far as Mining predominates; COALS are produced in great abundance in the Vicinity of COVENTRY, and over a great part of the Manufacturing Districts of LANCASHIRE, and the West Riding of YORKSHIRE, and in SCOTLAND, but the predominance of the Manufacturing Interest in those districts renders the Mines of secondary importance, they will be noted as far as practicable in the elucidation of the Districts mentioned.

, Continuation of the *Topographical Position, Population &c. &c.*, of the TIN and COPPER mining districts of CORNWALL, of Beeralstone Devonshire, of Glamorgan, and Carnarvonshires, and the Isle of Anglesea. Nos. 315 - 333, comprise the principal LEAD Mines, those of Aldstone-moor and Garrigill, No. 317 (contiguous to Allendale) form part of the Revenue of *Greenwich Hospital*, (see page) Wanlock Head contiguous to Lead Hills, is in the Parish of Sanquhar and made no separate return till 1821, Lead Hills are in the Parish of Crawford and contain about 1000 Inh.

The following Statement exhibits at one point of view all the principal places in GREAT BRITAIN where the *Woollen Manufacture* is carried on, shewing the Population &c. &c. as in the preceding pages, the West Riding of York being exhibited in detail in the two following pages. Carpets are Manufactured at *Aberdeen, Bannockburn, Barnard Castle, Cirencester, Stourport, and Wilton*, and Blankets at *Witney* but not to any extent.— *Note below, that Nailsworth* (No. 363) *is part of the three parishes of Avening, Horsley, and Minchinhampton, and in* 1801, *and* 1811 *was returned with those parishes. Huntingford, and Wortley* (No. 367) *are in the parish of Wooton under Edge which includes also the Tythings or Hamlets of Sinwell and Bradley, and Symonds Hall and Coombe, all of which are comprised in the Numbers stated. Kingswood* (No. 368) *is an insulated part of Wiltshire within the County of Gloucester*

, *The Places below noted oy an *, are on the line of Road from London to Berkely; those by a +, on that from London to Frome and Wells; and those by a ‡, on another line of Road, diverging From the preceding at Deptford Inn, by Warminster, to Frome and Glastonbury. Calne and Chippenham, are on the direct line of Road from London, by Marlborough to Bath; from which Chippenham is distant* 13 *miles; 6 N. of Melksham; and* 13 *S. of Tetbury, by way of Malmesbury, distance* 9 *miles.*

The System of Parochial Assesment in England & Wales, does not extend to Scotland & Ireland, nor has any return in detail of Assesment of Property Tax in Scotland or Ireland been laid before Parliament

Topographical Position, Population, &c. &c. of Towns and Places in the *Manufacturing Districts* of the *West Riding* of Yorkshire, shewing the increase of Population, &c. &c. since 1801.

The distances in the following Statement are given from *Barnesley, Huddersfield, and Wakefield, respectively.* BARNESLEY, is the centre of a district in which the *Linen Manufacture* is pursued to a great extent, and has several *Iron Foundries* & Mills for the *Spinning of Wire*, it, with the 5 other places noted by a ‡ are in the Parish of *Silkstone*, where are some considerable Collieries. HUDDERSFIELD, is the centre of another district in which the *Woollen Manufacture* in most of its branches is carried on, and partially the *Cotton Manufacture.*

WAKEFIELD, is a Commercial, rather than a Manufacturing Town, it is a great Depot for *Wool, and Grain*, communicating Eastward with *Hull*, by the Aire and Calder Navigation, and Westward into the heart of the Manufacturing districts, by Canals to *Rochdale and Manchester*, Dewsbury, (No. 485,) is the centre of the Manufacture of Blankets, and such like Fabrics.

			Number of Inhabited Houses in 1801	No. of *Persons* in 1801				Total Number of Persons 1811	Number of Inhabited Houses in 1821	Number of *Families* in 1821			Total Number of Persons in 1821	Amount of the Estimates of the Annual Value of the real Property assessed to the Property Tax in 1815	Amount Annually Expended for the Maintenance of the Poor, as per Parliamentary Returns, at each of the periods, Lady Day, 1803, and three Years ending Easter, 1815		No. of Families relieved Occasionally			Number of Persons in Friendly Societies	Amount of Charitable Bequests at the disposal of the Parochial Officers
				Chiefly employed in Agriculture	do. in Trade Manufac. or Handicraft	all others not included in the preceding	TOTAL			Chiefly employed in Agriculture	do. in Trade Manufac. or Handicraft	all others not included in the pre.					out of Workhouse	in Workhouse	relieved occasionally

Topographical Position, Population, &c. &c. of the Manufac turing Districts, of the West Riding of Yorkshire.

TOPOGRAPHICAL POSITION, POPULATION &c. &c. of Towns and Places in the *Manufacturing Districts* of the *West Riding of* Yorkshire.— *Continued*

The Town and Liberty of LEEDS (No. 496) as exhibited below, comprises 10 out Chapelries. *Viz. Armley, Beeston, * and Bramley,* on the S. W. *Chapel-Allerton, and Potter-Newton* on the North *Farnley, and Headingly cum Burley* on the N. W., *Holbeck* E. by S., *Hunslet* or *Hunsford* S. by E., and *Wortley* S. E., these 10 Chapelries in 1821 contained 36,193 Inhabitants; the Chapelry of Beeston which in 1826 contained only 1670 Inhabitants is further subdivided into the 6 Townships of *Beeston Shaw, Colingley, Holt, New Hall, Parkside, Royds & Snicketlin.*

LEEDS is the chief Mart for Cloths both Broad, & Narrow, Fine, & Coarse ; *Halifax and Bradford* are more celebrated for the Manufacture of Worsted Stuffs of various kinds, the increase of Population of Bradford is remarkable

Coal, Iron, Slate, Rag, and Limestone abound over the greater portion of Country exhibited in this, the preceding, and following Statement.

				No. of Persons in 1801				Number of Families in 1821					Amount of the Estimates of the Assessed Taxes and Real Property as assessed to the Property Tax in 1815	Amount assessed, Expended for the Maintenance of Poor, on an average of three Years, at each of the Periods of three Years ending Easter 1815 and Easter 1824. The Canal which connects the W. Riding of Yorkshire with *Liverpool* extends in a N. W. direction from *Leeds* past Bingley, Morton, and Skipton to Gargrave see Nos 553, and 4, 565, and 572 ; from Gargrave it runs S by W. past Thornton, Barnoldswicke, & Cowling into Lancashire at Colne see No. 559, 564 and ... a Collateral cut from near Bingley extends to *Bradford* in No. 529. Halifax and Huddersfield communicate with Lancashire by two Canals to Manchester, one by Saddleworth, and Rochdale, and the other by Marsden, and Thong, see Nos. 640 648 to Ashton. *Ancrosborough* No. 591 is the centre of an extensive Linen Manufacture which extends Northward by Ripon to Darlington, and which prevails more or less over the greater part of the West Riding. From Bolton to Dent Nos. 41-580, and from Croft Bridge to Darlington Nos. 602-610 the Cotton Manufacture generally prevails.			No. of *Persons* in 1801.				Number of *Families* in 1821. County of LEICESTER

Topographical Position, Population, &c. &c. of Towns and Places in the Hosiery, and Frame Net Lace, and Cotton Manufacturing districts in the Counties of *Leicester, Stafford, and Derby.*

The same order of distinction of Towns is continued in this, and following, Statements as explained in the preceding Statement. LOUGHBOROUGH and DERBY are both on the Manchester Mail line of road: see head to preceding Statement. The former Town is confined to the Hosiery, and Frame Lace Manufactures, but Derby in addition to those features has an extensive Silk Mill, and from Derby the Cotton Manufacture commences. BURTON situated on the North Bank of the Trent is on a Cross line of road from Leicester through Ashby-de-la Zouch (see No. 114) from which it is distant 8 Miles, continued through Uttoxeter, and the Potteries (see Nos. 107 113) and Northwich to Warrington (see p. 23 Miles N. E. of Birmingham by way of Litchfield from which it is distant 11 Miles and 11 S. W. of Derby, and independent of its celebrity for its Ale Breweries it is also engaged in Cotton Spinning. In its Numbers are included the Townships of Branston, Burton-extra, Horninglow, and Stretton which comprised in 1821 2,037 of the Population. TAMWORTH is situated on the Chester Mail line of road 16 Miles N. W. of Hinckley see No. 711 through Atherstone from which it is distant 8 Miles, and the same distance S. E. of Litchfield. Its Numbers comprise the Township of Bolehall, Amington and Stone Delph, Bolehall and Glascote, and Syscote which comprise about 1,100 of the Inhab.; but the different Returns are made in a very confused way and not satisfactory.

								No. of *Persons* in 1801.					Number of *Families* in 1821.								*No. of Families relieved Persanently*

The River Ribble which rises in the W. Riding of Yorkshire at the foot of *Warnside* Mountain enters Lancashire a mile or two North of Chatburn & Downham see Nos. 1161 - 2 and runs about 20 miles in a direction W. S. W. into the Irish Sea below Preston. The Hundred of Blackburn lies principally S. of this river, but the places Nos.1112 to 1120 inclusive & 1165 are N. of the Ribble No 1120 being in the Hundred of Amounderness, and Chaigley or Chargley and Nos. 1115 - 16 & 1165 lie N. of Longridge Fell between it and Bleasdale Moors 10 to 14 miles N. of Blackburn.

Nos. 1098 - 9 though in Blackburn Parish are contiguous to Preston on the S. E. Aighton and Bailey No. 1114 are about 3 miles N. W. of Whalley. Fillyclose & New Laund Booth No. 1164 are 2 to 3 miles N. of Blackburn, and Reedley Hollows about 3 miles N. E. of do. The figures following the places in Blackburn Parish denote their distance from the Town of Blackburn, and those in Whalley Parish the distances from the Chief Towns with which they are circumscribed. Coal abounds over the greater part of this district which is intersected by the Leeds and Liverpool Canal past Livesay, Blackburn, Rishton, Clayton-le-Moors, Habergham Eaves, Burnley, Fillyclose, Marsden and Colne, entering Yorkshire at Foulridge.

The Parish of Blackburn *is bounded on the N. by Ribchester Parish, from which it extends to about 8 Miles S. by Abbey Village, the Calder, its medium breadth is about 5 miles, Tot. Pop. in* 1821 53,350. *The Town is 24 miles N. N. W. from Manchester, through Bolton from which it is 13 miles & 10 miles east Lc. of Preston.* 3 *W. by N. of Blackburn.*

The Parish of Whalley *is one of the most extensive in England comprising about* 200 *Square Miles of territory, Tot. Pop. in* 1821 43,198. *The Town which gives name to the Parish (see No. 1155) celebrated formerly for its richly endowed Abbey, is seated on the E. bank of the Calder, which is here crossed by a handsome Bridge of* 5 *Arches, and is 15 miles N. by W. of Manchester, 9 S. by W. of Clitheroe, 13 S. W. by W. of Burnley, 18 N. by W. of Blackburn, 8 S. W. by W. of Haslingden, 18 miles N. of Burnley, 10 S. W. by W. of Colne, 12 S. W. of Skipton (see No. 556) for the more immediate connection of Clitheroe with the Yorkshire Parishes see No. 1155 and for those of Haslingden with the Lancashire Parishes see No. 1121. Whalley is 31 miles due N. of Manchester by way of Burnley and Burnley from which latter it is distant 15 miles and 12 S. W. of Skipton (see No. 556) for the more immediate connection of Clitheroe with the Yorkshire Parishes see No. 1155 and for those of Haslingden with the Lancashire Parishes see No. 1121. Whalley is 31 miles due N. of Manchester by way of Burnley and Burnley from which latter it is distant 15 miles and 12 S. W. of Skipton (see No. 556) for the more immediate connection of Clitheroe with the Yorkshire Parishes see No. 1155 and for those of Haslingden with the Lancashire Parishes see No. 1121. Whalley is 31 miles due N. of Manchester by way of Burnley and Burnley from which latter it is distant 15 miles and 12 S. W. of Skipton (see No. 556) for the more immediate connection of Clitheroe with the Yorkshire Parishes see No. 1155 and for those of Haslingden with the Lancashire Parishes see No. 1121. Whalley is 31 miles due N. of Manchester by way of Burnley and Burnley from which latter it is distant 15 miles and 12 S. W. of Skipton (see No. 556) for the more immediate connection of Clitheroe with the Yorkshire Parishes see No. 1155 and for those of Haslingden with the Lancashire Parishes see No. 1121. Whalley is 31 miles due N. of Manchester by way of Burnley and Burnley from which latter it is distant 15 miles and 12 S. W. of Skipton (see No. 556) for the more immediate connection of Clitheroe with the Yorkshire Parishes see No. 1155 and for those of Haslingden with the Lancashire Parishes see No. 1121.*

Ribchester Parish

1091 Blackburn includes Darwin lower, Darwin upper, Eccleshill, Tockholes, Livesay, Pleasington, Walton-le-Dale, Cuerdale, Samlesbury, Witton or Wilton, Mellor, Balderstone, Osbaldestone, Ramsgreave, Little Harwood, Clayton-le-dale, Wilpshire, Salisbury, Dinkley, Billington, Harwood Gt., Rishton, Aighton, Bailey & Chaigely, Chipping, Thornley-cum-Wheatley, Ribchester, Dutton, Dilworth, Alston-cum-Hathersall

1121 Haslingden includes New Laund Booth, and Reedley-Hollows.

1155 Whalley includes Hewthorn, & Coalcoates.

1165 Little Mitton No. 7 includes the formerly celebrated Priory, Tot. Pop. in 1821 43,198. The Town which gives name to the Parish (see No. 1155) celebrated formerly for its richly endowed Abbey, is seated on the E. bank of the Calder, which is here crossed by a handsome Bridge of 5 Arches, and is 15 miles N. by W. of Manchester, 9 S. by W. of Clitheroe, 13 S. W. by W. of Burnley, 18 N. by W. of Blackburn, 8 S. W. by W. of Haslingden, 18 miles N. of Burnley, 10 S. W. by W. of Colne, 12 S. W. of Skipton (see No. 556) for the more immediate connection of Clitheroe with the Yorkshire Parishes see No. 1155 and for those of Haslingden with the Lancashire Parishes see No. 1121. Whalley is 31 miles due N. of Manchester by way of Burnley and Burnley from which latter it is distant 15 miles and 12 S. W. of Skipton (see No. 556) for the more immediate connection of Clitheroe with the Yorkshire Parishes see No. 1155 and for those of Haslingden with the Lancashire Parishes see No. 1121. Whalley is 31 miles due N. of Manchester by way of Burnley and Burnley from which latter it is distant 15 miles and 12 S. W. of Skipton (see No. 556) for the more immediate connection of Clitheroe with the Yorkshire Parishes see No. 1155 and for those of Haslingden with the Lancashire Parishes see No. 1121.

Topographical Position, Population, &c. &c. of Towns and places in the Cotton Manufacturing District of Lancashire.— *Continued.*

*** *These 75 Places with Nos. 1241 - 6 on the following Page conclude the exhibition of the Cotton Manufacturing District of England and Wales. The Places in Amounderness Hundred, N. of Preston are more engaged in the Linen than in the Cotton Manufacture, about 25,000 Cwts. of Foreign Flax being annually imported into Preston Poulton & Lancaster.*

see Note at Head

Coast of Hampshire, or Southampton

Isle of Wight

Read the preceding Note.— Hayling Island No. 148 lies off Havant. Portsea Island, No. 1449, lies off Portsmouth. Portsmouth Harbour, No. 1448, lies between Portsea and Gosport. Viz. Bedhampton, Farlington, Wymering, Southwick, Boarhunt, Porchester, and Widley ; Fareham is at the N. W. head of Portsmouth Harbour. Nos. 1443 - 1 are seated on the banks or a stream falling into the S. side of Southampton Water, Eling No. 1450 is at the head of Southampton Water, and Fawley on its West Shore.

The 4 Counties of Surrey, Kent, Sussex, and Hampshire with seats in or near the Parish, the extent of the base of which, from Gravesend to Southampton Water, is in a direct line about 75 miles, see No. 1427, a road runs along the base parallel with the Coast, and the Parishes are described in the order in which they lie, being assigned to a Geographical subdivision, see Places No. 1 to 6 and 47 Figure denoting their distance from those, and the other Parishes are described in the order in which they lie, see Nos. 1407 - 1431 on the preceding page.

Topographical Position, Population, &c. &c. of Sea Ports, Towns and Places on the Coasts of Dorset and Devon in the English Channel, and on the North Coasts of Cornwall and Devon, and of Somerset in the Bristol Channel.

*** *Watchet No.* 1538 *is in the Parish of St. Decumanus.*

*The Notations * † ‡ below, imply as in the preceding page. The City of Exeter is the greatest rendezvous of the West of England, it is* 82 *miles from Bath by way of Wells, Glastonbury, Bridgewater, Taunton, Wellington, and Collumpton being* 32 *from Taunton. It is* 37 *S. E. of Barnstaple,* 30 *E. of Launceston, by way of Oakhampton from which it is distant* 23 *miles,* 41 *E. by N. of Callington by way of Tavistock from which it is dis.* 32 *miles over Dartmoor, 43 N. E. of Plymouth by way of Chudleigh & Ashburton from which it is distant* 19 *miles.*

Topographical Position, Population, &c. &c. of Sea Ports, Towns, and Places from the S. W. entrance of the Menai Strait to the river Dee; on the Coast of Lancashire; and from Berwick on Tweed, to Whitby.

Milthorpe No. 1672 *is in the County of Westmoreland but is connected with the Lancashire Coast by the river Kenn which falls into Morecombe Bay. The Parish of* Cartme. *includes Upper and Lower Allithwaite, Broughton, Cartmelfell, Upper and Lower Holker, and Staveley : and* Ulverstone *Parish includes Blawith, Church-Conistone, Egton, Lowick, Monzigrs, Newland, Osmotherley, Satterthwaite, and Torver. These two Parishes form the South part of Lonsdale Hundred North of the Sands, intersected by Coniston and Windermere Waters and bounded on the West by the Duddon river which divides the County of Lancaster from that of Cumberland. Bidstone* No. 1561 *besides Birkenhead includes Claughton-cum-Grange, Moreton, and Saughall Mussey ; and Wallazey includes Poulton-cum-Seacombe, and Liscard.*

Abergele, Aberconway, (commonly called Conway,) and Bangor are on the Mail line of road from London through Chester to Holyhead. The Parish of Gt. Neston No. 1652 *includes Parkgate. The Hamlets composing the out Parish of St. Oswald,* No. 1655 *are Bach, Huntington, Lea-Newbotld, Newton, Saighton, Wervin, & Croughton ; and of St. Marys Marlston-cum-Leach, Moston, Upton, and Little Mollington. Eastham Parish includes Hooton, Pool, Sutton, Thornton-Childer, and Whitby.*

Bromborrow includes Brimstage ; Bebbington besides Tranmore includes Poulton-sun-Spittle, and Storeton.

Goole is seated on the S. bank of the river Ouse, in the Par. of Snaith, Osgoldcross Wapentake, W. Riding of Yorkshire; it was made a Port of entry in 1828, and from its advantageous locality it is likely to become the general out Port for all the traffic of the Aire and Calder Navigation, and all the other Rivers and Canals communicating with the West, and North Ridings of Yorkshire; it is 170 miles N. by W. of London by way of Baurtry and Thorn from which it is dis. 7 miles. Gainsborough is seated on the E. bank of the Trent about 20 miles above its confluence with the Humber.

Topographical Position, Population, &c. &c. of Sea Ports, Towns, and Places on the Essex Coast, which completes the list of this description of Towns, No. 1782 commencing the Class of Populous inland Towns and Parishes, in the Co. of Essex.

Romford, Brentwood, Chelmsford, Witham, Colchester, and all the places printed in Italics are on the line of road from London to Ipswich, see No. 1764. *Prittlewell No.* 1780 *includes Southend, frequented as a Bathing place.*

The river Stour divides the Counties of Essex and Suffolk from near Haverhill, see No. 1851, *& head to following page.*

The Colne also rises near Haverhill and runs past Halstead, and Colnes Earle, and Engain, to Colchester and Wivenhoe; the Blackwater rises near Saffron Walden, and runs past Braintree, Coggleshall, and Witham, uniting with the Chelm at Maldon, where it forms a great expanse of water to Bradwell. Nos. 1826, & 1828-30 *are on the line of road from London through Epping, and Bishops Stortford to Newmarket, see No.* 1898, *and Saffron Walden, No.* 1831 *is* 3½ *miles N. by E. of Newport, making* 42 *from London.*

Topographical Position, Population, &c. &c. of Towns and Parishes in the Counties of Essex, and Suffolk.

*** *The river Stour divides the Counties of Essex, and Suffolk, from near Haverhill past Clare, Sudbury, Bures, Nayland, and Stratford St. Mary's, (see No. 1765) falling into the Sea at Harwich. Sudbury has a Manufacture of Silk.*

Bury St. Edmunds *is seated on the banks of the river Lark which runs past Barton Mills and Mildenhall, into the Ouse below Ely, the Ouse falls into the Sea at Lynn. Stowmarket is seated on the banks of the Orwell, which runs past Needham and Ipswich into the Sea also at* Harwich.
Ixworth *is seated near the Thet which falls into the Little Ouse above Thetford.*

			Number of Inhabited Houses	No. of Persons in 1801: Chiefly employed in Agriculture	No. of Persons in 1801: do. in Trade Manufactures or Handicraft	No. of Persons in 1801: all others not included in the preceeding	No. of Persons in 1801: TOTAL	Total Number of Persons in 1811	Number of Inhabited Houses in 1821	Number of Families in 1821: Chiefly Employd in Agriculture	Number of Families in 1821: do. in Trade Manufactr. or Handicraft	Number of Families in 1821: all others not included in the preceding	Total Number of Persons 1821	Amount of the Estimates of the Annual Value of the Property assessed to the Property Tax in April 1815.	Amounts Annually Raised for the Maintenance of the POOR, on an average of the Three Years ending the Easter in the two periods. Viz. Three Years ending Easter 1815.	Three Years ending Easter 1825.	No. of Families relieved Permanently: out of Work-house	No. of Persons relieved occasionally: in Workhouse	No. of Persons relieved occasionally: out of Workhouse	Number of Persons in Friendly Societies	Amount of Subscriptions Annually Raised for Parochial Charities, as appears by the Abstract of the Returns made to Parliament in 1786

TOPOGRAPHICAL POSITION, POPULATION, &c. &c. of Populous Towns and Parishes in the Cos. of Suffolk & Norfolk.

*** The rivers *Little Ouse* and *Waveney* divide these Counties from East to West, both rivers rise near Wortham, (see No. 1921,) the Little Ouse running West past Thetford and Brandon into the Great Ouse which falls into the Sea at Lynn, and the Waveney runs East past Bungay and Beccles to Yarmouth.*

☞ *The increase of Money expended for the Maintenance of the Poor in these Hundreds, in the County of Suffolk, in the three Years ending Easter 1824, 's remarkable, and deserves attention.*

BUNGAY, *No.* 1960, *is* 108 *miles from London, either by way of Chelmsford, Sudbury, & Bury, or by Ipswich, Yoxford, and Halesworth, from which it is dis.* 7 *miles, it is* 13 *miles S. by E. of Norwich,* 5½ *W. of Beccles, and* 19 *S. W. of Yarmouth.*

BECCLES, *is* 109 *miles direct from London, by way of Ipswich and Yoxford, from which it is distant* 15 *miles, both Bungay and Beccles being seated on the South bank of the Waveney river, makes them places of considerable traffic.*

Topographical Position, Population, &c. &c. of Populous Towns, and Parishes, wholly in the County of Norfolk.

Norwich, the Capital of this County, (see No. 407.,) is seated on the Banks of the Wenstan River, just above its junction with the Yare, and about 20 miles above the entrance of the United Streams into the Sea at Yarmouth; a new communication with the Sea at Lowestoff, (see No. 1755.,) is now forming by uniting the Yare from Reedham, (see No. 1956.,) with the Waveney, see Head Note to preceding Page.

Thetford, *No.* 2019, *is seated on the N. bank of the Little Ouse, which runs past Brandon into the Great Ouse, about three miles above Downham; it is* 80 *miles direct from London by way of Newmarket, from which it is distant* 19 *miles, it is* 12 *N. of Bury,* 6 *E. of Brandon,* 20 *W. N. W. of Stowmarket,* 30 *S. E. of Lynn,* 39 *S. W. of Norwich, and* 41 *S. S. W. of Holt, through Watton and East Dereham.*

Wymondham, *No.* 2000, *and several of the Parishes in the Hundreds of Taverham, Henstead, and Depwade, participate largely in the Manufactures of Norwich.*

				No. of *Persons* in 1801				Total Number of Persons in 1811	Number of Inhabited Houses in 1821	*Number of Families* in 1821. Topographical Position, Population, &c. &c. of the principal Towns, and Populous Parishes, in the remaining part of the County of Norfolk, and in the County of Cambridge.

Burnham Market, No. 2084, is at the Northern extremity of the County of Norfolk, 21 miles N. N. W. of Lynn, see No. 1730. Lynn, is 97 miles direct from London, by way of Cambridge, Ely, and Downham. Ely, is 13 miles N. by W. of Newmarket, through Soham, distance 5 miles, 17 E. of St. Ives, 28 E. by N. of Huntingdon, the same distance E. by S. of Peterborough, both by way of Chatteris, distance 11 miles, and 18 S. of Downham.

CAMBRIDGE, *is seated on the banks of the river* Cam, *56 miles from London by way of Epping, and 51 by way of Ware and Royston, it is* 11 *miles N. N. W. of* Linton, 13 *W. of Newmarket,* 18 *E. by S. of St. Neots,* 15 *E. S. E. of Huntingdon, and* 17 *S. by W. of Ely; the Cam, which is navigable to Cambridge, runs past Ely and falls into the Little Ouse about four miles below that City,— see Note to preceding Column.*

MARSH, *No.* 2104, *is seated in the centre of the Marsh, called the Isle of Ely,* 80 *m. on the line of road from London to Wisbeach, by way of Royston, Caxton, St. Ives and Chatteris.*

TOPOGRAPHICAL POSITION, POPULATION, &c., &c., of Populous TOWNS, & Parishes, in the Co. of Herts, & part of Bedford.

*** *The plotting of Straw for Bonnets, is very extensively practised by the Females, in many of the places in this page: and Luton, and Dunstable have long been distinguished for the making of Bonnets.*

Bishop Stortford, is seated on the West bank of the river Stort, which falls into the Lea, near Hoddesden; it is 9 miles West of Dunmow, in Essex and 12 E. N. E. of Ware. *Hertford*, is seated on the banks of the Lea, it is 14 miles N. E. of Barnet, 7 W. S. W. of Welwyn, and 13 W. by N. of St. Albans thro' Hatfield, dis. 7 miles. The Leeds Mail line of road diverges from the Glasgow line at Welwyn, (No. 2292) thro' Hitchin, Shefford, &c., see Nos. 2422, & 40: Watford, Berkhamp stead, and Tring, are on the line of road from London, to Birmingham, through Aylesbury, Buckingham, and Banbury. *Rickmansworth*, No. 2403, is seated on the West bank of the Grand Junction Canal, and the Colne river, 3 miles W. by S. of Watford, 7 S. E. of Amersham, and 8 N. of Uxbridge; the distances of Nos. 2404-5, imply from Watford. The Population &c., of Market Street, No. 2428, is included in Nos. 2426-7, being partly in Herts, and partly in Bedford Counties.

			No. of *Persons* in 1801				*Number of Families* in 1821. Topographical Position, Population, &c. &c., of Populous Towns, and Parishes, in the remaining part of Buckinghamshire, and part of Northamptonshire, commencing with Brackley, No. 2529.

Lace making by hand prevails in many places in this page, particularly in the vicinity of Newport, and Northampton; some Silk Hose are also made, and Shoes to a great extent for the London Market, and on the river Lyssell, which unites with the Great Ouse at Newport, are some extensive Manufactures of Paper.

Brackley, No. 2529, is on the line of the Oxford Canal, and on the line of road from London, through Buckingham, Banbury, and Warwick, to Birmingham, 63 miles from London, and 9 S. E. of Banbury, it is 22 miles N. E. of Oxford, and 20 S. W. of Northampton, thro' Towcester, dis. 9 miles. Aynhoe is on another line of road to Birmingham, by way of Aylesbury and Bicester, to Banbury, dis. 6 miles. Fenny Stretford, and Weston Beck, Nos. 2538 & 2551 Banbury, dis. 6 miles. Fenny Stretford, and Weston Beck, Nos. 2538 & 2551 are on the line of the Grand Junction Canal which unites with the Oxford Canal at Braunston, No. 2556. Daventry, is 17 miles N. W. of Banbury, 10 S. S. E. of Warwick, through Southam and Leamington, 16 S. of Lutterworth, and 13 W. by N. of Northampton. Northampton, is seated on the North bank of the river Nen, which is navigable from thence part Higham Ferrers, Titraptons, Oundle, and Peterborough, to the Lincolnshire Wash below Wisbeach, see No. 1726, it has also the advantage of a Canal part Market Harborough to Leicester which unites it on that side to the rivers Soar and Trent, whilst a collateral cut from the Grand Junction, unites the river Nen with all the Canal Navigation of the interior and N. W. parts of England; it is 32 miles S. of Leicester by way of Market Harborough, dis. 17 miles, and half a mile less by way of Welford, and Husbands Bosworth, 42 miles S. W. of Peterborough by way of Titraptons, and Oundle, and 19 S. S. E. of Rugby by way of No. 2571, &c.

*All the places in this page noted by an * are on the Lords Mail line of road, the Nos. denoting their distances from London.*

Corby Hundred, bounded on the N. by Rockingham Forest, which divides it from Rutland, and on the S. by the Nene, are on the banks of the Nene, and are providing Iron.

Willibrook Hundred, bounded on the N. by Northampton, and on the S. by the Welland forming the N. E. extremity of the County, is watered by the river Willibrook, a feeder of the Nene.

Peterborough Liberty, bounded on the N. by the Welland forming the N. E. extremity of the County, is watered by the river Nene, which divides it from Northamptonshire, and from Norfolk and Cambridgeshire.

Gartree Hundred, Leicestersh. bounded on the S. by the Welland which divides it from Northamptonshire, and on the N. by the river Soar, which divides it from Nottinghamshire, and that by the Foss Dyke Wash, Lincolnshire, has 2,500 on that from Lincoln.

Guthlaxton Hundred, Leicestersh. bounded on the N. by Warwickshire, N. by Nottinghamshire, and that by Lincolnshire, has 2,500 on that from Lincoln.

Topographical Position, Population, &c. &c., of Populous Towns and Parishes, wholly in the County of Oxford.

The river commonly called the Thames divides the County of Oxford from Berkshire, in a tortuous course from Clanfield (see No. 2720) to Henley, this river however so far as Dorchester strictly speaking is the Isis. The Thame which rises East of Aylesbury, runs past the Town of Thame, (see No. 2686,) and falls into the Isis near Dorchester, when the united stream constitute the Thames. Henley is 8 miles N. E. of Reading, and 7 S. W. of Great Marlow. The City of Oxford stated as the N. bank of the Isis is 69 miles E. of Bath through Burford and Cirencester, and 65 only by way of Faringdon, High-worth, &c.; it is 6 N. E. of Abingdon, 56 N. W. of Cambridge, by way of Wheatley and Thame, the latter dis. 13 miles. Banbury No. 2746, is 72 miles direct from London by way of Watford, Tring, and Buckingham, on the Mail line of road to Birmingham, through Leamington and Warwick, dis. 23 miles, it is 17 miles S. W. of Daventry, and 12 N. E. of Chipping Norton and has the advantage of being on the line of the Canal from Coventry to Oxford.

The places noted with a † are on the N. bank of the Thames; Caversham is opposite to Reading, SE. (see No. 2681—3 are 4 to 10 miles N. of Caversham, which is 1 mile N. of Reading, SE. (see No. 2681—3 are 4 to 10 miles N. of Caversham, which is 1 mile N. of Reading, SE. (see No. 2681—3 are 4 to 10 miles N. of Caversham, which with an * are on the line of road from London to Oxford by way of Hounslow and Henley and those with a ‡ on that by way of Uxbridge and Wycomb, the figures denoting the distances and Nos. 2679—80 are in Pirton Hundred.

Leicestershire

Topographical Position, POPULATION, &c. &c., of Populous Towns and Parishes, wholly in the County of Worcester; except a few places in the S. W. corner of Staffordsh. *Redditch celebrated as the centre of the Manufacture of Needles, Fish Hooks, &c. is in the Parish of Tardebigg, and its Population included therwith, see No. 2762 &c ; for other imporiant Towns in Worcestersh., see Nos. 89, 95, 97, 99 & 401.*

The places below noted with an * are on the line of road from London to Caernarvon, and those with a † on that from London by way of Stratford and Alcester, to Kidderminster. Blockly is locally situated in a detached part of the County within the County of Gloucester, near to Moreton in the Marsh, which is 85 miles from London on the line of road noted with the *. EVESHAM is seated in a beautiful Vale, much of which is appropriated to Horticulture, and is nearly surrounded by the Avon. The City of Worcester seated on the banks of the Severn, it is 25 miles N. of Gloucester by way of Tewkesbury, Upton, and Powick, 28 E of Hereford by way of Bromyard, 28 S. of Bridgnorth, by way of Bewdley, dis 14, 14 S. of Kidderminster, 26 S.W. of Birmingham, by way of Droitwich and Bromsgrove, and 21 W. of Alcester, by way of Droitwich, and Feckenham; in addition to the Navigation of the Severn it has also the advantage of a Canal through the Parishes of Tardebigg, and Kings Norton to Birmingham. BROMSGROVE has a considerable Manufacture of Nails and coarse Linen for Sacks. Yardley, No. 2875, is a detached part of the County in Warwickshire.

Topographical Position, Population, &c. &c., of Populous Towns and Parishes, wholly in the County of Salop.

The Population Returns from this County were very confused, several of the Parishes being large and subdivided into 3 or 4, and in some cases into 8 or 10 Townships, or Hamlets; at one period they have been returned separately, at another time together, and in some cases they have been returned separately, and again included in the Totals. The return from Shiffnal in 1811 is too palpably erroneous to escape notice: the utmost pains have been taken to take the Numbers of corresponding places at each of the three periods 1801, 1811, and 1821. Ludlow is on a line of road from Birmingham to Aberystwith, by way of Kidderminster, Bewdley, Cleobury Mortimer, Hopton Wafers, and Cainham, dis. from Birmingham 41 m., and from Bewdley 25: it is 17 E. of Knighton, and 23 N. of Hereford by way of Leominster, dis. 10 miles.

The places below preceded by a † each return two Members to Parliament; those noted with an * are on the line of road from London through Worcester and Tenbury, to Montgomery and Carnarvon; those with a † on that to Holyrell, by way of Bromyard, Kidderminster, Bromley, and Colebrook Dale; those with a § on that to Holyhead, by way of Uxbridge, Oxford, Birmingham, and Wolverhampton, the figures denoting the distances by those respective lines of road; but as Wolverhampton is 7 miles nearer London by the Mail line of road, thro' Coventry, which falls into the other line at Birmingham, all the places noted with a † (except Bridgenorth) as well as those with a § are of course 7 miles nearer London by the Mail line of road; those with a ‖ are on the old line of road by Coventry and Castle Bromwich to Chester. SHREWSBURY situated in the centre of the County, and almost surrounded by the Severn, at 20 miles N. of Ludlow, by way of Church Stretton dis. 13 miles: 33 N. N. E. of Knighton, by way of Clun & Bishops Castle dis. 20 miles: 22 E. N. E. of Montgomery, by way of Welshpool and Worthen 20 S. of Whitchurch, by way of Wem: 13 S. W. of Drayton by way of Hodnet, dis 13 miles. WELLINGTON (see No. 118) is 7 miles W. of Shiffnal and 11 E. of Shrewsbury.

Topographical Position, Population, &c. &c., of Towns and Populous Parishes, in the Counties of Hereford and Monmouth.

For the Mining District of Monmouthsh., see Nos. 157 – 181 *&* 1541. *The Hops principally sold under the denomination of Worcester are grown chiefly in Herefordsh., in the vicinity of Bromyard and Leominster, & in the aggregate of the Co. in* 1827 *upwards of* 12,000 *Acres were under Hop Culture.*

The places below preceded by a † each return two Members to Parliament: those noted with a * are on the line of road from London by way of Uxbridge, Oxford, and Gloucester, to Carmarthen: those with a ‖ on that to Aberystwith; those with a ‖ on another line of road to Aberystwith, by way of Oxford and Worcester; and those with a § on that to Hay and Brecon, by way of Oxford and Gloucester. The City of Hereford is seated on the North bank of the Wye, about seven miles above the junction of the Lugg; it is 12 miles N. of Monmouth, 23 S. of Ludlow, by way of Leominster, dis. 13, and 14 S. W. of Bromyard.

Leominster is seated on the banks of the Lugg, and has the advantage of a Canal from Kington past Tenbury, to the Severn near Kidderminster, it is 22 miles N. E. of Hay, by way of Weobly, dis. 9, and 11 S. W. of Tenbury.

MONMOUTH is seated at the junction of the Monnow with the Wye, 15 miles N. of Chepstow, 19 N. E. of Pontypool, by way of Usk, dis. 13, and 17 due East of Abergavenny.

			Number of Inhabited Houses	No. of Persons in 1801				Number of Families in 1821.				Total Number of Persons in 1821.	Amount of the Estimates for the Assessed Taxes on Real Property as assessed to the Property Tax in April 1815. Topographical Position, Population, &c. &c., of Towns and Populous Parishes, in the Counties of Gloucester & Berks.

The Wilts & Berks Canal diverges from the Kennet and Avon Canal from near Melksham, past Calne, Wooton Basset, and Swindon; and through the Hundreds of Shrivenham, and Wantage, to the Thames at Abingdon. The Town of MAIDENHEAD *is in the 2 Parishes of Cookham and Bray, it is seated on the W. bank of the Thames; on a Common called Maidenhead Thicket, two miles from the Town, the road from London diverges on the W. S. W., by Reading &c. to Bath; and W. N. W. by Henley &c. to Oxford.*
The Military School at Sandhurst, (No. 3266) is 30 miles from London, on the road to Southampton: Wokingham, or Oakingham is on a line of road to Reading, dis. 7 miles.

For the places below, noted with an * see the Note to Grumbalds Ash Hundred: those noted with a § are on the line of road from London, by way of Hounslow, Henley, and Nuffields Heath, continued from Buscot, (No. 3250) by Nos. 3151 &c. to Gloucester: those with a ‖ diverge from Nuffields Heath, 41 miles from London, by another line to Faringdon.

MARSHFIELD is a detached part of Thornbury Hund., bordering on Wiltshire, 9 miles West of Chippenham, and 9 N. E. of Bristol. Ahingdon is seated at the junction of the river Ocke, with the Thames, 6 m. S. of Oxford, and 21 N. of Newbury by way of East Ilesley, dis. 8 miles.

TOPOGRAPHICAL POSITION, POPULATION, &c. &c. of Towns and Populous Parishes in the Counties of Berks and Wilts.

* The places below noted with an * are on the line of road from London to Bath, by way of Calne and Chippenham; Exc. No. 3316 6 miles East of Bath: those noted with a † are on the line of road from Faringdon, through Sodburys to the Old Passage, see Note to Grenaldels Ash Hundred, on the preceding page: those noted with a ‡ are on the direct line of road from London to Wooton Basset, diverging from Hungerford, from whence the distances imply.
READING is seated at the junction of the Kennet River and Navigation with the Thames, 27 miles S. E. of Abingdon, 18 W. by S. of Windsor, by way of Wokingham, dis. 7 miles, and 45 N. N. W. of Basingstoke. NEWBURY is 14 miles North of Wiltshaw, 15 N. N. E. of Andover, and 26 S. of Abingdon, by way of East Ilsley, dis. 9 miles. SWINDON is 7 miles S. by W. of High-worth, and 8 S. S. E. of Cricklade, which is 7 S. S. E. of Gloucester: Wooton Basset is 8 S. of Cricklade. For CALNE and CHIPPENHAM, and the Manufacturing district of Wiltshire, see Nos. 285 - 400, and for the Wilts and Berks, and Kennet and Avon Canals, see head Notes to preceding and following pages. The six places preceded by a ‡ each return two Members to Parliament.

Topographical Position, Population, &c. &c. of Towns, and Populous Parishes, in the County of Wilts.

Bramshaw, No. 3404, is a detached part of Cawdon Hundred, in the New Forest, 11½ miles from Salisbury on the road to Lyndhurst, and is partly in Hampshire: Stourton & Maiden Bradley, Nos. 4015–16, extend into Somersetshire. Cranbourn, see No. 3420 is 11 m. S. S. W. of Salisbury. Deverhill Longbridge is a detached part of the Hundred, 3 m. W. of Heytesbury.

The places below noted with an * are on the line of road from London by way of Basingstoke, Whitchurch, and Andover, to Devizes; which is about two miles nearer by the way of Reading and Marlborough, from which it is dis. 14 miles: those noted with a † are on the line of road from London through Andover, by way of Amesbury, over Salisbury Plain to Somersetshire: and those with a ‡ diverge from the same road at STONEHENGE, two miles West of Amesbury to Exeter, by way of Winchester, Hehester, Ilminster, and Honiton: Ludgershall is 11 miles from Andover; Amesbury 14; and Salisbury 17.

The City of SALISBURY is seated at the confluence of the little Rivers Nadder, Bourne, and Wily, with the Avon; it is 14 miles W. by S. of Stockbridge, 27 N. W. of Southampton, by way of Romsey, dis. 16; 27 N. N. W. of Lymington, by way of Lyndhurst, dis. 18; and 26 due N. of Christchurch, by way of Fordingbridge, dis. 10 and Ringwood dis. 17. the places noted with a ‖ denote their distances from Salisbury, up the Valley of the Wily River, to Warminster; for those with a ‖ and ¶ see Notes to Cawdon and Dunworth Hundreds. The 8 places preceded by a ‖ each return two Members to Parliament.

				No. of Persons in 1801				Number of Families in 1821.				Total Number in 1821.	Amount of the Estimated Annual Value of the Property assessed to the Property Tax in April 1815. Topographical Position, POPULATION, &c. &c. of Towns, & Populous Parishes, in the County of Hants or Southampton,

concluded on the following page,—for the Maritime Towns of this County, and the Isle of Wight, see Nos. 1356 - 9, and 1436 - 1460. Overton, No. 3467, is seated at the head Waters of the river Teste, which works some Mills for the throwing of Silk; and Odiham, No. 3430, has some Looms employed in the Weaving of Silk Plush for Hats.

The places below noted with an * are on the line of road thro' Winchester, &c. continued on the following page to Poole; those with ⁑ are on the line of road diverging from Basingstoke to Salisbury; and those with a † are on another line of road from London by way of Bagshot and Farnham to Winchester, the figures denote the distance from Hyde Park Corner. BASINGSTOKE is 15 m. S. S. W. of Reading, thro' Sherfield and Stratfield Saye, and 9 S. S. E. of Aldermaston, see No. 3280, it is connected with the river Thames by a Canal through Godley Hundred, Surrey. KINGSCLERE, No. 3469, is 8 m. N. N. E. of Whitchurch, on the way to Reading, thro' Aldermaston. ANDOVER is seated near the head of the Valley of the river Teste which runs past Stockbridge and Romsey into the Southampton Water at Eling, it is 16 miles S. S. W. of Newbury, through Hurstborne Tarrant, dis. 6 miles, and High Clere, dis. 12, and 13 N. N. W. of Winchester: see conclusion of 1st. section of Note to Column of preceding page. The 4 places preceded by a ‡ each return two Members to Parliament.

Basingstoke Division: bounded on the N. by Berkshire, and on the E. by Surrey, the Blackwater from near Aldershot to Hackfield, (No. 3440) forming the line of demarcation.

Alton Hundred. The Town of Alton is 8 miles S. of Odiham, 12 S. S. E. of Basingstoke, 13 N. of Petersfield, and 25 N. N. E. of Fareham, by way of No. 3496, &c. as in the following Page.

Wilton Division; bounded on the E. by Godalming Hundred, Surrey. Nos. 3458-60 are on the line of road from London through Guildford to Portsmouth. Liphook is 12 m. from Godalming, and Petersfield is 18 N. N. E. of Portsmouth, & 22 N. N. W. of Chichester.

Kingsclere Division; bounded on the W. by Wiltshire, and on the N. by Berkshire. Whitchurch is 14 miles S. of Newbury, and 24 N. of Southampton by way of Winchester, dis. 12 miles.

Andover Division; bounded on the W. by Wiltshire. STOCKBRIDGE is about six miles S. of Andover, 14 E by N. of Salisbury, 9 W. N. W. of Winchester and 17 N. N. W. of Southampton, by way of Romsey, dis. 9.

Topographical Position, Population, &c. &c. of Towns, and Populous Parishes, in the S. W. part of the County of Hants and E. part of the County of Dorset.—The County of Dorset commences with Cranborne, No. 3526. The *Stower* river which rises on the borders of Somerset and Wilts, runs past the places preceded by an * and falls into the Sea, with the Avon at Christchurch.

The places below noted with a ‖ are on a line of road diverging from Chawton, No. 3460, to Farnham and Gosport; see Nos. 1255 and 1640: those with an * are in continuation of the route, to noted on the preceding page.

The City of WINCHESTER is finely located on the banks of the Itchin river, which falls into Southampton Water, East of Southampton, dis. 12 miles; it is 72 m. E. of Salisbury, by way of Stockbridge, dis. 9 m.; and 12 N. by E. of Southampton.

SOUTHAMPTON, (see No. 1467) is 74 miles direct from Hyde Park Corner, by way of Basingstoke & Winchester; 77 by way of Bagshot, Farnham, Alton, Alresford, and Winchester; 79 by way of Guildford, Farnham, &c., as before; and 75 by another road diverging from that to Farnham at Filmerhill (56 from London) through Bishops Waltham, dis 10, and Botley, dis. 7 miles from Southampton.

Bishops Waltham is 10 miles S. S. E. of Winchester on the road to Chichester, dis. 23 miles, thro' Wickham, dis. 4 miles: Wickham is 10 miles from Portsmouth, by way of Fareham and crossing the Harbor from Gosport, or 12 m. by the head of the Harbor, to Portsea. See Notes to Shaston and Blandford Divisions, Dorset, for the other Notations in this Column.

				No. of *Persons* in 1801					*Number of Families* in 1821. Topographical Position, POPULATION, &c. &c. of Towns, and Populous Parishes, in the W. part of the County of Dorsetshire, and N. E. part of the County of Somersetshire.

The places below noted with a ‖ are in continuation of the route from No. 3569. DORCHESTER is seated on the banks of the Froome river, which rises near Beaminster, and falls into Poole Harbor with the *Piddle* at Wareham: it is 19 miles W. by N. of Wareham; 8 N. of Weymouth; 15 E. of Bridport; 17 E. S. E. of Beaminster, see No. 1294; 21 S. S. E. of Yeovil, by way of Nos. 3574 and 3591; and 17 S. of Sherborne. ABBOTSBURY is seated at the head of the inlet, formed by the Isle of Portland & the Chesil Bank, the inlet abounds in Wild Fowl. AXBRIDGE No. 3638, is 18 miles S. S. W. of Bristol, and about 8 m. from Weston-super-Mare, No. 3630, which is at the Mouth of the river *Axe* and is much frequented as a bathing place. Bempstone Hundred, see Nos. 3645, &c., is a rich District lying between the rivers *Axe and Brue*: the expenditure for the Maintenance of the Poor in this Hundred will be seen not to exceed one shilling in the £ of the Real Property.

Conclusion of DORSETSHIRE.—For the Manufacturing Towns of this County, see Nos. 1271–89, & 1303; and for Towns on the Coast, see Nos. 1466–74. The river *Piddle* rises near Cerne Abbas, and after passing 3575–7 runs between Tolpiddle and Affpiddle into Poole Harbor at Wareham.

These 10 Hundreds form the N. E. part of the County of SOMERSET; Wellow, Keynsham, and Portbury, are bounded on the N. by the river Avon, which divides them from Gloucestershire: the places preceded by an * are upon the Coast of the Bristol Channel, between the Mouths of the Avon and the Brue Rivers; the latter falls into Bridgewater Bay. The *Mendip Hills* divide the Hundreds of Chewton and Chew on the N. from the beautiful Vale, of Axbridge on the South; a Coal and other Mineral Stratas extend from the Eastern Slope of the Mendip Hills, through Chewton and Kilmersdon Hundreds,—see Nos. 150, &c.

Topographical Position, Population, &c. &c. of Towns, and Populous Parishes, wholly in the County of Somerset.

The places noted with a † are on the line of road continued from Hindon, No. 3412, to Bridgewater and South Molton; Bruton is 7½ miles from Maiden Bradley, see No. 3416, and 5 N. W. of Wincanton. The City of WELLS is 120 miles direct from London, by Warminster and Frome, see No. 3379. Shepton Mallet, see Nos. 381 and 3655, is 10½ miles West of Frome, E by S. of Wells.

The three rivers which give a feature of interest to this County are the *Axe*, the *Brue*, and the *Perrot*; of these the Axe is the least considerable, it rises near Wells and falls into the Bristol Channel at Weston-super-Mare, No. 3626.

The Brue rises East of Bruton, and runs past Glastonbury to Mare, No. 3660, where it is joined by another Stream from Shepton Mallet, and after a course of 5 or 6 miles diverges into two branches; one running into the Axe near E. Brent, No. 3642, and the other falling into the Heath of the Parret, between Huntspill, No. 3714, and Burnham, No. 3645; the main branch of the Perret rises on the border of Dorsetshire as described at No. 3691, and runs to Langport, No. 3705, where it is joined by the *Yeo* or *Ivel*, from Yeovil and Ilchester, it is joined by the *Yeo* from Taunton, and 2 or 3 other Streams below Langport, from whence it is Navigable past Bridgewater, into the Bristol Channel: Nos. 3674-6, are an Island formed by one of the tributary Streams of the Parret from Somerton

Hundreds of Wonford

Exminster Hundred, lying between the Rivers Exe and Kenn, is bounded on the E. by Stoke Hund. and Kenton, and the river Exe; Manwood Hundred includes 1384 to 1387, and 1389, is on the road to Ashburton, dis. 9½ m. Crediton and Devon, 3 m. from Wellington on the road to Tiverton, is 14 m. S. W. of Tiverton.

Honiton is 15 m. from Hamister, see No. 3721, on the road to Exeter, dis. 16, and 12 from Chard by way of Stockland No. 1301; Axminster, dis. 16, and 12 from Chard by way of Membury, dis. 12, & Charmouthjane Nos. 1271 & 80 on the way to Honiton, dis. 10 m.

S. E. part of Devonshire, which includes also Nos. 1475 to 1489, and lying between the border of Somerset and the river Exe; Manwood Hundred includes 1384 to 1387, and 1389, is on the road to Exeter, dis. 16, and 12 from Chard by way of Stockland No. 1301; Axminster, dis. 16, and 12 from Chard by way of Membury, dis. 12, & Charmouthjane Nos. 1271 & 80 on the way to Honiton, dis. 10 m.

Topographical Position, Population, &c. &c. of Towns, and Populous Parishes, in the S. W. part of Devonshire.

The Blockhouse Flagstaff at Devonport is in Latitude 50. 23 North, being 1. 7 South, and 4. 9 West of Greenwich Observatory. Exeter, see No. 1489, is 165 miles W. by S. of London, by the route as described at Head Note to No. 3346, &c.; 168 by way of Salisbury, Shaftesbury, Yeovil, &c.; 172 by way of Salisbury, Dorchester, Bridport, &c.; and 187 by way of Bath, Wells, and Bridgewater.

ASHBURTON near the E. bank of the river Dart, and S. E. boundary of Dartmoor, is 3 m. W. of Newton Bushel, and the same distance N. N. W. of Totness; it is on the road from Exeter thro' Chudleigh and Nos. 3814-13, to Plymouth.

TAVISTOCK, seated on the W. bank of the Tavy river which rises on Dartmoor, and runs past Mary Tavy into the Tamar below Beerferris, is 23 m. W. of Exeter by way of Moreton Hampstead and across the centre of Dartmoor; it is 14 m. North of Plymouth; 9 N. E. of Callington, 12 S. E. of Launceston, and 15 S. W. of Okehampton. OKEHAMPTON at the Northern boundary of Dartmoor is 22 m. W. by N. of Exeter by way of Cheriton, No. 3789; it is 24 m. S. by E. of Bideford, by way of Hatherleigh, dis. 7 miles, and Torrington dis. 18, and 28 from Barnstaple by a road diverging N. N. E. from Torrington 3 m. S. W. of North Tawton, which makes the distance of Okehampton 25 m. from Exeter by way of Crediton, Bow, and that place.

		Number of Inhabited Houses	No. of Persons in 1801: Chiefly employed in Agriculture	No. of Persons in 1801: do. in Trade Manufactures or Handicraft	No. of Persons in 1801: all others not included in the preceding	No. of Persons in 1801: TOTAL	Total Number of Persons in 1811. TOPOGRAPHICAL POSITION, POPULATION, &c. &c. of Towns and Populous Parishes, in the N. W. part of Devonshire and the East part of Cornwall.—For the Mining Parishes of Cornwall, see Nos. 207–293; and for Towns on the N. W. Coast, see Nos. 1522–6. For the S. Coast of Devon, see Nos. 1475–1521; and for the N. Coast, Nos. 1527–1540. Hartland Point, the extreme N. W. of the County, is in Latitude 51 .6 N., and 4 .40 W. of Greenwich Observatory; and the Start Point the extrem S. W. is in 50 .9 North, and 3 .51 West.

LAUNCESTON, No. 3925, is on the West bank of the *Tamar* river, which divides the County of Devon from that of Cornwall; it is 213 miles from London on the line of road by way of Salisbury, Dorchester, Bridport, Exeter, and Okehampton, continued through Bodmin, Truro, Helstone, and Penzance, to the Lands end dis. 84 miles; it is 20 miles N. N. W. of SALTASH (see Nos. 1270-5) by way of Callington, dis. 13 miles. CALLINGTON is on the lower line of road thro' Cornwall by way of Liskeard, Lostwithiel, St. Austle, and Grampound, to Truro, dis. 42 miles; it is 8 miles from Liskeard, which is 17 miles from Devonport.

BODMIN, the Summer Assize Town of the County, (the Lent Assize being held at Launceston) is 15 miles E. S. E. of PADSTOW, see No. 1535, 12 S. S. W. of Camelford, 7 N. W. of Lostwithiel, and 15 W. of Liskeard, see No. 209.

The Population of Chittlehampton, No. 3874, in 1801 appears to be erroneous.

				No. of *Persons* in 1801				*Number of Families* in 1821.						Amount annually Expended for the Maintenance of the POOR, on an average of the three years, viz. each of two periods, Ladyday 1813, and Ladyday ending Easter 1821, and three Years ending Easter 1824.	No. of Families relieved Permanently			Number of Persons in Families relieved	Amount of Charitable Bequest, as returned to the Parochial Officers.

The 9 Hundreds are bounded on the N. W. by the Bristol Channel; the places noted with a † are on the direct line from Launceston to Plymouth; and those with a ‡ are on the direct line from Launceston to Bodmin, 20½ miles.

Topographical Position, POPULATION, &c. &c. of the Principal Towns, and Parishes, in the S. E. part of the West Riding of YORKSHIRE. For the Manufacturing Towns of the S. and N. W. part of this district, see Nos. 127-141; and Nos. 417 to 601; see also No. 1716, and Note thereto.

BAWTRY, No. 3962, seated on the W. bank of the river *Idle*, which falls into the Trent about 5 m. below Gainsborough, is in the Parish of Blyth in Nottinghamshire, see No. 2347, and on the high road from London to Doncaster by way of Newark &c. see Note to No. 2324 &c.; it is 11 miles W. of Gainsborough. The places noted with an * are on the Mail line of road from London to Edinburgh, (the figures denoting their distances from London) by way of Huntingdon &c., see Note to No. 2441 &c.: and those noted with a § diverge from the Edinburgh Mail line of road at Ferrybridge, No. 3986, to York, dis. 22 miles. FERRYBRIDGE over the river Aire, and distinguished as a great Post Station on the North road is 14 miles E. S. E. of Leeds, and about the same distance W. of Snaith. WETHERBY, No. 4005, seated on the N. bank of the river Wharfe, is 8 miles S. E. of Knaresborough, see No. 591; and 13 W. of York. The Boroughs of ALDBOROUGH & BOROUGHBRIDGE, Nos. 4011-12, each (as well as PONTEFRACT) return two Members to Parliament, are seated on the S. bank of a Stream falling into the *Ure*, 3 or 4 miles above its junction with the Swale, where the united Streams are called the *Ouse*. Aldboro' is 1 m. E. of Boroughbridge, which is 7 miles N. N. E. of Knaresborough; 6 S. E. of Rippon, No. 597; 17 W. N. W. of York; and 18 S. of Northallerton, No. 409.

Topographical Posrtion, Population, &c. &c. of the principal Towns and Parishes, in the East Riding of Yorkshire.

For the Maritime Towns of this district, see Nos. 1335–40, and 1699–1715.

HOWDEN is seated near the N. bank of the Ouse river, about 4 miles below the junction of the *Derwent*, and nearly opposite the junction of the Aire; it is 10 miles E. N. E. of Snaith; 21 W. of Hull by way of South Cave, dis. 12 miles; and 12 S.W. of Market Weighton. The City of YORK seated on the banks of the Ouse is 195 m. from London by way of Ware, Huntingdon, Bawtry, Ferrybridge, and Tadcaster, see Nos. 2962, &c.; but as it is only 13 miles N. of Selby, it is 5 miles nearer London by the route directly from Bawtry noted with a † to the preceding page; or, it is 210 miles from London by way of Lincoln and Hull, being 59 miles W. N. W. of the latter place, by way of South Cave and Market Weighton, dis. 19 miles: it is 42 miles W by S. of Bridlington, 70 E. by S. of Thornton, see No. 598, by way of Wetherby, dis. 15, Otley, 8, Ilkley, 8, Skipton, and Settle, and 42 E. N. E. of Halifax, by way of Bradford, Leeds, and Tadcaster. For the distance of York from the principal Towns in the North Riding, see the two following pages.

Topographical Position POPULATION, &c. &c. of the Principal Towns, and Parishes, in the S. E. part of the North Riding of YORKSHIRE. For the Maritime Towns of this district, see Nos. 1691—1698.

The *Derwent* river which rises near Cayton No. 4158, is Navigable from New Malton into the Ouse at Barmby-Marsh, No. 4025, about 4 miles below Selby; New Malton is 22 m. S. W. of Scarborough, and 29 S. by W. of Whitby, by way of Pickering, dis. 8 m. from Malton; Kirby Misperton, No. 4155 is 5 miles N. of Malton; Topcliffe, No. 4161, on the banks of the Swale is 12 miles S. of Northallerton; Thirsk is 9 miles S. S. E. of Northallerton and 12 N. E. of Rippon.

Buckrose Wapentake, East Riding, bounded on the North and West by the Derwent river. (Nos. 4096–4104)

Bulmer Wapentake. The river *Swale* past Brafferton and Helperby for about 6 miles to Myton, where it is joined by the *Ouse*, and from thence by the latter river to York in a direction S. E. from Brafferton, forms the boundary of this Wapentake on that side, as does the *Derwent* from New Malton on the East, the figures denote the distances from York: those noted with an * are on the road to Whitby No. 1692; & those with a ‡ on that to Kirby Moorside: the places preceded by an * imply their either wholly or in part belonging to the liberty of St. Peter of York. (Nos. 4105–4125)

Ryedale Wapentake.—New Malton is on the W. bank of the *Derwent* river, 12 miles S. W. of Snainton, No. 4152, and 10 East of Gilling: Nos. 4128 to 32 lying W. of Malton towards Gilling in the order as placed. The Northern part of this district is Mountainous and dreary: Lastingham and part of the Parishes of Helmsley and Kirby Moorside extend into the Mountains. (Nos. 4126–4143)

Pickering Lythe; the S. E. point of this district comprises about 5 m. of Coast between Scarborough and Hunmanby, see Nos. 1698–1700: the places noted with a § are on a line of road from Scarborough to Harrowgate, dis. 64 miles, the figures denote the distance from Scarborough. (Nos. 4144–4158)

Birdforth Wapentake, divided on the W. from Hallikeld Wapentake by the river Swale. Topcliffe is 6½ and Thirsk 11½ N. of Boroughbridge, on the road to Yarm and Stockton: Thirsk is 11 m. N. W. of Easingwould, and South Otterington is 14 from do. on the road to North Allerton. (Nos. 4159–4171)

Topographical Position, Population, &c. &c. of the principal Towns and Parishes, in the West part of the North Riding of Yorkshire.

West Gilling Wapentake forms the N. W. extremity of Yorkshire, it is bounded on the S. from its extreme N. W. point near which it has its source by the river *Tees*, which separates it from the County of Durham, for the Towns on the bank of this river, see Nos. 692—623; it is bounded on the S. by the river *Swale*, which divides it from West Hang Wapentake, see Nos. 4219 &c. BOWES, No. 4250, is 5 miles W. of Bernard Castle, see No. 616; and 3 from *Spitfire Inn* on the boundary line of the County, on the road to Brough, Appleby, &c., see following page. Lunedale and Forest occupy a promontory of the Wapentake in a direction of 12 to 15 miles N. W. of Bowes. RICHMOND is 14 miles S. S. E. of Bernard Castle, by way of Kirby Ravensworth, dis. 5 miles; 2½ W. S. W. of Yarm, and 19 S. of Pierce Bridge, over the Tees on the road to Durham, dis. 30 miles. HAWES, No. 4240, 4 m. W. by S. of Bainbridge, is about a mile S of the High road, thro' Askrigg to Kirby-Stephen and on the line of road from Lancaster by way of Hornby, Melling, and Ingleton, dis. 15 miles from the latter, and 22 from Melling, see Nos. 535 and 6331.

Hallikeld Wapentake, bounded on the East by the *Swale* river, extending N. N. W. from Boroughbridge, to Leeming 15 miles at a mean breadth of about 4 miles. West Tanfield is in a nook Westward about 2 m. S. of Well, No. 4207.

Allertonshire.

Longwath Liberty, which includes also Nos. 4180-90, bounded N. W. by the Tees which divides it from Durham; and N. E. by the North Sea; the distances of the places noted with an ‡ imply from Thirsk, on the road direct from Northallerton to Whitby, and those with a † are on the road diverging from Asenliffe to Yarm, No. 4058.

Westerdale is about 5 miles E. of Kildale No. 4197.

Part of East Gilling Wapentake.

East Gilling Wapentake.

West Gilling Wapentake bounded on the N. by Durham, & W. by Westmorland.

Hang West Wapentake, divided from W. Gilling Wapentake by the river Swale, see No. 3911; the distances of the places noted with a ‡ imply from Catterick Bridge over the river Swale, which forms the district is bounded on the S. by the road from thence thro' Richmond to Greta Bridge, and 18 W. by S. from Richmond, Leyburn is 8½ S. S. W. of Richmond, and 5 to 6 S. of No. 318-322.

Principal Towns and Parishes in the North Riding of York.

4171 — 4306

4207 — 4250

Topographical Position, Population, &c., &c., of the Principal Towns, and Parishes, in the Counties of Montgomery, Merioneth, Radnor, and Brecon. The altidue of Plinlimmon Mountain, lying between Machynlleth and Llanidloes, No. 4756, is 2,463 feet above the level of the Sea.

MONTGOMERY, and the Places noted by an * are on the line of road from London to Carnarvon by way of 2817, 2977, &c., the figures denoting the distance from London; Montgomery, is seated near the E. bank of the Severn, at the verge of the County, bordering on Salop, 3 miles from Cairbury, No. 2995, and 22 S. W. of Shrewsbury, it has the advantage of a Canal parralel with the Severn to Newtown to Llanymynech, and from thence to the Ellesmere Canal to Chester. The Severn rises at the foot of Plinlimmon, at the S. extremity of the County, bordering on Cardiganshire, and runs in a direction N. N. E. past Llanidloes, Newtown, Welshpool, and Llandrinio, from whence it takes a more Eastern course to Shrewsbury, and from thence S. E. to Colebrook Dale, Bridgenorth, Bewdley, Worcester, Tewkesbury, Gloucester, &c.: Llandiloes, at the S. extremity of the County, is 11 miles N. of Rhayader, 19 S. E. of Machynlleth, and 32 E. by N. of Aberystwith: Presteigne, No. 4781, at the verge of the County bordering on Herefordshire, is 16 miles W. of Ludlow, 19 S. of Bishops Castle, by way of Knighton, dis. 7 miles, 36 N. N. E. of Brecon, by way of Hay and Kington, dis. 6 miles, and 19 N. E. of Builth; New Radnor, is 7 miles W. of Kington, and 11 N. E. of Builth.

Topographical Position, POPULATION, &c., &c., of the Principal Towns, and Parishes, in the Counties of Brecon, Cardigan, and East part of Carmarthenshire.

The places below, noted with an * are on the line of road from London to Carmarthen, by way of Monmouth and Abergavaney; and those with a ‡ diverge from New Radnor, No. 4785, to Tregarron; Builth, called also Llanfair, is on the verge of the County, bordering on Radnorshie, 14 miles N. of Brecon; 19 N. W. of Hay, by way of Glasbury; 14 S. S. E. of Rhayader; and 29 S. of Newtown, by way of Llanbadarn-Fyndd, No. 4789, dis. 20 miles; For the Maritime Towns of Cardiganshire,—see Nos. 1578—94; The Town of Cardigan, is at the S. W. extremity of the County near the mouth of the Teivi River, 231 miles from London, by way of Lampeter and *Newcastle in Emlin*, dis. 10 miles; it is 39 miles S. S. W. of Aberystwith; 30 N. N. W. of Carmarthen; 23 N. of Narberth; 26 N. N. E. of Haverfordwest; and 33 N. E. of St. Davids, by way of Newport, and Fishguard, the former dis. 10, and the latter 17 miles

North Part of BRECONSHIRE, the Town of Brecon, is 18½ miles North of Merthyr Tydvill,—see No. 198; 30 N. N. E. of Neath,—see No. 203; 14 S. of Builth; and 171 from London by way of Hay; from which it is dis. 15 miles S. W.—see No. 4795, &c., noted by a ‖.

County of CARDIGAN. TREGARRON, is 10 miles N. by E. of Lampeter, No. 4837; and Llangammach, is 14 N. N. E. of Llandovery,—see No. 4854.

This part of *CARDIGANSHIRE*, lyes between Aberystwith and Cardigan, and includes the Towns, &c., on the Coast,—see Nos. 1579—94; Lampeter, is on the line of road from London diverging from Llandovery, dis. 16 miles; to Cardigan dis. 29 m., it is 27 miles due S. of Aberystwith, and 23 N. N. E. of Carmarthen, and about 17 N. by W. of Llan-dillo-fawr, No. 4861.

East part of CARMARTHENSHIRE; Llangadock, No. 4860, is about 3 miles East of the high road from Llandovery to Carmarthen, about 8 S. by W. of Llandovery, and the same distance N. E. of Llandillo, which is 13 E. N. E. of Carmarthen, and 23 N. of Swansea; Llandovery, is 22 m. S. W. of Builth; Llanoon, is about 7 miles N. of Llanelly,—see Nos. 443—6, and is on the road from Swansea, dis. 13 miles, to Carmarthen dis. also 13 miles.

Topographical Position, Population, &c. &c., of the principal Towns and Parishes, in the County of Glamorgan, and Remaining part of the County of Carmarthen.

The Town of CARMARTHEN,—see Nos. 1561 and 4919, is seated on the banks of the Towey River, 216 miles from London, by way of Monmouth, Abergavenny, Crickhowell, &c., noted by an * in the preceding Page, and 250 miles by way of Bristol, the Newpassage, Newport, &c., noted by an * below, and the same dis. by Gloucester and Glo'ptow, the two latter roads uniting 3 miles W. of Black Rock Inn,—see Note below;—it is 47 miles S. of Aberystwith, by way of Llanpster and Llan-Rhyddid, & 30 S. E. of Cardigan, by way of Newcastle in Emlyn: The River Towey rises in Cardiganshire, and for about 10 miles forms the boundary between that County and Brecknock, before it enters Carmarthenshire, when it runs past Llandovery, Llangadog, and Llandilo to Carmarthen, from whence it is Navigable for Vessels of considerable burthen, and falls into Carmarthen Bay, between St. Ismaels, and Llanstephen; St. David's, No. 1570, the extreme Western point of Great Britain is 46 miles West of Carmarthen, making its distance by the nearest line of road through Carmarthen 262 miles, but as it is only 5 27 W. of Greenwich, its mean distance from Hyde Park Corner, is only 220 miles.

County of GLAMORGAN, bounded on the East by Monmouthshire, see Nos. 137 – 181, and 3169 – 99, and for the Mining districts of Glamorgan and Monmouthshire, see Nos. 2546, and 3195 – 303, and for the Maritime Towns, see Nos. 1541 – 37: The places noted with an * are on the line of road from London by way of Bath, Bristol, and the New Passage Ferry to Milford Haven: Newport, is 15 miles West of the *Black Rock Inn*, on the Monmouthshire side of the Ferry. Cardiff, is 8 W. by S. of Newport, and 155 miles from London, by way of Gloucester, Ross, &c. Neath, is 10 W. of Cardiff, and 202 from London, by way of Bristol, Bridgewater, Taunton, &c. Merthyr Tydvil, No. 195, is 28 m. N. W. of Newport, by way of Caerphilly; it is 24 N. N. W. of Cardiff the same dis. due N. of Cowbridge, by way of Llantrisiant, dis. 7 from Cowbridge, 18 S. of Brecon, and about 29 W. of Abergavenny.

Part of Llangevelach Parish near Swansea, — see No. 4928, contains part of the Town of Swansea, see No. 300 – 1.

Remaining part of the County of CARMARTHEN,—see preceding page, 4853 &c. for the Maritime Towns, see Nos. 4928, contains part of the Town of Swansea, see No. 300 – 1. Llanelly, is 8 W. by S. of Kidwelly, and 10 E. by S. of Cardigan; The Towy River, which rises in Cardiganshire, runs past Llandovery, Llangadog, and Llandilo to Carmarthen, from whence it is Navigable for Vessels of considerable burthen, and falls into Carmarthen Bay, between St. Ismaels, and Llanstephen; St. David's, No. 1570, the extreme Western point of Great Britain is 46 miles West of Carmarthen, making its distance by the nearest line of road through Carmarthen 262 miles, but as it is only 5 27 W. of Greenwich, its mean distance from Hyde Park Corner, is only 220 miles.

The fifteen following pages contain an Account of the number of Inhabited Houses, Families, and Persons, in every and each of the 994 Parishes, in the counties of MIDDLESEX, SURRY, KENT, and SUSSEX, as returned to Parliament at each of the three periods 1801, 1811, and 1821 ; showing the proportion of Families in 1821 in each Parish in Surry, Kent, and Sussex ; returned as employed in Agriculture : and the estimated Annual Value of the Real Property in each of the 994 Parishes, as assessed to the Property Tax in 1815 : and also the number of Acres planted with Hops in each Parish in Kent, and Sussex, in 1829.

As the Topographical Numbering of these 994 Parishes begins again at 1, their number of reference in the Alphabetical Arrangement, commencing at page 92, is preceded by an *.

Topographical Position, Population, &c. &c., of the several Parishes, which compose the *Metropolis*, (and its Environs) of the *British Empire*.

	Names of PARISHES, &c. &c. In the Parliamentary Return of 1801, *Nos.* 5, 11, *and* 13, *(noted with an *) were included in the City of London within the Walls.*	*Number of Inhabited HOUSES.*			*Number of FAMILIES.*			*TOTAL Number of PERSONS.*			*Proportion in* 1821.		*Amount of the Estimates of the Annual Value of the Real Property as assessed to the Property Tax, in April* 1815

Topographical Position, Population, &c. &c., of all the Towns and Parishes, in the County of *Surrey*.

This County is so contiguous and identified with the Metropolis as to render it difficult to determine where the Metropolis terminates and the Country begins. In addition to the 10 Parishes included within the Bills of Mortality (see Nos. 61–70) the whole of Brixton Hundred, and part of Kingston Hundred, and the Parishes of Croydon, Carshalton, and Mitcham, (to the extent of 60,000 Persons) form as much a part of the Metropolis as does the Parish of Lambeth.

*The Thames separates the County on the North, from the County of Middlesex, from London to Egham, distant from Hyde Park Corner 17¾ miles, but by the sinuosities of the river nearly double the distance: all the places preceded by an * are on the S. bank of the Thames. Battersea, No. 148 is united to Chelsea, (see No. 74) by a bridge, as is Putney to Futham; a suspension Bridge at Hammersmith leads to Barnes, whilst another Bridge at Kew leads to Richmond, where another Bridge connects that place with Islesworth and Twickenham, as another at Kingston connects Kingston with Hampton Wick; and Egham is in like manner united to Staines (see No. 91.) A Canal from the Thames at Deptford, past Sydenham in Kent, and from thence over Penge and Norwood Commons, connects the Town of Croydon with the Metropolis, and a Tram or Rail Road runs from Croydon, past Merton to the Thames, at Wandsworth.*

*The places below noted with a † are on the line of road, from the Bridges, to the Coast of Sussex by way of Horsham: and those with an * on that to Portsmouth.* Bagshot, *(see No. 178) bordering on Berkshire, is 8 miles S. W. of Egham, on the road through Andever, Salisbury &c. to the Lands End, Cornwall.*

The Places noted with a † are in continuation of the line of Road from Boughton Street, No. 538, to Canterbury, which for a short distance is parallel with the Stower River to Upstreet, No. 560, were the River divides itself into two branches; one running North, called the Wantsum, falls into the mouth of the Thames near Reculver, No. 562; and the other takes a S. E. direction past Sandwich into Pegwell Bay; it is this divergence at Upstreet of the Stour River which forms the Isle of Thanet; the direct Road to Ramsgate diverges from the Margate Road at Monkton, No. 567; the figures following Nos. 576, and noted with a † denote the distance from Canterbury direct to Sandwich.

TOPOGRAPHICAL POSITION, POPULATION, &c. &c., of all the Towns, Parishes, Hamlets, Parochial Chapelries, &c. &c., in the County of *KENT*.—Continued. *Lathe of St. AUGUSTINE*.—Concluded, *and Part of the Lathe of SHEPWAY*.

The Road from Canterbury to Dover runs through Bridge, *over* Barham Downs, *past Broom Park,* (see No. 611,) *to the* Halfway House, *dist.* 7½ *miles,* (see No. 585,) *and from thence by Lydden, &c., as noted with a* ‡. *Paddlesworth, No.* 651, *is* 642 *feet above the level of the Sea, it is* 3 *miles W. N. W. of Folkestone; the altitude of the Toll Gate near Folkestone is* 545 *feet, and of Dover Castle* 469 *feet.*

A Stream called the *Nour* intersects this district; it rises near Postling, see No. 670, and runs past Kingston and Bishopsbourne to Bridge, where it crosses the road, and afterwards runs between Patrickesbourn and Beaksbourn, to Littlebourne, and from thence between Wickhambreaux & Ickham to the Sea at Stonar, see No. 641. The direct road from Canterbury to Deal diverges from that to Sandwich at Bridge, No. 590, and passes through Barham, No. 604; and Betteshanger; it is 10½ miles S. by E. of Canterbury, 16 S. of Margate, 7 S. of Ramsgate, 10 E. by N. of Wye, see No. 541.

Topographical Position, Population, &c. &c., of all the Towns, Parishes, Hamlets, Parochial Chapelries, &c. &c., in the County of Sussex.

Rapes of Hastings, *and part of* Pevensey. *The places below noted with a † are on the line of road from London to Hastings, by way of Tunbridge, Kippings Cross, and Lamberhurst.— see Nos. 356, and 364, in Kent. Those noted with a § are on another line of road diverging from Tunbridge, by way of Tunbridge Wells, which is 1½ mile further than by Kippings' Cross: Hurst Green No. 708, where the two roads unite being 3½ miles from Ticehurst. The Parish of Frant No. 740 includes part of Tonbridge Wells No. 359, and part of the Parish of Lamberhurst No. 742 is in Kent, but the whole of the Population &c. is entered below. The places noted with an * are on the line of road from London to Rye, by way of Tonbridge, Kippings Cross, and Lamberhurst, diverging from the Hastings road at Flimwell 4½ miles from Lamberhurst, continued by Nos. 515–16, to Northiam; and the places noted with a ‡ are on the road from London to Lewes, by way of Nos. 282 &c.*

The Rape of HASTINGS *forms the eastern extremity of the County divided from that of Kent, and Romney Marsh, by the* ROTHER *river which rises near Mayfield No. 744 and runs past Etchingham, and Robertsbridge Nos. 708-9, to Sandhurst No. 515, & falls into the English Channel at Rye. The Parish of East Guldeford No. 705 forms the western extremity of Romney Marsh. East of the Rother river. High Water, new and full Moon at Hastings, 4 minutes before 12 at noon*

BATTLE, 6½ to 33 miles E. N. E. of Brighton, 14 S. by W. of Tunbridge Wells, 13 W. by S. of Langton 238, Hurstmonceaux 276 & Ninfield 734: and 14 W. of Rye by way of Vine Hall, and Udimore No. 710

The figures [66] following RYE & Winchelsea denote the distance of the respective places from Margate, by the line of road along the Coast to Southampton, by which, Hastings is 68 miles from Margate, & Brighton 50 from Brighton: the distance of Hastings is 58 miles, and 50 from Brighton by the inland road.

E. Grinstead, is 15 m. *from Tunbridge Wells, by way of Hartfield*, 4½ *Withyham*, *Hartfield No. 738 is on a line of road to Brighton, diverging from that to Lewes at New Chapel Green* 2½ *from London*, *and continued by No. 810 &c. noted with a § on the following page. Mayfield No. 744 is 13 W. by S. of Uckfield No. 737, and 14 from Tunbridge Wells. Withyham No. 741 is on a line of road from Frant No. 740, by way of Horsebridge to Eastbourne, Nos. 770, 771, &c. Horsted Keynes, is 3 S. by W. of Wych Cross, see Note at head of following page.*

The Estimates of the Annual Value of the Real Property assessed to the Property Tax in April 1815, amount to £144,072 4s. 11d. The Number of Acres charged with Houses, Gardens, Orchards, Arable, Meadow, Pasture, Woods, Coppices, Underwoods, Plantations, Roads, Waste, Barren Land, Rivers, Lakes, Canals, Churchyards, &c. is 4,111.

Topographical Position, POPULATION, &c., &c., of all the Towns, Parishes, Hamlets, Parochial Chapelries, &c., &c., in the County of *SUSSEX*,—Continued. Rapes of Pevensey, and Lewes. Southbourne, and Beachey Head, are about a mile South of Eastbourne.

BEACHY HEAD, one of the prominent land marks of the English Channel is in Lat. 50 41 N. or 0 48 S. and 0 20 W. of St. Pauls London, which makes the mean distance of Eastbourne, from the Bridges about 55 miles; the distance by the line of road through Uckfield &c. being 59½, and by Tunbridge Wells, and Mayfield 62 miles

NEWHAVEN, at the mouth of the river OUSE, is 7 miles S. of Lewes, by the places noted with a †, the road to Brighton from Lewes being by Falmer No. 821.

MOCKBRIDGE, No. 799, is on the road diverging from Horsham to Brighton, by Cowfold, No. 843, continued from Woodmancote, No. 850, by Terryscross, and Saddlescomb; and Chailey, and Chailey Inn, Nos. 809, and 818, are on another line to Lewes, diverging from Wych Cross, 2½ S. miles of Forest Row, (see No. 738,) by Dane Hill, and Sheffields Green, continued from Chailey by Cooks Bridge, and Offham Street.

The river OUSE, which rises 5 or 6 miles N. N. W. of Lindfield No. 48 runs past Fletching, and Isfield, Nos. 750, and 755, to Barcombe No. 19, from whence it forms the boundary between the Rapes of Pevensey, & Lewes, falling into the English Channel at Newhaven, No. 817 : at Isfield it is joined by another stream from Uckfield. The Parish of St. Thomas-at-Cliffe part of the Town of Lewes, is on the Pevensey side of the Ouse

HORSEBRIDGE—see Nos. 790 & 776, is 55 m. from London, on the road through Hartfield, Frant, No. 740 ; through Mayfield, 743 ; and 59½ by that diverging from Uckfield through Little Horsted & E. Hoathly, Nos. 751-6, the latter forms the general line of Road to EASTBOURNE, by the Places noted with a ‖ in the Table, and Rodmell, No. 813, is on the Road to Brighton, by way of Lewes, Ringmer, and Laughton.

Nos. 843–4, form the Hundred of Windham and Ewhurst, and Nos. 871 and 873, each form a separate Hundred; *Fittleworth*, No. 897, is in the fork of the River Rother and Ock, (see Note at Head of the following Column) and on the Road from Petworth to Arundel, by Coldwaltham and Bury; *Wisborough Green*, is on the Road from Guildford to Brighton, 5½ miles South of Alford,—see No. 263, and Note thereto, continued from Wisborough Green, by Hadfoldherns, Danehill, Warminghurst, No. 841, Ashington, No. 847, and Wiston, No. 852, to Steyning, No. 854, dis. of Steyning from Guildford 32 miles, and from Brighton 10 miles, making the distance of Guildford from Brighton 42 miles: By the Road along the Coast, the distance from Brighton to Margate, is, as the Diamond figures represent 105 miles, but by another line of Road, by Lewes, Ringmer, Cross in Hand, Burwash, Etchingham, and Hurst Green,—see Nos. 708–12, continued by Hawkhurst, Cranbrook, Smarden, &c., *(see Note to Nos. 528, &c., in Kent,)* it is only 87 miles; Margate, being in Longitude 1. 32 East, and Brighton 11 West, the mean Longitude between the two places, is 72 Statute miles, at an angle of 46 Statute miles South; the distance of Brighton from Tunbridge Wells is 30 miles by way of Lewes, Uckfield Pound Gate, and Erdge Greer

Topographical Position, Population, &c. &c., of all the Towns, Parishes, Hamlets, Parochial Chapelries, &c. &c., in the County of *Sussex*, Continued.—Rapes of Arundel and Chichester.

The following page contains a Summary of the Totals of each Rape, and the three principal Towns; and also a Statement of the Total Number of Marriages, Baptisms, and Burials, in the 40 Years 1780 — 1820, which exhibit results equally curious, interesting, and important. The press of Population into the Rape of Hastings, and into Brighton, and other Towns deserves attention: in the other Rapes the balance of increase of Population will be seen to be less than the excess of Baptisms over Burials.

*The Rape of ARUNDEL, is intersected by the Arun River, which is formed of two Streams; The Rother, rising near Petersfield, in Hampshire, which runs past Trotton, (No. 944,) and Midhurst, from whence it is Navigable: The other, called the Ock, rises near Ockley, in Surrey, No. 213, and runs past Wisborough Green, and Stopham, Nos. 889 and 896, to Fittleworth, where the two Streams unite; from thence past the places noted * and ‖ to Little Hampton, where it falls into the English Channel.*

‡ Midhurst, *No. 953, is 40 miles East of Petersfield, in Hampshire, and 5½ West of Petworth, it is on the line of road from London, see No. 280, in Surrey, to Chichester and Bognor, by the Hamlet of Haselmere,—see No. 280, in Surrey, to Chichester and Bognor, by the places noted with a †: By this line, Bognor, No. 980, is 69 miles from London; but by Dorking, in Surrey, Nos. 209, 375, 8c., noted with a ‡, the distance is only 663 miles, being 6¾ from Arundel, by Yapton and Felpham, Nos. 922—7: It is the same distance by another road, diverging from the Direction Post on Upperham Common, No. 964, continued by Eartham, and Westergate.*

No HOPS in this part of the COUNTY

Topographical Position, Population, &c. &c. of all the Towns, Parishes, &c. &c. in *SUSSEX*,—Concluded.

In addition to the Six Parishes in the City of Chichester, the Population of which in 1821, *are separately enumerated in the Ecclesiastical Index, the City further contains the Parishes of All Saints, otherwise the Pallant, with* 294 *Inhabitants; St. Bartholomew, with* 396 *Inhabitants; The Close Precinct, with* 145 *Inhabitants; and New Town Extra Parochial, with* 92 *Inhabitants; making with the Six Parishes enumerated as above mentioned a Total Population of* 7,362. *The Parish of St. Mary Hospital, specified in the Ecclesiastical Returns, is not noticed either in the Population or Parochial.*

The Rape of *Chichester* forms the Western extremity of the Co. of Sussex, bounded on the W. & N.W. by Hampshire, by Godalming, Hundred of Godley, Surrey; Linchmere, No. 282, in Surrey; and Hasleinere, No. 280, in Surrey. The City of CHICHESTER is 62 m. S. S. W. of London, by way of Godalming, 64 by Farnham, and 66 by Petersfield; it is 10 m. W. of Arundel, 12 S. S. E. of Petersfield, 14 S. by E. of Midhurst, 15 S. by W. of Horsham, 16 S. by E. of Billingshurst, 17 S. by W. of Guildford, and 18 S. by E. of Godalming. The Canal has the advantage of being Navigable to the Sea. The Hundred of Manhood and Selsey, Sessions House, and Gaol for the County, are in the City of Chichester. Haven on the N. W. Thorney, No. 205, is an island in Chichester Haven.

Area, or Superficies, in Statute Acres,

THE ANNUAL VALUE OF REAL PROPERTY,

As assessed to the Property Tax in 1815;

THE

Amount expended for the Maintenance of the Poor,

In the Year ending the 25th of March, 1829;

AND THE

TOTAL NUMBER OF PERSONS

AT EACH OF THE FOUR PERIODS OF

1801, 1811, 1821, & 1831,

IN EVERY

COUNTY, HUNDRED, DIVISION, CITY, TOWN, PARISH, CHAPELRY, HAMLET, TITHING, LIBERTY, AND EXTRA PAROCHIAL PLACE IN ENGLAND;

ARRANGED ALPHABETICALLY,

With Numbers of Reference to the preceding District Arrangement, to which it serves as an Index.

AN ACCOUNT of the SUPERFICIES; ANNUAL VALUE OF PROPERTY, according to the Property Tax Returns of 1815; the amount expended for the MAINTENANCE of the POOR, in the Year ending the 25th. March 1829; and the Total Number of PERSONS at each of the 4 Periods, 1801, 1811, 1821, and 1831, in every County, Hundred, Division, City, Town, Parish, Chapelry, Hamlet, Tything, Liberty, and Extra Parochial Place, of GREAT BRITAIN, arranged alphabetically as an Index to the District arrangement of the preceding 6000 Towns and principal Parishes of ENGLAND and WALES. The Numbers in the Column of Places refer to the Number of the Place in the District Arrangement, by which the *Locality, Relation, Circumstance, and Condition,* of every place in the Kingdom is determined with a facility and precision never before accomplished either by Description, Map, or otherways.

In the District arrangement of the four Counties of Middlesex, Surrey, Kent, and Sussex, commencing at page 76, every Town, Parish, and Place in those 4 Counties is exhibited, and the Nos. 1 to 994 are repeated; the repeated Nos. therefore, in the Alphabetical Arrangement which refer to the places in those four Counties are preceded by an *. The figures 1 to 9 preceding certain places imply is being a Post Town or Station having a Deputy Postmaster in the Post Office Division which the figure denotes: that Establishment for superintendance of conveyance being formed into 9 Divisions. The Market Towns are printed in SMALL CAPITALS, the initial letters which follow, denoting the days on which the Markets are held; and those places which make a weekly return of the average price of Grain are noted with an *. The Cities and Ecclesiastical Sees are printed in Old Roman.

The Old Cities and Boroughs returning two Members to Parliament ..... are preceded by † †
do. do. do. one Member to do. ..... do. do. †
Those formerly returning two, now only one do. do. ..... do. do. ‡ †
The New Boroughs returning two Members to Parliament ..... do. do. ‡
do. do. do. one Member to do. ..... do. do. †
The Disfranchised Boroughs are preceded by ‡ ‡; The Polling Places for County Members ..... do. do. ¶
The Towns at which Sittings are held for collecting of Excise Duties are followed by a †; those at which Fairs are held by a §
The Sea Ports having Custom Houses are preceded by ‖ Discrepancies in the Numbers of the Population are noted by an *

The Chapelries, Hamlets, Tythings, Liberties, and Extra Parochial Place are all expressed by the respective abbreviations of Chap., Ham., Tyth., Lib., and Ex. Par. The Townships are expressed by the adverb (in) as Abbotside; the (in) implying that it is a Township in the parish of (Aysgarth) 4233; where nothing in addition to the name of the Place is expressed, it implies that it is an entire Parish; where the word (next) appears, it implies adjoining the Place to which the Number refers; and when the word (near) appears, it implies the nearest place to which the reference can with propriety be given; where the names of Places are printed in the figure columns, they imply that the Superficies, Property, Maintenance of Poor, or Population respectively, is included therewith. The Figures within a ( ) denote the Number of Townships or Hamlets, &c. which the Parishes to which they are affixed respectively contain.

AN ACCOUNT

OF THE

Annual Value of Real Property, as Assessed to the Property Tax in 1815,

Amount expended for the Maintenance of the Poor

For the Year ending 25th March, 1829,

AND THE

TOTAL NUMBER OF PERSONS

At each of the Four Periods, 1801, 1811, 1821, & 1831,

IN EVERY COUNTY, HUNDRED, TOWN, PARISH, CHAPELRY, HAMLET, &c., &c.,

IN THE

Principality of Wales,

arranged alphabetically as an Index to the District Arrangement at pages 11, 13, 14, 20, 30-31, and 70-74; the Rectories, Vicarages, and Chapelries, or Curacies, are distinguished by their respective Initials; the four Ecclesiastical Sees being printed in Old Roman, and the Market Towns in SMALL CAPITALS, with the initial letter of the day on which the Markets are held, as described in regard to England at page 91.

Previous to the change in the Constitution of Parliament in 1831, the 12 Counties of Wales each returned one Member; the County of Pembroke two for Boroughs, Merioneth none; and the other 10 Counties one each: under the Act of 1831 an additional Member was given to the Counties of Carmarthen, Denbigh, and Glamorgan; and Swansea and Merthyr-Tydvil were created New Boroughs, and some places added to some of the other Electoral Borough Districts. The 14 Electoral Districts each returning one Member are numbered in the following order,—*Viz.*

1 Beaumaris	4 Cardigan	7 Denbigh	10 Merthyr-Tydvil	13 Radnor
2 Brecon	5 Carmarthen	8 Flint	11 Montgomery	14 Swansea
3 Cardiff	6 Carnarvon	9 Haverfordwest	12 Pembroke	

the connected places of each Borough being exhibited under their respective heads; the places newly added being noted with an * and each place in its alphabetical order being noted with a † and a Diamond Figure denoting the Number of the District to which it belongs; the Polling places for the County Members are noted with a ¶ as in England. The Figures in ( ) affixed to the Hundreds imply the Number of Parishes therein; and where affixed to a Parish the Number of Townships or Hamlets, &c., therein.

A DISTRICT ARRANGEMENT

OF THE NINE HUNDRED AND SEVENTY PARISHES, &c., OF

Scotland,

Numbered in consecutive order from 1 *to* 970;

SHOWING THE LOCALITY AND RELATION OF EACH PARISH, TOGETHER WITH THE SUPERFICIES OF EACH, EITHER IN STATUTE ACRES OR IN LENGTH AND BREADTH; THE NUMBER OF **INHABITED HOUSES** IN EACH IN **1801** AND **1821**, AND THE NUMBER OF **FAMILIES** IN EACH AT THE LATTER PERIOD, SHOWING THE PROPORTION RETURNED TO PARLIAMENT AS BEING EMPLOYED IN

AGRICULTURE,

DISTINCT FROM THOSE EMPLOYED IN

Trade, Manufactures, or Handicraft,

And those not included under either of the two preceding heads;

And the TOTAL NUMBER of PERSONS in each Parish at each of the three Periods 1801, 1811, and 1821.

WITH NOTES TOPOGRAPHICAL AND HISTORICAL.

ACCOMPANIED BY AN

Alphabetical Arrangement

WITH NUMBER OF REFERENCE TO EACH PARISH IN THE DISTRICT ARRANGEMENT (TO WHICH IT SERVES AS AN INDEX), SHEWING THE

ANNUAL VALUE OF REAL PROPERTY IN EACH PARISH,

As Assessed to the Property Tax in 1815.

And the TOTAL NUMBER of PERSONS in each in 1755 and 1798,

And as returned to Parliament at each of the four periods

1801, 1811, 1821, 1831,

THE CITIES, BURGHS, ELECTORAL DISTRICTS, POST TOWNS, SEA PORTS, &c., &c.,

All being distinguished by characteristic Notations, as particularized at page 231.

Wanlockhead, No. 24, celebrated for its Lead Mines is in the Parish of Sanquhar, and the Population prior to 1821 was included therewith; it is 8 miles N. E. of the Town of Sanquhar. Nos. 38 — 9 are on the road from Carlisle to Edinburgh, by way of Hawick and Selkirk, see Nos. 141 and 174.

			Superficies, in Acres.	Number of Inhabited Houses in 1801.	Number of Families in 1801.	Number of Persons in 1801. Proportion Chiefly employed in Agriculture.	do. in Trade Manufactures, or Handicraft.	All others, not included in the two preceding.	TOTAL	Total Number of Persons, in 1811.	Number of Inhabited Houses in 1821.	Number of Families in 1821. TOTAL	Proportion Chiefly employed in Agriculture.	do. in Trade Manufactures, or Handicraft.	All others, not included in the two preceding.	Total Number of Persons in 1821.	No. to facilit. reference.
These 6 Parishes are on the North Shore of the Solway Frith, and on the direct line of road from London to Portpatrick; the figures denoting the distance from LONGTOWN, (on the border of Cumberland) which is 9 m. N. of CARLISLE.	1	Graitney, Gretna Green	4½		299	321	157	131	1,477	1,765	1,749	350	373	166	169	38	1,945	1

These 2 Counties formerly constituted the District of GALLOWAY, *and during the possession of Britain by the Romans, formed part of the Province of* VALENTIA. *The Mull of Galloway, which forms the extreme S. W. point of Scotland, is in Latitude 54 39 North, parrallel with Donaghadee in Ireland, 4 59 West of Greenwich Observatory, and 1 45 West of Edinburgh; Steam Packets sail daily from Portpatrick to Donaghadee, the passage in a direct line is about 21 miles; the Cree Water which falls into the head of Wigton Bay forms the boundary between Wigton County and Kircudbright.*

Stewartry, or County of KIRCUDBRIGHT.—The figures preceded by an * denote the distance of the respective places from Longtown, on the direct line of road from thence, by Annan, and Dumfries, to Portpatrick. Nos. 69–72, form the North part of the County, bounded N. W. by the district of Carrick, Ayrshire; and N. E. by the upper part of Nithsdale. New GALLOWAY on the W. bank of the river *Ken*, is 24 miles W. by N of Dumfries, 19 North of Kircudbright, 17 E. N. E. of Newton Stewart, 83 S. S. W. of Edinburgh, by way of Minihive, Thornhill, and Duresdeer, Nos. 16, 20, & 21, and 65 due S. of Glasgow, by way of Carsphairn, Dalmellington, and Mauchline, Nos. 72, 102, and 110.

These 7 Parishes (Nos. 73–79) form a promontory terminated by Burrow Head, in Lat. 54 40 Nth., and 4 24 W. Long., bounded by Wigton Bay on the East, and Luce Bay on the West; No. 79 is on the Shore of Luce Bay.

No. 83 forms a promontory terminated by the Mull of Galloway; bounded on the W. by the North Channel, and E. by Luce Bay: Nos. 93-9 form another promontory, bounded by the North Channel on the West, and *Loch Ryan* on the East, at the head of which is the Town of STRANRAER. Portpatrick is the Packet Station for conveying the Mails from the North of England and Scotland to Ireland; it is 154 miles S. W. of Edinburgh, by way of Dumfries, and 99 S. by W of Glasgow, by way of Ayr, Maybole and Girvan, see No 92.

The County of ROXBURGH, is bounded on the S. E. by the Cheviot Hills so celebrated in History and Song, and which form the N. W. boundary of Northumberland. The Teviot river, see Note to Nos. 146, &c. formerly gave the name of Teviotdale to the whole of the County of Roxburgh, which County, from its highly picturesque and romantic Scenery, its contiguity to the English border, the fertility of its Valleys, and its once splendid Abbey of Melrose, will suffice to account for its prominence in Poetry, Tradition, and History. It is a postoral, rather than either an Agricultural or Manufacturing District.

Topographical Position, POPULATION, &c. &c., of each Parish of SCOTLAND.—*Counties of SELKIRK and PEEBLES.*

By an Act of 1831, *the Counties of SELKIRK, and PEEBLES are to return one member to Parliament. The Parishes of Selkirk, & Galashiels extend into Roxburghshire, while part of the Parish of Stow, entered wholly in Edinburghshire, and part of Ashkirk, and Roberton, entered wholly in Roxburghshire, extend into Selkirk, as does part of Inverleithing entered wholly in Peebles.*

The County of Selkirk was formerly called the Sheriffdom of ETTERICK FOREST, *intersected by the* Etterick, & Yarrow Waters, *celebrated in Scottish Song, the two Streams unite near Selkirk, and fall into the Tweed near Gaslashiels. The County of Peebles was formerly designated* TWEEDDALE, *it is bounded on the W. wholly by Lanarkshire, N. by Edinburghshire, E. by Selkirk, and S. by Dumfriesshire.*

Galashiels, at the entrance of the GALA Water *into the Tweed, is* 18 *mi. E. of Peebles,* 30 *N. N. E. of Edinburgh, and is partly in Roxburghshire, —see No.* 171, *§ Note above.*

Ettrick Kirk is about 14 *miles E. N. E. of Moffat.*

PEEBLES, on the N. bank of the *Tweed*, is 22 miles S. of Edinburgh. The places noted by an * are on the road from Moffat to Edinburgh, and those by a † on another line, diverging from Glenholm. Linton is 16 m. S. by W. of Edinburgh. The river TWEED rises in Tweedsmuir, and runs through Stobo and Lyne to Peebles, where it is joined by the *Lyne Water* from N. of Linton, see Nos. 281-2.

Coldstream and *Gre. nlaw* are on the line of road from Wooler to Edinburgh, 43 miles S. W. of Berwick, and 43 miles N. N. W. of Coldstream. No. 196 is on the N. bank of the Tweed. Nos. 201, & 203, to 210 are in the fork of the Black, and White Adder rivers, the former rises near Westruther and runs past Greenlaw, and the other rises near Polwarth, and runs past *Edrom*, which rises in the *Lammermuir Hills* see note at head of following Column runs into the Tweed near Melrose, through Nos. 197-200, which form the dis. of *Lauderdale*

The river TWEED, see note to Peebles County, after running past Galashiels, Melrose, St. Boswells, Maxton, Makerston, and Kelso, to Coldstream, and from thence in a direction E. N. E. for 14 miles to Berwick, where it falls into the North Sea; divides Northumberland from the County of Berwick.

The County of Haddington, formerly called EAST LOTHIAN, is divided from Berwickshire by the LAMMERMUIR Hills, N. and S. of which Hills, Agriculture is carried to as high a degree of perfection, as in any part of Great Britain. Coldstream No. 192 is 31 miles N. E. of Hawick, No. 141, by way of Cryaling, Eckford, and Kelso No. 161, the latter dis. 8 miles, and 14 W. S. W. of Berwick. DUNSE is 10 miles due North of Coldstream and 25 S. S. E. of Haddington, by way of Longformacus dis. 6 miles.

The County of Lanark, or CLYDESDALE, is the most populous and important District in Scotland, and the City of GLASGOW, seated on the North bank of the Clyde, near the N. W. extremity of the County, next to London, is the most populous, and important City in Great Britain; in addition to the advantages which it derives from the Navigation of the Clyde, which affords it the utmost facility of intercourse Westward, it has the advantage of a Canal to the Frith of Forth, which affords it great advantage of intercourse with the Ports in the North Sea, the Baltic, and British Channel, see following page.

TOPOGRAPHICAL POSITION, POPULATION, &c., &c., of each Parish of SCOTLAND.—*Counties of* RENFREW, DUMBARTON, *and* BUTE.

The County of Renfrew, or STRATHGRYFE, *may be regarded as an appendage to the City of Glasgow, the Abbey Parish of Paisley, contributing to its Manufacturing, as do Port Glasgow, and Greenock to its Commercial Interest. The* White Cart *river, which rises in Ayrshire, runs past Paisley, and Renfrew, below which it is joined by the* Gryfe *from the West, which gave the former name to the district, the united Streams falling into the Clyde at Inchinnen. Glasgow, which previously returned one member to Parliament jointly with Dumbarton, Rutherglen, and Renfrew, is, separately by an act of* 1831 *to return two members; and Paisley, and Greenock, one each.*

The County of Renfrew, is bounded on the West, by a tongue of land forming the Northern extremity of Ayrshire, see note to No. 137 &c., except Innerkip, No. 334, which is 6 miles S. by W. of Greenock and bounded by the head of the Frith, & mouth of the Clyde. No. 336 is 13 miles W. by S. of Hamilton, and the same distance N. E. of Kilmarnock, see note to Nos. 120 &c. The village of Innerkip is 8¼ miles N. of Largs, see note to No. 129, Largs No. 137 is about 4 m. W. of Lochwinnoch.

*** Parts of Nos. 132–3, and 328, are in Renfrew, while No. 334 is partly in Lanarkshire. The Total of 1811 includes the first or West Regiment of Local Militia to the Number of 972.

The County of Dumbarton is formed of 2 narrow slips of land, one running East of the Town of Dumbarton to Cameion, a distance of about 30 m., and the other about the same dis. North between *Loch Lomond* on the E. and *Loch Long* on the West.

The *Canal* from the Forth to the Clyde intersects the Eastern Slip, uniting with the Clyde in the Parish of Kilpatrick, see Note below.

No. 349 is 7 miles N. of Airdrie 323, 8 N. W. of Kilsyth 392, & 10 W. of Falkirk, see note to 380. Roseneath forms a Promontory bounded by Loch Long, on the W. & *Loch Gare* on the East.

The Isle of Arran is in the Frith of Clyde between the promontory of Cantyre on the W. and the Coast of Ayr on the East. Bute is at the S. extremity of the District of Cowal, see Notes to Nos. 848, and 857. The Isles of Little and Great Cumbrae, lie between Bute, and the Coast of Largs, see Note to 137 &c.

Previous to 1831, the County of Bute returned one member to Parliament alternately with Caithness, but by a Bill of that Session it was proposed that Bute should return one member jointly with the Co. of Dumbarton.

The Canal from the Frith of Forth to the Clyde was began in July 1768, and completed in July 1790, its length from Carron Mouth in 381, to Dalmuir-burnfoot 6 miles N. W. of Glasgow, is 35 miles; its summit level is 160 feet above the waters of the Forth, and Clyde, ascended by 20 Locks from the former, and 10 from the latter; it is carried over the *Kelvin* River by an Aqueduct 420 feet in length, and 65 in height, forming a beautiful and interesting object of art. The Locks admit 8 feet draft, 19 of beam, and 73 of length, a collateral cut from Port Dundas, runs past Glasgow to Airdrie, having an elevation of 156 feet by 10 Locks.—see No. 223.

The County of STIRLING, is part of the ancient District of LENNOX, *and forms the connecting link of the two great Divisions of the Lowlands and Highlands of* SCOTLAND; *It is endeared to the affections of all sensitive minds, by a succession of interesting events through a period of Twenty Centuries; It checked the progress of the Roman Arms, and constituted a formidable barrier to their Conquests in Britain; it was here, the Romans formed a chain of Forts and a Wall, as a line of defence against the incursions of the Inhabitants of the Highlands, and of the Picts, nearly parallel with the Canal that now unites the Atlantic Ocean with the North Sea, as described on the preceding page.*

The County of FIFE, forms a Peninsula bounded by the River, and Frith of Forth on the S. and S. W. to Fife Ness *in the Parish of Crail, No. 466, its extreme S. E. point in Lat. 56 17 N., and 2 0 W. Long. From Fife Ness to Port in Craig, No. 476, it is bounded by the North Sea, the Coast being indented by St. Andrews Bay, into which falls the River Eden,—see Note to Nos. 467 &c.; from Newburg, No. 446, to Port in Craig, it is bounded in a direction N. N. E. by the Frith of Tay, and on the W. by Perth and Kinross shires; Its insulated position in conjunction with the general fertility of its soil, have in all periods of the Hist. of Scotland, given it an importance equal to any part of the Kingdom.*

The River TAY, which forms so distinguishing a feature in the Topography of Perthshire, has its source near Tyndrum Inn, 52 *miles N. W. of Stirling on the road to Fort William, and near the head waters of Loch Lomond; it is first called the* FILLAN: *about* 7 *miles S. E. of Tyndrum Inn it forms a small Loch called* LOCH DOCHART, *and the Stream from thence for about* 10 *miles in a direction E. N. E. to Killin No* 556 *is called the Dochart: at Killin commences* LOCH TAY, *which runs for* 16 *miles in a direction N. E. to Kenmore No.* 541 *varying in breadth from* 1 *to* 2 *miles, receiving near Dull No.* 558, *the tributary waters of the river* LYON: *at Kenmore the river Tay commences and runs N. E. to Logierait,* 552, *where it receives the Waters of the* GARRY, *and other tributary Streams from the Northern extremity of the County: from Logerait it takes a direction S. E. to Kinclaven No.* 558, *note to which, as well as to* 494 &c., *see, for its confluence with the Frith, and the Sea.*

These sixteen Parishes are bounded on the N. E. by the S. W. point of Forfarshire. The river *Ista* from near Forfar to the Tay above Cargill, bounds Cupar, & Meigle on the N. W.; and from Cargill the river and Frith of Tay in a Horse-shoe course bound the remaining Parishes on the West and South, forming them into an insulated District, the former importance of which may be inferred, from SCONE having been the Capital of the PICTS, and subsequently the seat of Government of the Scots under Kenneth II. in 834.	494 Kinnoul .. 1 *S. The North Esk River rises 10 to 12 miles N. W. of Loch Lee No. 614, from whence it runs S.E. to Edzell, and from thence past Strickathrow Nos. 609-10, it forms the boundary between the Counties of Forfar, and Kincardine, (or as they were formerly called Angus, and Mearns.) falling into the North Sea midway between Montrose, and St. Cyrus. The West Water, from near Clova, running past Bethnot and the Cruick Water from Fearn, both fall into the North Esk near Strickathrow. STONEHAVEN is partly in the Parish of Dunnotter but chiefly in Fetterosso, it is the Assize Town of the County.															
The County of Kincardine is of a triangular form bounded on the West for about 25 miles by the N. East part of Forfarshire. Nos. 610—14, on the N. for about the same distance by the River DEE, which separates it from the Dist. of Aberdeen Nos. 649-50, having on the remaining side upwards of 40 miles of Coast in a direction N. N. E. from the mouth of the North Esk, to GIRDLE NESS, *the S. point of entrance to the river Dee. The Coast road distance from Montrose to Aberdeen at the mouth of the Dee by Inverbervie, & Stonehaven is 39½ miles. The dist. from Brechin to Aberdeen by Laurencekirk, & Stonehaven is 34½ miles. Nos. 616-20, are all on the Sea Coast, and Nos. 631-3, are on the South bank of the Dee Banchory Ternan 630, is on the North side of the river, 3 miles N. E. of Strachan, and 16 N. W. of Stonehaven. Part of ABERDEEN.																
This District forms the S. W. point of Aberdeenshire, and includes the FORESTS OF MAR, & MORVEN, and is intersected by the river DEE, which rises on the border of Inverness, 20 miles West of Braemar, and in a direction nearly due East to Aberdeen. Braemar, Glenmuick, & Birse, are on the South side of the River, the small figures following Nos 635-9, denote the distance of the respective places West of Aberdeen. Kincardine O'Neil, is 29 miles North of Brechin, by way of Marykirk, and Fettercairn Nos. 625-6. Loggie Coldstone, comprises a considerable part of Morven Forest.	635 Braemar[56] & Crathie[17]		490	493	754	60	1,062	1,876	1,965	468	472	200	48	224	1,897	635

Topographical Position, POPULATION, &c. &c., of each Parish of SCOTLAND.—*Part of the County of ABERDEEN.*

This part of the County of Aberdeen, may be regarded as mainly Agricultural, and as having undergone considerable improvement since 1811. In the three Years, 1824, 5, & 6, upwards of 130,000 Quarters of Oats, and Barley, the Surplus produce of these Districts, were Shipped Coastways from Aberdeen. The Rivers Dee, and Don, fall into the North Sea, within two miles of each other. Old Aberdeen, or St. Machars being South of the Don, and New Aberdeen North of the Dee on the North bank of which river a Pier of 1200 feet in extent has been constructed, and thereby formed the mouth of the river into a commodious Harbour for Ships of the largest burthen.

		Superficies in Acres, or length & breath.	Number of Inhabited Houses in 1801.	Number of Families in 1801.	Number of Persons in 1801. Proportion chiefly employed in Agriculture.	do. in Trade, Manufactures, or Handicraft.	All others, not included in the two preceding.	TOTAL	1811. Total Number of PERSONS.	Number of Inhabited Houses in 1821.	Number of Families in 1821. TOTAL	Proportion chiefly employed in Agriculture.	do. in Trade, Manufactures, or Handicraft.	All others, not included in the two preceding.	Total Number of PERSONS.	Number to facilitate reference.
This District is bounded on the East, by that of Ellon, and West by Alford. Nos. 659-60, are on the road from Aberdeen by Huntly, and Keith, to Fochabers; Oyne 664, is 32 miles due N. of Montrose by Banchory Ternan, and Ebt Nos. 630, and 642, the latter dis. 15 miles. Nos. 666-7, adjoining Clunie 646, are South of the Don; all the other Parishes being North of that river. Old Meldrum is 18 miles N. N. W. of Aberdeen, on the road by Fyvie, and Turreff to Banff. Nos. 668-73, are inter sected by the *Premnay*, and *Urie Waters*, which unite between Oyne, and Old Rayne & fall into the Don at Inverury. The Chapelry of Garioch, which gives name to the district was the field of conflict between the Earl of Mar, and Donald Lord of the Isles in 1411.	659 Kintore	12 *N. The Caledonian Canal, *which unites the Waters of the Atlantic Ocean with the North Sea, is* 50½ *miles in extent, in a direction N. E. from Fort William, at the head of Loch Eil, to the Murray Frith at Inverness. It is* 20 *feet deep,* 50 *wide at the bottom, and* 110 *at the surface. The Locks, of which there are* 12, *between Fort William, & Loch-Oich, which is the summit level, at an elevation of* 90 *feet, are* 20 *feet deep,* 40 *wide, and* 170 *in length. From Loch Oich to Inverness, there is a descent of* 94 *feet by* 13 *Locks. Lochs Ness, on the N. E., and Lochy on the S. W., with Loch Oich form* 37 *miles of the line, & natural rivers upwards of* 20 *m re. The Cost since* 1804, *up to May* 1829, £ 983,359.															
The Isle of SKYE, is separated from the Parish of Glenelg, by a Strait about a mile across. The Village of Glenelg, on the Shore of the Strait, is 43 miles West of Fort Augustus. Duntulm Point, on the South side of the Island in the Parish of Sleat, about 10 miles West of the Strait, is in Lat. 57 9 N., and 6 14 of West Longitude. Dunvegan, in the Parish of Duirnish, the extreme S. W. point of the Island, is in Lat. 57 31 N., and 6 42 of W. Lon.. A Post communication is maintained, between the Isle of Skye, & Inverness, diverging from the Mail Coach road to Tarso, at Dingwall, from whence letters are conveyed 4 times a week on Horseback, by Comin, Garve, Auchnasheen, & Loch-Carron, to Lochalsh; from whence the communication is continued by a Foot Post, by *Kyleakin Ferry* over the entrance to Loch Dunech, to Strath, Sconser, and Dunvegan; from whence a Boat sails weekly to North Uist; from Sconsar another Foot Post diverges by Port Ree, and Snizort, to Totternish the extreme N. W. point of the Island. HARRIS, is the S. part of the Isle of Lewis, see Nos. 828-32, joined thereto by a very narrow Isthmus, in Lat. 57 51, from which line Nos. 795-8, extend S. about 1 degree of Lat. between 7 5, & 7 35 of West Longitude. EIGG, or EGG, No. 789, is off Arasaig, the extreme S. W. point of the mainland part of Inverneasshire, about 25 miles S. of the Village of Glenelg, but intercepted by Loch Nevish : & about 40 miles due W. of Fort William; it has the Isle of Rum, on the N. and Muck on the S. and is in Lat about 56 55 N. & 6 5 of W. Longitude,—see Nos. 966-7.	787 Sleat ... *S. E.*	17 by 3½	310	317	940	161	862	1,903	1,936	459	476	420	37	19	2,608	787

There is a foot Post daily, both from Wick, & Thurso, to Howna Inn, from whence letters are conveyed three times a week to S. Ronaldshay, Lerwick, & Stromness.																	
The Coach road to Thurso runs parrallel with the E. Coast from Golspie to Wick, from whence it makes an angle N. W. through Watten, leaving Halkirk, on the W. and Bower, Canisby, Oirig, and Dunnet on the East. Reay, is partly in Sutherlandshire, & is, as well as all the otherplaces noted with a †, on the N. Coast between Cape Wrath, and Duncanisby Head. see note at head.			The degree of Longitude in the Latitude of the North Coast of Scotland, is 31 Geographical miles, hence, the mean extent in Statute miles, between Cape Wrath and Duncanisby Head, as stated in the Note at head.

Knapdale forms an insular district bounded on the S. by W. Tarbet Loch and the isthmus of Tarbet, and on the N. by the isthmus of Crinan, having Loch Crinan on the W., and Loch Gilp on the East; a Canal is cut through this isthmus about 6 miles in extent, which opens a communication from the Firth of Clyde by Lochs Fyne & Gilp, into the Atlantic Ocean; Loch Gilphead, is 22 miles S. S. W. of Inverary, and 15 North of Tarbet, which makes the road distance from Inverary to Campbeltown 72 miles.	928 Knapdale		473	473	1,166	—	—	2,401	2,184	418	419	321	83	45	2,654

The passage from Oban over the Island of Kerrara to Auchnacraig on the E. Coast of Mull is 7 m.; from thence is a road in a direction N. W. to Nos. 959–61, the figures to which denote the distances from Auchnacraig. TOBERMORY the principal Sea Port of the Island is in the Parish of Kilminian, on the Shore of Loch Sunart opposite to Ardnamurchan; the sound of Mull separates the Island in a direction from S. E. to N. W. from the District of Morvern. Kilfinichen, No. 962, comprises all the South part of the Island, and includes the Island of *Icolmkil*, so interestingly expatiated on by Dr. Johnson, off the extreme S. W. point.	959 Torosay 14	12 Square	328	331	462	55	1,247	1,764	2,114	340	340	217	123	—	2,288

☞ *The Post Communication of Argyle, with the Mainland of Scotland, is maintained,* 1*st., by a Horse Post daily from Glasgow to Inverary; from Inverary there is a Horse Post three times a week, S., to Lochgilphead, Tarbet, and Nos.* 923–5, *to Campbelton dis.* 72 *miles; & N., by Dalmally to Bunawe: from Bunawe, a Foot Post* 3 *times a week, is continued to Appin No.* 956, *from whence a Horse Post* 3 *times a week by Ballachulish, dis.* 7 *miles N. E. of Appin to Fort William: another Foot Post three times a week, diverges from Bunawe, by Oban to the Slate Quarries, at Easedale Isle, and another from Oban to Bunnessan and Croto, the extreme S. and N. W. points of MULL: from Croto there is a Boat once a week to Tiry Isle, and three times a week across the Sound of Mull to Morvern No.* 969. *From Lochgilphead, is another Foot Post* 3 *times a week across the Isthmus of Crinon to Ballonach, from whence a divergance N. by Crinan and the S. end of Loch Awe to Dalavish and Melford, & the Coast opposite to the Islands of Shuna and Luniva, S. of Easdale,—see Note to No.* 951, &c.; *and another divergance S. from Ballynoch,* 12 *miles to Keils Ferry over the Sound to the Isle of Jura, and from thence over the Sound to Port Askaig, Kilmeny, Bridge end, and Bowmore, in the Isle of Islay; From* PORTNAHAVEN *at the extreme S. point of the Western Promontary of Isla,* 14½ *miles S. W. of Bridge end, there is a frequent communication with the N. of Ireland; from Coran Ferry, over Loch Fil* 4 *miles N. of Ballachulish on the road to Fort William, there is another Foot Post* 3 *times a Week to Loch Moidart and Strontian, in the District of Ardnamurchan, on the N side of Loch Sunart.*

AN ACCOUNT

OF THE

Annual Value of Real Property, as Assessed to the Property Tax in 1815,

AND THE

TOTAL NUMBER OF PERSONS IN 1755 AND 1798,

AND AS RETURNED TO PARLIAMENT

At each of the Four Periods, 1801, 1811, 1821, & 1831,

IN EVERY COUNTY, DISTRICT, CITY, BOROUGH, TOWN, AND PARISH

OF

Scotland,

arranged alphabetically as an Index to the preceding District Arrangement, by which the locality, relation, and circumstance of every Parish, Town, and Place in Scotland, is determined with the greatest facility. The CITIES and Burghs are printed in Old Roman; the Towns in Small Capitals; those noted with an * have Post Offices; P. P. Penny Posts; those with ‡ are Sea Ports and Ports of Entry having Custom Houses; the figure and § following certain Places denote the Number of Fairs annually held at the respective places.

Previous to 1831, 27 of the Scotch Counties each returned One Member to Parliament; Bute and Caithness, One; Kinross and Clackmannan, One; and Nairn and Cromarty, One; the City of Edinburgh, One; and 14 Districts of Burghs, One each; making a total of 45. By the new Constitution of Parliament in 1831, Bute & Caithness each return One Member; Cromarty united to Ross; and Nairn to Elgin; and some insulated parts of Perth and Stirlingshires were added to Clackmannan and Kinross (see Note to No. 481 of District Arrangement.) All the other Counties, One each, as before. The Cities of Edinburgh and Glasgow, Two each; Aberdeen, One; and the Burghs of Paisley, Dundee, and Perth, and the Town of Greenock, One each; Leith, with Porto-Bello, and Musselburgh made a new District, which with 13 Old Districts with new Places added to some of them, each return One Member, making a total of 53 Members, instead of 45, as before. The 14 Districts are numbered in the following order,—Viz.

1 Ayr	4 Haddington	7 Lanark	10 Renfrew	13 Wick
2 Dumfries	5 Inverness	8 Leith	11 St. Andrews	14 Wigton
3 Elgin	6 Kirkaldy	9 Montrose	12 Stirling	

The connected Places thereof being exhibited under each of these respective heads. The places newly enfranchised are noted with a ‖, and each Place in its Alphabetical order with a † and a Diamond figure, denoting the District to which it belongs.

A COMPARATIVE VIEW

OF

Agricultural Parishes and Districts,

CONTAINING, ON ONE SIDE,

AN INCONSIDERABLE POPULATION, YET YIELDING LARGE INCOMES BOTH TO PROPRIETORS AND OCCUPIERS, BEING GREATLY EXEMPT FROM TITHES AND ALL LOCAL ASSESSMENTS;

AND, ON THE OTHER SIDE,

THOSE WHICH ARE PRODUCTIVE ONLY AT A GREAT EXPENSE OF LABOUR AND RISK OF SEASON, YIELD AN INCONSIDERABLE RENTAL, WHILE HEAVILY OPPRESSED WITH CHARGES FOR

Tithe, Maintenance of Poor, and other Local Disbursements.

Parishes in which the Annual Value is great in comparison with the Area, and on which Value, the Maintenance of the Poor does not exceed an average of 5 ₰ Cent., varying from 2 to 7 ₰ Cent.

A

COMPENDIOUS VIEW OF THE EXTENT AND REVENUES

OF THE

Church Establishment,

AND OF THE OTHER

RELIGIOUS AND CHARITABLE INSTITUTIONS

IN EACH COUNTY OF

ENGLAND AND WALES,

CONTRASTED WITH THOSE OF

SCOTLAND, FRANCE, THE NETHERLANDS, SPAIN, &c.

*** *The Amount of Numbers Educated, and of Voluntary Contributions in the following Statement, have been taken from a Supplement to the Congregational Magazine for 1829, the Amounts in the other four Columns from Accounts presented from time to time to Parliament. The Voluntary Contributions below are the actual Amounts, as will be seen by a Display of the Totals for a series of Years on another page, which also contains observations on the other Items.*

COUNTIES in *Alphabetical Order*	Numbers Educated.			*Amount of Charitable Bequests at the disposal of the Parochial Officers.*		*Annual Income of Endowed Public Charities.*	*Amount of Deposits in Savings' Banks.*	Voluntary Contributions in aid of						
									MISSIONARY SOCIETIES.				*Unitarian, for all purposes*	*Total.*
	National Union.	*British and Foreign.*	*Sabbath Union.*	*In support of Schools*	*Other purposes.*			*British and Foreign Bible Society.*	*Church*	*London*	*Baptist*	*Wesleyn*

FRANCE.

Prior to the Revolution in 1789, the Ecclesiastical, and Religious Establishments of FRANCE consisted of

136 Archbishps & Bishops
11,850 Canons, Prebends and other Dignitaries
13,000 Bishops Chaplains
40,000 Parochial Clergy
50,000 Vicars
27,000 Curates
60,300 Inferior Clergy
100,000 without Benefices

Monks: 1,120 Heads of Orders; 6,740 Domiciled in Abbeys; 23,650 in other Establishmnts; 46,500 Mendicants

Nuns: 600 Canonesses; 2,560 Prioresses; 10,120 in Abbeys; 64,000 in other Establishmnts; 2,690 without Establishmnts

making a total of about 460,000 Persons, who where subsisted at the expence of the productive labour of the Country, the money value of which amounted to about 180,000,000 *of francs*, or £7,000,000 *Sterling*, equal to about £10,000,000 of money at the present time [1835] in addition to which the Mendicant Monks and inferior orders of Clergy levied considerable sums in alms and by other indirect means.

Under the reign of NAPOLEON, the Clergy of all ranks in FRANCE did not exceed 36,000 in number, maintained at an annual charge of about 24,000,000 *francs*, less than £1,000,000 *Sterling* paid out of the general Revenue.

On the reinstation of the BOURBONS in 1815, the Church Establishment was continued without augmentation, and at present [1835] consists of 14 Archbishopricks, and 66 Bishopricks, with little, if any, increase in the number of the Beneficed Clergy, the permanent income not exceeding 26,000,000 *francs*.

NETHERLANDS.

During the entirety of the Kingdom of the NETHERLANDS, the annual charge for the Maintenance of the Clergy of all Denominations, as fixed by the Decimanual Budget of 1820, amounted to 3,365,000 *florins*, or about £300,000 *Sterling*, in the proportion of 1,928,000 *florins* for the Catholic, and 1,337,000 for all other professions.—Vide Digest of Par. Papers, Pages 188-9, Session 1833.

SPAIN.

The Ecclesiastical, & Religious Establishments of SPAIN, at the present time consist of about 186,000 members, in proportions annexed, with a Property in Lands, equal to £4,400,000
Houses, &c. 1,600,000
Tithes 3,400,000
Casualties 1,300,000
making a Total of £10,700,000

61 Archbishops & Bishops
2,363 Canons
1,869 Prebends
16,481 Parochial Priests
17,411 Superior Incumbnts
9,410 Inferior do.
11,360 Hermits
61,320 Monks
31,400 Nuns
15,015 Sacristans
3,225 Servitors of Churchs
20,346 Laymen
10,900 Miscellaneous Ordrs

The following is the estimated present annual money amount of Income of the Church Establishment of

ENGLAND AND WALES.

STATEMENT showing the Number of Chapelries in the County of *CHESTER*, with the amount of their ENDOWMENTS under the heads of *Private Benefaction, Royal Bounty, and Parliamentary Grant;* and also of the Number of Parochial Benefices having Endowments with the amount under each of the before-mentioned heads; showing further, the amount annually expended for the Maintenance of the Poor in comparison with the annual average price of Wheat, and the Number of Committals for Crime in the same County in each of a series of Years since 1750; and also Statements of the Estimated Annual Salaries of the Curates of England and Wales in 24 Classes; and of the Annual Value of the Benefices thereof, in each of 15 Classes.

Of the 91 Parochial Benefices in the County of Chester, as exhibited on the preceding page, 35 do not appear in the Valuation of Pope Nicholas in 1291; which Valuation, however, contains 6 Parishes exhibited below, having no analagous name at the present time. Cheshire was a field of much Warfare in the 15th., 16th., and 17th. Centuries, during which time it is probable that the then existing local distinctions became extinct, and new Parochial Districts formed. De la mere, No. 62, was formed into a Parochial District as late as 1818. For the relative value of Grain, Cattle, and various other Productions in 1291, and in the time of Hen. VIII.,—see Sections 18—20 of Introduction. Under the Act for revising the Constitution of Parliament in 1831, the County of Chester was formed into Two Electoral Districts,—North East, and South West Division, the relative extent and circumstance of each of which are exhibited below; On the whole, the County exhibits a highly prosperous condition when compared with some other Counties, the Parish which exhibits the greatest exception is Over, No. 23.

Parishes	*Chapelries.*	Superficies in Statute Acres.	Annual Value of Property, as Assessed to the Property Tax in 1815.	Amount expended for Maintenance of the POOR, 1828–29.	Population in 1831.	*Private Benefaction.*	*Royal Bounty.*	*Parliamentary Grant.*

STATEMENT of the AREA, ANNUAL VALUE OF PROPERTY, POPULATION, OCCUPATIONS, &c. &c., of each of the principal Towns and Hundreds of the County of CHESTER, the North East part of which participates largely in the Manufacturing operations of which Manchester is the centre, while the South West division, with the exception of the City of Chester, is exclusively Agricultural. The District of Northwich produces annually upwards of 550,000 Tons of Salt from Springs of Salt Water, and 12,000 Tons of rich Cheese, the produce of about 32,000 Cows. The Township of Tintwistle in the parish of Mottram in Longdon and Dale is an unproductive District which includes a part of Feather-Bed Moss, bounded on the North by Saddleworth in the West Riding of York, and South by Glossop in Derbyshire. The Township of Duckinfield in the parish of Stockport is separated from the Town of Ashton-under-Line by the little river Tamar and the Huddersfield Canal, its productive Iron and Coal Mines and Quarries will suffice to account for a large number of Labourers under the head of other than in Agriculture, but there is a palpable error in the numbers stated below, inasmuch, as there are within the township, Cotton Factories working upwards of 150,000 Spindles and 1500 Power Looms. Wirrall Hundred is a promontory extending about 20 miles N. by W. of Chester between the rivers Dee and Mersey, the Lower Division is an unproductive District, but being opposite the Town of Liverpool its increase of Population is readily accounted for.

STATISTICAL DISPLAY of each of the 76 *Parochial Beneficies* in the County of *DURHAM*, distinguishing the *Rectories, Vicarages, and Perpetual Curacies*, showing the Valuation of each Benefice in 1291, 1318, and in the 26th. of Hen. VIII., in comparison with the Extent, Value, Population, Condition, and Agricultural Force of each Parish in 1831. In the Year 1288, Pope Nicholas IV. granted to King Edward I. a tenth of the Ecclesiastical Revenues for 6 Years towards defraying the expence of an expedition to the Holy Land!!! which led to the Valuation under the head of 1291, which Valuation is considered to have been made with great regard to equality and fairness; although the Tax thus instituted was proposed as temporary, it appears to have been continued, for it is stated that in consequence of the eruption and spoliation of the Scots, the Clergy in 1317 became unable to pay the Tax; Edward II. in consequence, in 1318, directed a Mandate to the Bishop of Carlisle for a new Valuation. The circumstances attending the Valuation of Hen. VIII. will be found dilated on, in another place. The Counties of Durham and Northumberland in 1291, appear to have held a relatively higher importance to some of the other Counties than at the present time,—see page 252 for the Valuation of the Temporalities of the See of Durham, and several Religious Establishments.

*** The last column of figures to Nos. 51–76 imply the total number employed in Agriculture, the space not admitting of the details. The figures in ( ) and notations, imply the same as for Northumberland on the following page.

STATISTICAL DISPLAY of the 88 *Parochial Benefices* in the County of *NORTHUMBERLAND*, distinguishing the *Rectories*, *Vicarages*, *and Perpetual Curacies*, showing the Rated Value of each Benefice in 1291, and in the 26th. Hen. VIII, in comparison with the Extent, Annual Value, Population, condition, and Agricultural force of each Parish in 1831; showing also in whom the Patronage of each Benefice is vested. The figures in ( ) denote the Number of Subdivisions, of the several Parishes, which separately maintain their own Poor and made a separate return of Population in 1831. The Benefices noted with an * in the time of Hen. VIII have been discharged from payment of first-fruits, and those with a † have certified for the purpose of obtaining relief under the Augmentation Acts, see following page.

STATEMENT showing the variation in the *intrinsic and current* value of the SILVER COINAGE of England from 1290, down to the present time.

The Standard of 43 Eliz. as well in regard to Current Value as to purity, continued down to 1816, at which time the Coins then in circulation had lost much by abrasion, in consequence of which, all were exchanged at their full Current Value for an entire new Coinage of Crowns (5 shillings) Half-Crowns, Shillings, and Sixpences of the same degree of purity, but at the rate of 66 shillings to the lb Troy.

The extreme variation will be seen to have been between 1535 and 1552, at the latter date the difference was as 15 to 1 compared with 1290, and 4 to 1 in comparison with the present time (1835.) The cost of exchanging New for the Old worn Coins at their full Current Value in 1816, including those for Ireland was £749,780.

STATISTICAL DISPLAY of each of the 32 *Parochial Beneficies* in the County of *WESTMORELAND*, distinguishing the *Rectories, Vicarages, and Perpetual Curacies*, showing the Valuation of each Benefice in 1291, in 1317, and in 1535, compared with the Extent, Value, Population, Condition, and Agricultural force of each Parish in 1831; see Note at head of Page 250 for the origin of the several Valuations; the 11 Parishes, No. 3, &c., noted with a † have fixed money Endowments, —see Page 255. The Valuation in 1291, and 1317, for Nos. 4, 12, 19, and 24, have been assumed from the Orthography of the Places printed in *Italic*, Newbiggin was returned *non excedit sex marcas*, and appears to have been exempt; those in —— in 1317, being on the East side of the County appear to have escaped the spoliation of the Scots, and as such are not included in the new Valuation of that time. The Vicarial parts of St. Laurance in Appleby, of Crosby Ravensworth, and Orton [*Eviirton*] were returned *no' suffic p onbus*. The sum Total of the Valuation of the Diocese of Carlisle in 1291 was £3,171 5 7½, the Jurisdiction appearing to have been the same as at the present time. In 1291, however, the following Places were then enumerated which have no analogous name at the present time, Viz. Eston, valued at £4 6 8, Cambok at £8, Aynstapelith at £10 9 5, Bricekirk at £60, and the Vicar thereof at £13 6 8, and Crossebv at £15, the two latter appear to have suffered greatly by the spoilation of the Scots; Bricekirk in 1317 being reduced to £3 6 8, and the Vicar to 15s., and Crossebv to £5. The Total in 1291 also includes £126 7 7 at which the Bishop was assesed; the Prior of Carlisle at £96 19 6d. in Stanwix £10 8, the Abbot of *Heppe*? Shap at £46 13 4, the Prioress of Ermithwayt at £10, and the Prior of Wetheral at £52 17 6, a School in Carlisle appears to have enjoyed the Value of the Benefice of Dalston and part of Stanwix.

A SUMMARY VIEW of the *Superfices, Annual Value of Property, Amount Expended for the Maintenance of the Poor, and Total Number of Persons*, distinguishing the proportion of MALES, 20 years of age and upwards, and their OCCUPATIONS under each of 10 several heads in the respective MANUFACTURING, MINING, METROPOLITAN, and AGRICULTURAL Districts of the UNITED KINGDOM.

*** The 22 Agricultural Counties comprise Nos. 25-43, and the Agricultural parts of Cheshire and Warwickshire, as exhibited in detail at page 11 *poste*. Should the principle of legislation be deemed to consist in protecting and promoting the interest of the greater Number, had no other evidence been adduced, the Analysis below would suffice to prove the consequence and importance of the AGRICULTURAL, over every other interest of the Empire; more than half of England and *Nineteen-twentyths* of Wales, and Agriculturalists will be seen to be *exclusively* Agricultural, while in the remainder of England and Scotland, with the exception of Lancashire and the West Riding of Yorkshire, the Agriculturalists will be seen to preponderate in Number; it was not, however, the object of this Analysis to make out a case for any particular interest; but to show the proportions as they really exist, and to place them in as concise and perspicuous a point of view, as their highly involved relation admitted of.

	Towns, Parishes, and Hundreds.	Superfices in Statute Acres.	Annual Value of Property, as Assessed to the Property Tax in 1815.	Amount expended for Maintenance of the POOR, 1828-29.	Total Number of PERSONS. 1801.	Total Number of PERSONS. 1831.	Total	Proportion of MALE Population in 1831, 20 Years of Age, & upwards. AGRICULTURALISTS. Farmers	Cottagers	Laborers	TOTAL	Laborers other than in Agriculture.	Retailrs. & Handicraftsmn	Manufacturers	Capitalists and Professional Men.	All other except Servants	Servants.	Male Servants under 20.	Female Servants all ages.

STATISTICAL VIEW of the *Superficies, and Population*, and of the *Occupations of the Males*, 20 Years of age and upwards, in each of the 32 Counties and 40 of the principal Cities and Towns of IRELAND in 1831. *** The Note at the head of the preceding page, renders it here unnecessary to offer any further observation, in regard to the preponderance of the AGRICULTURAL over every other interest of the Empire.

*** The English Perch or Pole is 5½ yards, the Irish 7 yards; The English and Irish mile being both divided into 8 Furlongs, and the Furlong into 40 poles, makes 11 Irish miles equal to 14 English, and 30½ Irish Acres equal to 49 English; see however page 14 *poste* for a palpable incongruity in regard to the Area, which the Trigonometrical Survey now in progress [1835] will effectually rectify. The Square mile contains 640 English Statute Acres.

Provinces, Counties, and Cities.	*Superficies in* Square miles.	Irish Plantation Acres.	English Statute Acres.	Population in 1831. Families.	Persons.	Proportion of MALE Population in 1831, 20 Years of Age, & upwards. Total	AGRICULTURALISTS. Farmers	Cottagers	Laborers	TOTAL	Laborers other than in Agriculture.	Retailrs. & Handi-craft-men	Manu-factur-ers.	Capitalists and Professional Men.	All other except Servants	Ser-vants.	Male Servants under 20.	Female Servants all ages.

CONCLUSIONS, EXPOSITORY AND DEMONSTRATIVE

OF THE CAUSES WHICH HAVE DERANGED THE SOCIAL RELATIONS

OF THE

British Community,

AND ENDANGERED THE EXISTENCE OF THE INTEGRITY, OR ENTIRENESS OF THE EMPIRE;

DEDUCED FROM THE PRECEDING AND FOLLOWING SERIES

OF

STATISTICAL DETAILS.

(☞ The terms *ante* and *post*, instead of *preceding* and *following*, are used in the following exposition, when referring to the Pages of either of the series of Statistical Details.)

The commencement of the fourth decennial period of the nineteenth century may be regarded as an epoch in the history of the United Kingdom. The emancipation of the Catholic portion of its population from the thraldom which, for ages, had precluded it from the exercise of all patriotism;—the change in its parliamentary constitution, which converted a preponderating, self-elected, and dominative body of legislators into one more amenable to public opinion;—the extinction of one great trading corporation, which for ages had precluded all individual enterprize with the most fertile and interesting portion of the globe;—the modification of the power and monopoly of another great trading corporation, exercising periodically (mistakenly perhaps) a baneful influence over the productive energies and social interests of the community;—the great change of relation in the colonial population;—the developement of the course of the great rivers of Africa, and of their union with the ocean, now opening a new world to social enterprize;—the threatened and now inevitable change, if not entire subversion, of the long-established ecclesiastical institutions of the country, are all events that will constitute interesting and important features in the history of the period; but, when all the passions, and all the excitements which they have produced, shall have subsided, and when, in the lapse of time consequent on the changes which the inherently conflicting interests of society are constantly occasioning, their origin shall have become mere matter of record, the census or population returns of 1831, which constitute the basis of the accompanying Statistical Display, will remain a prominent beacon to guide the statesmen and patriots of future ages towards the goal of an equal degree of perfection in Legislation, and social arrangement, to that which has already been attained in Mechanics, in Astronomy, in Navigation, or any other of the abstract sciences, dependent on numbers and proportion for their exactitude, and the interest and importance of their effects and results; and obtain the regard and admiration of the enquirers of distant ages, when the most popular topics and ephemera of the present time will be forgotten.

2. To arrive at any thing like an accurate conclusion in regard to the physical, moral, and social condition of any community, analysis and proportion must be availed of. Not only is it required to ascertain the proportion of any given community employed, or engaged in each great branch of production or occupation, for obtaining their means of support, but also the source and extent of supply, and the proportion which each class and order of Society, respectively, obtain for subsistence and redistribution. All these points, in conjunction with those set forth in the following Sections, being obtained, the just principles of legislation may then be defined with the same degree of precision, as the contents of a solid may be determined by the extent of its sides, or the distances of the several planets of the universe, from ourselves, and from each other by their reciprocal magnitude and motion; while, without such data as the guide, all attempts at legislation must continue to involve the same hurly-burly, the same equivocal schemes of petty expediency, as have hitherto so unhappily prevailed, and the same fearful uncertainty as that in which a mariner would find himself involved in attempting to steer a ship from Europe to any given point in America destitute of all knowledge of the principles and practice of astronomy and logarithms, or, conversant with both of these, if he were to attempt it without the aid of a magnet.

3. It is the predominance of an abstract or partial knowledge of the complicated combination of Society, and the consequent partial or unequal application of the laws, such as they are, upon the several parts of the combination, that occasion the extreme of privation, amid superabundance, to prevail in the United Kingdom: hence the continuity of anomalies, which from day to day presents itself to the eye of the impartial observer. While millions are pining in want and misery, tens of thousands of pro-

ducers and purveyors of supplies of every kind are sinking under the absence of demand, and others are indulging in the highest degree of refinement and luxury. The varied character of the multiplied anomalies which such extremes involve, their causes and effects, will successively appear as the present exposition is proceeded in.

4. It is recorded by Sir John Malcolm, in his Memoir of Central India, that, on his being appointed to the command of that district, in 1818, one of his first measures was to cause an enumeration of the Population of the several provinces of the dominions of Holkar, Scindia and the Puars, to be taken, and that the utility of the information was so obvious to *Tantia Jogh*, the Prime Minister of Holkar, as to induce him to declare, that it had imparted to him a knowledge which he could only describe, by saying, that he felt like a man who had been couched for a cataract in his eye; it seemed to him as "light after darkness." If the enumeration of a Population (comparatively speaking) limited, primitive, and rude, could be deemed a desirable proceeding, and in its results be viewed as a measure of importance, of how much greater interest must it be when applied to a community like that of the United Kingdom of Great Britain and Ireland, more artificial and more highly involved, not only as regards its internal relations, but in reference to the several nations of the world, severally and collectively, than any which has ever existed.

5. Interesting as the enumeration of the Population of Central India might seem to *Tantia Johg*, the only practical or available point of view in which it would probably present itself to his mind would be that of showing him the numerical force which he could bring to bear on any offensive operation against his foes, or in defending himself against their aggressions; nor does the bare enumeration of a community lead to any very satisfactory or positive conclusions. A series of returns made with uniformity at certain given periods, through a series of consecutive ages, will contribute greatly to the developement of the law of increase of Population; but even these would lead to only partial conclusions. An accurate return of sex and age, of immigration to, and of emigration from, and of the respective ages at which such changes take place in any given community, is an indispensable requisite to enable any thing like an accurate conclusion to be arrived at, in regard to the law of increase; and, for the means to be complete, there must be had the most accurate account of the proportion of each sex born, and of the duration of their lives by an equally accurate account of the age at which they die *(for further elucidation in regard to the law of increase of Population, see pages* 98—103, *post, and notes thereto.)* These, however interesting, apply only to numbers, while the physical and moral condition and social relations of communities constitute the great and desirable object to be informed of by statistical enquiry and developement.

6. Statistical or arithmetical developements of the resources and relations of Society and nations appear to have been partially resorted to in all periods of history. They seem to have been favorite objects with Moses during the Theocracy of the Jews; but whether he adopted the practice from the Egyptians, or, like Sir John Malcolm in Central India, originated it, does not distinctly appear. The first example of the practice in England was the result of the Survey ordered by the Norman Conqueror in 1066, the details of which Survey were collated and engrossed under the title of "Domesday Book." The original, with a duplicate engrossed at a later period, is deposited in the Chapter House of Westminster Abbey. This was followed by the *Rotuli Hundredorum* of Hen. III. & Edw. I., between 1270 and 1275. This survey very far exceeds in interest the original one of William, surnamed the Conqueror. In 1290 the Pope [Nicholas IV.] authorised Edward I. to levy a Tax of 10 per cent. on the Revenues of the Clergy of England and Wales, called the *Taxatio Ecclesiastica, Vide* Section 17 of Introduction. The dissolution of the Monastic Establishments of England, in the 4th decennary of the 16th century, led to the *Valor Ecclesiasticus* of 1535—7. These are all Statistical developements of the resources and condition of the Country at their respective periods, abstractedly considered, of very great interest, and have all been printed, with numerous others of less value, at the public expense, since the commencement of the present century. In 1750, in 1776, and in 1785, returns were made, by order of Parliament, from every Parish in England and Wales, of the amount of the Parochial Assessments, and of the proportion expended for the maintenance of the Poor; but no authentic account of the Population of Great Britain appears to have existed prior to 1801.

7. Since 1694 a detailed Account has been kept at the Custom House of the Nature and Value of the Annual Imports and Exports into and from Great Britain, and of the Number and Tonnage of Shipping built and employed; but displays of quantity and value without reference to the number of persons by whom the quantity and value have been created, and among whom they are to be distributed and consumed; or of the number of persons, without reference to the nature and extent of supplies, lead to no just conclusions, and involve absurdities like those which would attach to a Commander-in-chief giving orders for the supply of *materiel* and provision for an army without stating its numerical force and object of movement; or of making a parade of his numbers without regard to the means of sustaining them. It was about the middle of the last century that the inconsiderable state of Sweden revived, on national grounds, the principle of Statistical Developement; but little effect, however, resulted from

that example, until the Congress of the United States of North America enacted a law, in 1790, for taking a Census of the Population of their extensive territory in that year, and in continuity at periods of every ten succeeding years. This, in 1792-3, excited an individual in Scotland, the amiable and indefatigable *Sir John Sinclair*, Bart., (then in the prime of life, being about forty years of age, and still living [1835] to witness the progress of his honourable example,) to undertake, on his own responsibility, a Statistical Developement of every Parish in that Section of Great Britain, a task which the aid of the Clergy of the respective Parishes, and such other means as his reputation and influence in Society enabled him to command, he accomplished in about five years, he having completed it in 1798. The results of his enquiries were published in four or five and twenty Volumes 8vo., and up to that time they might be regarded as the most perfect display of the numbers, resource, and condition of a community ever produced. The Population merely of the several Parishes appears to have been ascertained in 1755.

8. In 1801, the Parliament of England enacted a law for ascertaining the Population in every Parish of Great Britain, and of the number of Marriages, and of registered Christenings and Burials, in the preceding ten years, in every Parish of England and Wales. From this period a new era may be said to have commenced; for, since the beginning of the present century, continuous developements have progressively been made of the numbers of the Population, their resources, and condition in Sweden, Denmark, Russia, Prussia, Germany, France, and the Netherlands, as well as in the United Kingdom of Great Britain and Ireland, and the United States of North America. Of all the Nations here enumerated, Sweden appears to have carried the science of Statistical Developement, not only to a higher degree of perfection than any of her compeers, but almost to the highest degree of which it is susceptible, see pages 67 to 77, *post*. The note, however, at the head of page 75, will show that she has so far failed in deducing from the statistical results the means of improving the social and moral condition of her people. The progress made in Statistical Developement in the other States of Continental Europe may, in some measure, be inferred from the displays at pages 54—66, and 79—84, *post;* while pages 51—3 exhibit a more complete view of the extent and resources of each Province of China than is elsewhere to be found, and pages 51, and 86-7, contain interesting views of the progressive increase of the Population in each of the several States of North America; the alphabetical display of the 946 Parishes of Scotland, at pages 231—8, *ante*, contain the Population of each Parish in 1755 and in 1798, as given by Sir John Sinclair, and pages 16 and 88, *post*, contain other results deduced from the same authority.

9. In addition to the Statistical Developements that have been made since 1801, by the Governments of the several Countries enumerated in the preceding Section, much has been done by individuals. In 1814, Doctor Colquhoun, a gentleman who had acquired much practical experience as a stipendiary magistrate of the British metropolis, published a work of considerable interest in royal 4to., "On the Wealth, Power, and Resources of the British Empire in every Quarter of the World." Since that date, Doctor Seybert, of Philadelphia, collated all the official accounts of the United States of North America, relating to the Finances, and the external intercourse of the Union with the several Nations of the World. But of all the claimants of distinction for individual exertion, devotion, and liberality in Statistical Developement, the palm is due to M. Cesar Moreau. This gentleman, in the ten years 1820—29, during which time he resided in London, published a succession of Statistical Works relating to the Commerce of Great Britain; the Rise and Progress of the Navy; the Silk and Woollen Manufactures; Ireland, France, &c., which for extent of detail, and elaboration of arrangement, have no parallel, but, being all in Lithograph, they are very inconvenient for reference. In 1829, M. Moreau removed to Paris, since when he has founded a Statistical Society, numbering several hundred members, among whom are included some distinguished persons of all countries.

10. It was in 1819, after twenty years of more varied and extended experience in Commerce and Finance, in connection with every part of the world, than has fallen to the lot of many individuals, that my attention was first directed to Statistical enquiry and investigation. From a period antecedent to the general embargo scheme of President Jefferson in the United States of North America in 1807-8, down to the second great commercial revulsion which followed the general peace of 1815, I had been successively involved in the consequences resulting from the destruction of twenty princely fortunes under the influence of Political circumstances which rendered judgment, discretion, exertion, and integrity of purpose of no avail, and, finding the results of mercantile activity at variance with all acknowledged and previously recognized principles, I was induced to ask myself, what could be the causes in operation which were producing results so diametrically opposed to all previous experience. I had asked myself a similar question, pending the enquiry into the high price of Bullion in 1810, at which period the country was inundated with conceits and opinions, in newspaper articles and pamphlets, each assigning the then high price of Bullion, and the consequences which it threatened to involve, to different causes. I at the time considered the varied opinions which that enquiry engendered to be as ridiculous as time has since verified them to have been; and concluded, in my own mind, that all which concerned the several interests of a nation, as well in regard to its external as its internal relations, resolved themselves into a highly involved Arithmetical problem, and that correct data being obtained, and fully and fairly worked out, the necessary accurate conclusions might be arrived at for determining, with unerring precision, the cause and effect of

all the operations of Society, however artificial and extended; and I then laid down a *formula*, which multiplied and urgent engagements at the time precluded me from working out, but which afterwards proved to be the one required for the purpose.

11. The conclusions arrived at in my own mind at that time [1810] were, that a community, whatever might be its number, whether 500,000 or 50,000,000, or any intermediate number, or however varied and multiplied its interests, resolved itself into classes, or circles, moving in, and subsisting upon each other, in some degree of mutual or reciprocal relation; that the sums expended or disbursed by the several classes among each other, whether they be little or whether they be much, of necessity govern the sum which each class respectively has to expend or disburse; or, in other words, the sum of the distributions, under the head of each respective class, of necessity constitutes the sum which each class respectively has to distribute. A purely mathematical, or intuitive mind, will at once perceive that this is a proposition as much reducible to certainty, as that the squares of the hypothenuse of all right-angled triangles are in exact proportion to the squares of the perpendicular and base, whatever may be their respective extent; and that no precise data are required for determining the truth of either proposition—that is, as far as determining the truth of the principle is concerned, any *assumed* data suffice as well as any *actual* data; but, on applying the principle of either proposition to purposes in practical life, some *certain* or actual data then become necessary.

12. To determine the superficies of the squares of the sides of a triangle of any given extent, the actual data required would be the extent of either two out of its three sides; all the rest would be deducible: in like manner, to determine the actual condition of the several classes of any given community, the total number of which being known, and supposing it to have resolved itself into some given number of classes, say 75, *actual* data for about two-thirds only would be requisite; the circumstances and condition of the remainder would be deducible with as near an approximation to accuracy as the necessity of the case would require for all the purposes of legislation, and for all useful purposes in practical life. Such were the conclusions which my mind had arrived at, on laying down my *formula* in 1810, which less urgent engagements in 1819 enabled me to work out to demonstration with singular success and gratification. The course of proceeding which I followed was this:—I obtained as many actual data as the Official Documents which had been published up to that time afforded, and having from these arrived at tolerably just conclusions in regard to the number of the various orders of Proprietors, of the number of Occupiers of the soil, and of Labourers, and of the number of the various orders of Manufacturers, and Dealers, while the accounts of the several departments of revenue, in conjunction with the average prices of corn, and well-authenticated prices of many other articles, did much in enabling me to arrive at equally just conclusions in regard to value.

13. Having thus obtained as many *actual data* as the necessity of the proposed investigation seemed to require, I proceeded to analyze and arrange the numbers into classes, under the several heads of Proprietors, Occupiers, and Labourers on the soil; various orders of Dealers, Handicraftsmen, and Manufacturers; Merchants, and all those connected with Shipping and Commerce; and all the various degrees of service, professional or otherwise. These, about 75 in number, being placed in column, with the number of persons in each, and the aggregate sum passing through the hands of each class for expenditure or disbursement, the next proceeding was to show the mode of distribution in lines under heads corresponding with those in column. In doing this, I had to consider the peculiarity of habit, under the various modes of artificial life which British society now displays, and the various circumstances which influence the expenditure or disbursement of all the several classes and orders of the community; and, as each of the 75 aggregate amounts had to be disposed of under as many several heads, the analyses of distribution will be seen to have claimed of me upwards of 5600 conclusions, the greater portion of which involved all the considerations previously enumerated.

14. Having shown by analysis the various modes of expenditure and disbursement of each separate class and order of society, the next proceeding was, to test the accuracy of the distributions by synthesis. In the analysis of distribution, two errors were liable to be fallen into, one of misconception, the other of account merely; the last only susceptible of being detected by synthesis. Supposing the whole of the distributions to be made from actual data, and accurately stated, their several sums would then exactly correspond with the several sums distributed; but, when a portion of the results are algebraically or hypothetically obtained, then the sums of the Distributions will only be approximations to the sums distributed—that is, there will be a certain portion *plus*, and the remainder *minus*; then, if by synthesis the sum of all the *plus* be found to correspond with the total of all the *minus*, that proves the accuracy of the arithmetical part of the operation; and two things, then, only remain to be determined, viz. whether the inequalities which present themselves are the result of a misconception of the habits and modes of life which govern expenditure and distribution; or whether they are the result of such a derangement in society as to tend to accumulation or excess on one side, at the expense of privation on the other.

15. It is stated in Section 12 that it was in 1819 that I was first enabled to devote the necessary time to work out the

results, according to the *formula* laid down in 1810, the data acted upon having been deduced from Official Documents of the years 1814—1818. In these five years I found the *Excess* of the Value of the Exports from, over the Imports into, Great Britain to have been as follows, viz.—

	To Europe.	To America.		
1814	£34,643,278	£ 3,176,182	and an Excess in the Value of the Imports over the Exports to the East and West Indies, and China, to have been	£5,788,174
15	26,636,472	15,094,007		6,210,786
16	25,986,801	11,071,959		8,071,882
17	19,894,822	7,445,004		6,062,611
18	15,524,282	10,658,645		7,739,717

and an Excess of from £3,000,000 to £5,000,000 annually from Ireland into Great Britain. This part of the Developement constituted a difficulty which for a time seemed inexplicable. So long as I indulged in the common-place notion, that on an average of years the Values of the Imports and of Exports are of necessity equal to each other, I could not arrive at any conclusion commensurate to the labour and time which I had bestowed on the subject; but, on bringing the results of my practical experience in Commerce and Finance to bear on my enquiry, and reflecting on the nature and extent of the transactions with each of the several parts of the World, then it was that I found a solution for all the effects that had been produced in the relations of the community since the commencement of the War in 1793.

16. The excess of Value exported, as stated in the preceding Section, I found to have been in part equalised by the Financial Operations of the Government, the Bills externally circulated on Account of the Commissariat, Subsidies, &c., in the five years in question, having been as follows: viz. in 1814, £26,495,028; in 1815, £20,128,118; in 1816, £7,802,357; in 1817, £3,404,071; and, 1818, £2,387,658. The sudden diminution of this species of circulating medium sufficed to account for the mercantile devastation of 1816, and all the derangements of Society that then prevailed, and for the progressive diminution in value of all the products of industry, and consequent diminution of reward for labour, which have followed. (Vide Col. 8 of Statement, page 122, and sections 3, 4, 5, of notes on the following page 120, a). I further found the mechanical power in operation equal in ratio to a production of 120, and its consuming power not exceeding ten. Having by these means traced to their source all the causes of existing derangement, my attention was next directed to the task of ascertaining how far there was any inherent tendency in the combination of society to duly equalise the disproportions which the results of my Analysis exhibited; or whether the interposition of the Legislature was necessary for that purpose; and, if so, to what extent, and in what way legislation could be best applied. Having arrived at conclusions on all these points, which subsequent events have proved to be true, to the letter or the unit, I submitted, in October, to the then Minister of Finance, or rather offered to submit, the results of my investigation; but he evaded the subject and did not look at it, although my offer was made without any of the stipulations for consideration which usually accompany schemes of assumed advantage or importance. I neither then, nor at any subsequent time, either directly or indirectly, in any of the attempts which I have made to fix attention on the only means which will suffice to set legislation in a right direction, ever accompanied my proposals with any question of consideration.

17. Although I availed myself of every opportunity which offered in endeavouring to fix the attention of all those persons upon the results of my developement whose conclusions upon it promised to have any weight, I failed in obtaining the necessary degree of time and attention to bear upon it requisite for warranting them to come to any decision upon it, in the aggregate, satisfactory to themselves. While the various features and results in detail which the display exhibits have never failed to interest in a very high degree, the mind generally wearied ere it could become informed of the nature and bearing of all the combinations, and the influence and effect of the relation of all the several parts with each other. Apprehensive that such would be the case, I commenced, in 1821-2, exhibiting in detail such parts of the system as I had found most baneful in their operation; and my attention was, in the first instance, directed to a developement of the nature, extent, and effects of the account called the National Debt (it would be much more in keeping to call it either the National Lottery or the Bank of National Credit), and of the Sinking Fund; an exposition of these operations I caused to be urged on the attention of Parliament on the 22d July, 1822, Vide Journals and Votes of the House of Commons, as well as the Times and Morning Chronicle Newspapers of that date. This proceeding I had intended to follow up, in the ensuing Session, by showing the relative effects of direct and indirect Taxation, and urging the entire repeal of the Land and Assessed Taxes as incompatible with the condition which the involved relations of the Country had attained; but during the recess a covert compromise was entered into between the administration of the time and the county and nomination members of the House of Commons, for a remission of about half of the Assessed Taxes, which in 1823 were accordingly repealed; under which circumstance I ceased to interfere further in reference to that part of the subject.

18. The *Sinking Fund*, which for thirty previous Sessions of Parliament had been a subject of standing and grave discussion,

and after being held up by several of the most influential men of the age as the climax of genius in political finance, and the salvation point of all the interests of the country, since 1822 has ceased to be a subject of debate in Parliament, and is now never thought of by men of common sense, but to be laughed at for the fallacies which in principle it involves, and despised for the chicane which it engenders in practice; *for a complete view of the rise and progress of the National Debt and operation of the Sinking Fund* (National Annuity Account, and Account of Liquidation, are more appropriate terms), *see pages* 210—216, *of my Digest of Papers presented to Parliament in the Session of* 1833. As an accurate investigation of the nature and effects of the accounts here mentioned of necessity involved an equally accurate investigation of the Revenue and Expenditure of the Government, it led to my producing what probably would never otherwise have appeared, viz. a complete History of the Financial Operations of the Government from the commencement of the war in 1793, down to the present time: *see the same arranged as frontispieces to my Digest of Papers before mentioned,* the notes to which will show that until 1822 no account of the Revenue and Expenditure prior to 1800 had been made public; the notes will also be found to contain some very curious and important developements.

19. During the years 1823-4, I devoted my time exclusively to continuous developements in detail through the Daily Papers or other channels of publicity, wherever I could obtain insertion. Mr. Valpy's Pamphleteer and the Monthly Magazine of this period contain several evidences of my progress in this species of elucidation, during which time I was constantly watching for a favourable opportunity to fix suitable attention on my display of all the combinations of the interests of the nation, as set forth in Sections 13, 14. In 1823 I furnished gratuitously all the Statistical data for Art. 1 of No. LXXVII. of the Edinburgh Review, [Oct. 1823,] for which I was rewarded with a gross violation of propriety; but, as the violation involved only propriety or courtesy, I should never have thought it worthy of a moment's consideration had not the same Journal at two subsequent periods rendered itself amenable to my denunciation of dishonour, and to the consequences of a legal process, by the insertion of two Statements which had cost me much time and labour in arranging—one relating to the Colonies, and the other to Wove Fabrics—not only without my authority and without acknowledgment, but assuming them as its own. In 1824, I collected together the several statements which I had interspersed through various Periodical Journals, and published them in an 8vo. form, as emanating from a Society called the "London Statistical Society," a title which in 1834 was as improperly assumed by a party of *Pseudo-Statists,* as the Edinburgh Review had assumed as its own what belonged exclusively to me. In 1827 I published an enlarged edition of 500 copies, in the same form, and under the same title, at the price of 15s., and from this period Statistical Developement may be said to have taken firm root in England. This edition, relatively speaking, was eagerly demanded, and within 18 months, 1, 2, and 3 guineas were paid for a single copy, and in one instance which came to my knowledge 5 guineas were offered and refused for a copy, a result without a parallel in the history of modern bookselling.

20. Notwithstanding the seemingly favourable result of the edition of 1827, the 500 copies did not produce to me more than 6s. a copy, while the charge of printing and paper had cost three times that sum; and as this part of my exposition may be regarded as a History of the progress of Statistical Developement, which must of necessity at no very distant period constitute the basis of legislation, when reduced to a science, it may not be deemed uninteresting for me to state that such up to this time [1827] was the repugnance or indifference of the public generally to statistical representations, that not one of the thousand Booksellers of the British metropolis could be found to purchase a single copy; and, with the view of showing what trifling incidents may sometimes govern or influence the progress of the most important proceedings, it is a fact, which I shall offer no apology for recording, that when my first edition was offered, in the usual course of trading, to the most extensive Bookselling Establishment in Europe, under the expectation that they would have taken 25 or 50 copies, they declined interfering on account of its being *too thin!!* This would I think have terminated my career as a bookmaker for sale, but for another circumstance, as honourable to the character of a rising empire as the previous one may be deemed derogatory. One of the Partners of the largest Bookselling Establishment in the United States of North America, Messrs. Carey and Lea, of Philadelphia, being at the time in London, purchased of me 100 copies at my own price, without a second word to the bargain; the confidence and respect inspired by such conduct more than counterbalanced the contempt which I had been momentarily induced to feel for the other. This incident is now recorded as a point in the history of the subject both curious and amusing, and not for the sake of indulging in any expression of unkind feeling.

21. The high appreciation which my 8vo. Edition of Statistical Developement had attained in 1828-9 occasioned numerous applications to be made to me for another Edition; but I had found the cost of production too great to justify me in further incurring the expense of printing and paper. It was then suggested to me, whether it might not be desirable to enlarge the size and extend the information to a degree to justify such a price being demanded as would secure an indemnity for the cost of production, several personal friends urging me to adopt this suggestion, with an assurance that they would not only contribute their fifteen, twenty, or thirty guineas each, but use their influence with their friends to induce them to act in

like manner; and, before I had time to consider the extent of the liabilities in which the undertaking would involve me, I had handed to me a list of some thirty or forty Members of the House of Commons who had concurred in the proposal, and, among the number, the Chancellor of the Exchequer, for fifty copies, at three guineas a copy. This proceeding had been taken, not only without my being consulted upon it, but without its intention ever having been mentioned to me; but, on being informed that the proposition had been promptly and cordially acceded to, it induced me to call on a Member of the Cabinet, with whom I was on terms of frank and easy intercourse, who had taken a part with the Chancellor of the Exchequer in acceding to the proposal, to express my acknowledgments for his friendly interference, observing at the same time that I was not without an apprehension that it might probably involve me in considerable pecuniary embarrassment.

22. A lengthened conversation having ensued, in reference to the heavy expense attending the printing of such a work as I was then proposing to myself to produce, while the taste and inclination of the public to purchase it seemed to be in an inverse ratio to the cost of production, I urged attention to the general analysis and display of the combined interests of the Country as set forth in sections 13, 14, expressing my confidence that, if the necessary time and attention were bestowed upon it, it could not fail in guiding the Government to the adoption of such measures as would tend to the advancement and permanent prosperity of the various classes of the Community, and that without any sacrifice of existing interests; and I explained verbally, from the original and only copy of 1819 that I had then drawn out, the principle on which it was based, and on which the various results were arrived at, and I proceeded to express my regret that, in the course of ten years, I had met with no inducement to draw out a second copy based on the data of the Time, while the intensity of application, and absence of every other consideration pending the task, had precluded me from attempting it as a matter of gratification. All this was offered in the way of passing conversation, without either the tone or even thought of proposal on my part. The interest, however, which my elucidation of the subject produced at the moment, led to a spontaneous proposition for drawing out another copy based on the data of the Time, and that for doing so I should receive 200 or 300 guineas, in addition to the 150 guineas for the fifty copies of the book.

23. The evident sincerity with which the preceding proposition was made I expressed to be as gratifying to my feelings, as I hoped the circumstances to which it would lead would prove beneficial to the Country, and I immediately acted upon the faith of a proposition so freely and voluntarily offered, by entering into heavy liabilities for enabling me to work out a new transcript of the general Analysis and Developement of all the varied interests of the nation, based on the data of the Time, and for accomplishing the printing and publication of the book. After about ten or twelve weeks of intense application, with the aid of one of the most efficient arithmeticians of the metropolis, the Analysis was completed; but, although the proposition was for me to receive the 200 or 300 guineas before I sat down to the task, it never was paid to me at all. However, eighteen months after, on my representing to the Chancellor of the Exchequer, and the Lords of the Treasury, in January, 1831, the embarrassment in which this disappointment had involved me, I was led to expect the immediate payment of £500, and I again entered into additional liabilities on account of the printing of the book, upon the faith of receiving that amount; but, after three weeks or a month of painful suspense, I received a Copy of a Treasury Minute, dated 4th of February, 1831, ordering me the payment of £200 only, but four months after, by the friendly interference of a Member of the then Cabinet, I received a further sum of £300, pursuant to a Treasury Minute of the 24th of June of the same year.

24. Gratuitous, on the part of the Government, as the payment of the £500 may be deemed, it was not equal to the losses which I had sustained, consequent on the former disappointment in 1829. It nevertheless enabled me to proceed in the printing of the Work which I had undertaken, the expense of which, however, eighteen months after, had accumulated to an amount so far exceeding the prospect of reimbursement, that I had resolved to abandon what I was compelled to suspend, when, on mentioning, in January 1833, the embarrassment in which it had involved me to a Member of the then Cabinet, he intimated to me that he would propose to his Colleagues moving for a Committee of the House of Commons to enquire into the best mode of affording information to the Members of the House by Public Documents, when the Committee might probably be disposed to recommend for adoption those which I had prepared. The Committee, as proposed, was appointed on the 18th of February 1833, and, after having requested my attendance three several times, the Committee reported to the House that my Digest "had been prepared with great labour, and contained information which could not be obtained from any existing work, nor from the compilation then making under the direction of the Board of Trade; and recommended the attention of the House to my evidence before the Committee; and that 1250 copies of the work, when completed, should be placed at the disposal of Parliament."

25. The above recommendation of the Committee was pertinaciously and inveterately opposed by one of its members whom accident had very unexpectedly placed, not only as a Member of Parliament, but in an influential position in the Govern-

ment. This individual, with one or two others equally determined, united to oppose the recommendation of the Committee when it should be brought under the consideration of the House, and availed themselves of the position into which accident had placed them, both as Members of Parliament and of the Government, to influence all such Members as were not in the habit of thinking and judging for themselves to oppose it, on the ground of its being a job of the honourable and indefatigable Member for Middlesex, and every other species of wanton and wilful misrepresentation deemed likely to answer the purpose was anxiously resorted to. However, the Recommendation of the Committee came under the consideration of the House in a Committee of Supply on the 29th of April, when, after one of the most animated discussions ever witnessed in Parliament, in opposition to all the force which the influential position of the parties above mentioned could bring to bear upon it, I was most triumphantly honoured with a vote of 2500 guineas for the 1250 copies recommended by the Committee to be placed at the disposal of Parliament. Embarrassing as a negative to the proposition would have been to me, I considered it unbecoming as well as derogatory to myself to use any endeavour to influence the feelings of Members on the ground of personal consideration; and as such I did not speak to half a dozen Members on the subject, nor to one in the way of solicitation; and I was gratified on being informed that Members whom up to this time I do not even know in person, and others to whom I have never spoken, were among the warmest advocates in support of the proposition. To these Honourable Gentlemen, as well as to those with whom I had long been on terms of free and friendly intercourse, I cannot sufficiently express my sense of gratification for the sincerity of regard which they manifested in my behalf on the occasion.

26. Notwithstanding the strongly-marked feelings of the House in favour of the proposition, and the majority by which it was confirmed, on the Report of the Committee being brought up on the following evening I was not only exposed to further opposition, but, to speak figuratively, placed between *two fires*, by an opposition from a new quarter, induced, as far as I could judge, in despite to the Honourable Member for Middlesex, under the erroneous impression that it was an affair to which he was a party, and that the consequences of a negative to the proposition would, in some way or other, affect him; and notice was given by an Hon. Member that the confirmation of the vote would be opposed on public grounds on bringing in the Appropriation Bill at the close of the Session, and thus from January to August were all my operations further suspended, under the circumstances of penalties of £20 per month for non-fulfilment of agreements which I had entered into, and interest on a large expenditure and liabilities then incurred. At length the Appropriation Bill was brought in, and passed without a question being raised, and the Session of 1833 closed, when I considered myself at liberty to proceed in preparing for the delivery of the 1250 copies of the Papers, as recommended by the Committee, and referred to in Section 24. In December following the 1250 copies were delivered, and, on my applying at the Treasury for the payment of the £2625, I was informed that the £500 received in 1831 would be deducted, unless I delivered an additional number of copies equal to that amount. I, in consequence, received in December £2000 on account, less £60 for *fees*, and the remainder, less a further deduction of £30 for *fees*, in April following, on delivery to the Treasury of 240 additional copies; although, independently of the unexpected deduction of £90 for *fees*, it was the intention of the Committee, and of the House on approving of that recommendation, that I should receive a clear £2625 on delivery of the 1250 copies, the payment of £500 in 1831 having been approved of at that time for aiding me in the progress of the work.

27. Pending the progress of my expenditure on account of the printing of the 1250 Copies of the Papers delivered in December 1833, the individual previously alluded to who had so earnestly opposed the recommendation of the Committee, in the preceding February, availed himself of his position with the Government to obtain on the 10th of April, 1832, the Lords of the Treasury to authorise £1500 per annum to be placed at his disposal, without obtaining the sanction of Parliament, to enable him to attempt to do the very same thing which he knew I had already incurred the expense of, so rendered myself liable for doing; consequently, so far as I was justified in calculating on the public for indemnity by the sale of my Copies, that act of the Government inflicted upon me a serious injury, without saying any thing about its propriety on the ground of economy. How far the effects produced by the £1500 per annum so appropriated, in injurious opposition to my interest, have justified the act, may in some degree be estimated by a comparison of the two productions. Both are before the public; let the public therefore decide. The Statistical Society of Paris so far appreciated the production of the Board of Trade as to vote the official of that establishment an honorary medal of *bronze*, while they honoured me with one of *gold* of the same weight; and, as the relative merit of the two performances may be regarded as concerning the Public, it may not be out of place or deemed presumptuous in me to state, that, where the same subjects are illustrated under my arrangement, the information is more intelligibly given in one-tenth of the space *(vide pages 219—221 of my Digest)*, so that the Parisians appear to have very fairly estimated their respective values: being of about equal bulk, they rewarded one with bronze, and the other with gold of equal weight.

28. I have thus far shown the nature and extent of my connection with the Government, which has never had any

reference to administrations, with one trifling exception, when I was *asked*, by a Member of the late Cabinet, if I would undertake a temporary service, the nature of which on its being proposed to me (abstracted from all pecuniary consideration) offering a high gratification, I joyfully acceded to it. For the manner in which I performed that service, I received, in writing, the strongest expression of appreciation on the part of the Premier; and, for about twenty-one days' time, a pecuniary consideration of twenty-five guineas beyond the expenses incurred. Had my circumstances admitted of it, it was a service which I should have been delighted to perform gratuitously. Independent of the labour and time bestowed on the developement of the fallacy of the Sinking Fund, recorded on the journals of Parliament in July 1822, as stated in Section 17. I might with propriety refer to twenty other great questions of public importance which, since 1822, I have been either wholly instrumental or greatly aided in bringing under the consideration of Parliament; among which the Developement of the State of the Nation, on the 4th May, 1826, and of the Operation for the Redemption of the Land Tax in 1823, deserve to be noticed (Vide Journals of Parliament of those dates respectively; and for a very interesting display of the progress of the Redemption of the Land Tax, referred to in § 18, *see page 24 of my Digest of the Papers on the Finances and Commerce of the Kingdom*).

29. Much as the nineteen preceding Sections may seem to partake of personal narrative, and occasionally savour of egotism, I have considered it a duty which I owe to myself to state the facts of the case, in refutation of the groundless misapprehensions and mistakes which have been extensively indulged in, as if in conjunction with, or under the auspices of the Honourable Member for Middlesex, I was merely an aspirant for place or emolument; while, on the contrary, in all the intercourse I have ever had, either directly or indirectly, with the Government, or in connexion with Parliamentary proceedings, I not only avoided connecting my propositions with any question of consideration, pecuniary or otherwise, but in more than one instance, when influential friends have thought it right that I should do so, I have strenuously insisted against such consideration being mixed up with any proposition of a public nature upon which, at any time, I might feel desirous to fix the attention of the Government; and, so far from my having derived any pecuniary advantage from my interference in public affairs, the £3192 which I have at different times received from the Government is not half equal to the cost of production of what I have given for it, independent of fifteen years of the best period of my life having been exclusively devoted to enquiry and investigation, and watchfulness for an opportunity to render the results of my enquiry beneficial to the country.

30. On the occasion of the recommendation of the Committee on Public Documents, to pay me 2500 guineas for 1250 copies of the Papers which I had arranged, being brought under the consideration of Parliament, the means of opposition resorted to on the part of two or three subordinate members of the Government were to accuse the Honourable Member for Middlesex with its being a job of his, in seeking to remunerate me, at the public expense, for services rendered to him personally; thereby implying that I had been a hired *employé* of the Honourable Member. I am aware that this impression is very general; but on a previous occasion I have stated it to be entirely without foundation: and I again repeat, that at no time during the fourteen years' acquaintance which I have agreeably maintained with that Gentleman, has the acquaintance ever involved a pecuniary claim or consideration on my part to the value of a shilling. All the great questions which the Honourable Gentleman has brought under the consideration of Parliament, to which I have been a party, have originated with myself, and have been urged by me on his attention, as a means to forward the general developement adverted to in § 12, 13, and I am happy in having an opportunity to place on record the high sense which I entertain of the sincerity of purpose which the Honourable Gentleman has brought to bear upon every proposition which I have submitted to him, as well as on every other occasion, when the interest of the nation was the object. So far from the Honourable Member having been a party to the transaction more immediately referred to, the Committee was proposed certainly without a word having ever passed between him and me on the subject, and I believe without his knowing that any such proceeding was intended by any other means. The part he took in the affair, after the Committee was formed, was his own voluntary act, little or no intercourse having taken place between us, at this juncture. And I believe the Honourable Member's taking the lead in bringing the question before the House was a matter of arrangement between him and the Noble Lord who was Chairman of the Committee, rather than one of reference to me personally; but so little did I know of the proceedings, that the decision was come to on a day without my having been informed by any one, that such would be the case. I was at the House, pending the discussion, purely by accident; and the cordial greeting with which I was met by several Members, who withdrew immediately after the discussion was over, is duly appreciated by me, and its recollection compensates me for much of the vexation and injury wantonly and maliciously inflicted upon me by others.

31. Having in § 8, 9, brought the History of National Statistical Developement down to the commencement of the present century, and in the subsequent Sections, stated the origin and progress of my own career in that species of enquiry, as well in refutation of the unfounded imputations and embarrassment in which it has involved me as in continuation of the History of the

subject, I will now proceed to the Developement of the causes which have deranged all the social relations of the British community as set forth in the Title to this part of the present Volume. On the reconstruction in 1829 of the general Display of the aggregate combination of all the interests of the Nation, first developed in 1819, as stated in section 12; I discovered that the two main causes of the inordinate inequalities which I found to prevail were the uncontrolled application of scientific and mechanical power to the purposes of manufacturing production, and the extended involution of Foreign Loan transactions with our external commerce. The developement of the first of these causes led me to discover the fallacy involved in the three Population Returns of 1801, 1811, and 1821, and their entire inefficiency for any useful purposes of legislation. The result of the three Returns will be found exhibited at page 8 *post*, which page shows that at those three periods the occupation of the Population was returned under three heads only, in the proportion of about a half under the head of "*Trade, Manufactures, or Handicraft,*" and less than a third under the head of "*Agriculture,*" the remainder being returned under the head of "*all others,* not included under either of the two preceding classes;" hence the delusion which for five and thirty years has so fatally prevailed in regard to the supposed preponderance of the manufacturing over every other interest of the kingdom. It was the desire to dispel this delusion which led to the district arrangement of England and Wales, as exhibited at pages 8—90, *ante,* of the present Volume, and as stated in the first five sections of the Introduction.

32. The analysis of the Country, which I have divided into districts according to their prevailing productions or occupations, is exhibited as a frontispiece to the District Arrangement, by which it will be seen that, instead of a half, the Manufacturers, after allowing for an excess of females and children employed therein, do not amount to a seventh part of the Total Population; and it will be seen by the note at the head of the page of results, that it is mechanism, and not manual labour, which contributes with such facility and so largely to the increased supply of manufactured productions; and that, so far from the number deriving subsistence from manufacturing operations preponderating over the agriculturists, or having increased, the number is actually less in 1835 than it was half a century ago, notwithstanding the great increase in the aggregate of the Population. Startling and strange as this declaration may seem to the syllogists and charlatans who declaim against the Corn Laws, and talk about free trade, it is a fact which, on full and fair enquiry, will prove no more strange than true. It will be in the recollection of every man of forty years' experience in the domestic affairs of the British Population, that, at the commencement of this experience, not only every Farm House, and every Labourer's Cottage, but the habitations of the greater portion of the Handicraftsmen, over the whole of Great Britain, were so many manufacturing establishments.

33. Half a century ago, the three Counties of Essex, Suffolk, and Norfolk, constituted a great Manufacturing District, bearing a similar relation to the metropolis as Lancashire and the West Riding of York do at the present time; while Hampshire, Wilts, Gloucester, Somerset, and Devon, were wont to afford large supplies of manufactured in exchange for foreign productions. The uncontrolled application of Scientific and Mechanical Power to manufacturing purposes has not merely deranged the domestic operations of combing, carding, spinning, knitting, bleaching, &c.: it has annihilated them in 1,200,000 family establishments, and concentrated, with imposing effect, the whole operation in one great District. Nor is it the transfer of operation merely, which the introduction of mechanical power has effected; it has entirely changed the relations of Society; farming establishments that were wont to domicile two or three female domestics, filling up their time, from the duties of the dairy and household affairs, in spinning or other domestic manufacture, now domicile only one: an equal reduction in the male part of the farming establishments has also taken place; where three male servants were wont to be domiciled, one or two only, at most, are now kept. Had wool-combing, carding, spinning, knitting, and weaving, continued domestic operations, the change in the domestic habits of the occupiers of the soil would have been of little importance; but, in proportion as the spinning-wheel was abandoned by the matrons of the farmers, employment diminished in the cottages, and all the means of domestic comfort which the produce of the spinning-wheel was wont to supply became entirely subverted; hence the tendency to concentration of numbers in the metropolis and towns, and *foci* of manufacturing operations.

34. The pecuniary privation, which the subversion of domestic manufactures has occasioned, is the least part of the baneful effects which have resulted from it. A moody melancholy and recklessness of purpose now unhappily prevail, where, forty years ago, the hum of the spinning wheel, accompanied by the tale or the song, was wont, on a winter's evening, to greet the husbandman on his return from his daily toil, diffusing social enjoyment around the hearths of 800,000 cottages: nor, is the absence of employment, the only grievance of which the population of the rural districts has to complain, the accumulated wealth derived from mechanical power in its concentrated districts of action, in conjunction with the increased taxation, which it has so materially aided in establishing, has tended to increase the cost of all the articles of subsistence and comfort, while the means of a million of families, for obtaining subsistence, have tended to decrease; let it not, however, be inferred from this that scientific and mechanical power are evils. It is not scientific and mechanical power in themselves which occasion those inordinate disproportions which now so unfortunately prevail; but the absence of all due control.

35. If, on the first application of scientific and mechanical agency to the general purposes of manufacturing, their power, tendency, and effects, had been accurately estimated, and regulated accordingly, they might long ere this have justified the delightful impression which they appear to have made on the mind of the amiable French philosopher ***Biot,*** when, on his return from assisting ***Col. Mudge*** in measuring a degree of the Meridian on the Shetland Isles, in the summer of 1817, he viewed the manufacturing operations of Lancashire, and said that he "here saw the powers of nature employed in every imaginable form in the service of man, and man himself reserved, as a more precious and delicate piece of mechanism, for the intermitting or accidental operations alone, which his divine reason renders him best qualified to execute." But delightful as the display of scientific and mechanical agency appears to have been to ***M. Biot,*** and as it invariably is to all perceptive minds, his agreeable sensations appear to have been countervailed by the impressions arising from the moral degradation with which he saw it accompanied; for he further states, that whether it was that the contemplation of the moral state of Society, which had so much engaged his attention, had left impressions too deep on his mind; or that the value of a manufacturing system, on an extensive scale, ought rather to be estimated in its natural, or aggregate, results, than in its local and individual influence, he certainly admired that display of manufacturing operations more than he wished it for his country.

36. Such were the conclusions (as stated in the four preceding sections) to which I had been led by my arrangement of the most populous Parishes and Towns into districts, and my analysis of the three Population Returns of 1801, 1811, and 1821, when the results of the Census, or population enquiry, of 1831, came officially before the Public, not merely to confirm the conclusions to which I had hypothetically been led, but to prove the extremes to prevail in a much higher degree than I had ventured to state. I have said in my proëm to this part of the present volume that the Population Returns of 1831 will constitute an epoch in the history of the United Kingdom; it will, therefore, be next in place for me to show in what respect they are entitled to so much higher consideration than the three preceding returns of 1801, 1811, and 1821. In addition to the Return of Occupations, under three heads, as stated in section 32, and exhibited at page 8 *post*, and the other usual details, the Returns of 1831 exhibit the Male Population of the kingdom, twenty years of age and upwards, under nine several heads of occupation; they also exhibit the Number of Male Servants under twenty years of age, and Female Servants of all ages, in every Parish, Town, and place in the Kingdom. Analyses of these results in each County of England, transposed in various ways, will be found at pages 9—11; and for Wales and Scotland, at page 76 *post*; but, for a more interesting display at one point of view, see pages 256—7 *ante*.

37. It will be seen, on reference to page 256, that the actual manual force of Great Britain, as indicated by the number of its Male Population twenty years of age and upwards, in 1831, was 3,975,514, and the proportion thereof wholly and exclusively employed in *Agriculture* was 1,243,057, being nearly one-third of the whole; while the proportion employed in the making of *Machinery* and *Manufactures*, was only 404,317, being little more than one-tenth of the whole; and that nearly three-fourths of the Total Population of Ireland are exclusively *agricultural*, and less than a seventieth part employed in *manufactures*. In addition to the very interesting results deduced from the Official Returns of 1831, as exhibited at pages 156-7, they further contain, at the end of each County, a detailed account of the various occupations of the 1,159,867 Male Persons, twenty years of age and upwards, returned under the head of *Retailers* and *Handicraftsmen*. These very interesting details I have classed, arranged, and exhibited at one point of view, under upwards of 600 several heads, following pages 91-2, *post*, which pages exhibit 125 of the leading occupations, arranged in alphabetical order, as an Index to the classified display which they precede; and pages 93—5 will be found to contain a detailed display of the nature and extent of the manufacturing operations carried on in every Town in the Kingdom. The next most interesting feature of the Official Returns of 1831 is the large number returned under the head of *Labourers other than in Agriculture*, amounting, out of 3,974,541, to 608,712; this number contains all those employed in Quarries and in Mining operations, in the Fisheries, on Roads and Canals, and in conveying thereon by coach, waggon, barge, &c., and in casual employment; while those returned under the head of *Capitalists and Professional Men* will include Dramatists and Artists of all kinds, as well as Merchants, Bankers, Teachers, and members of the Clerical, Medical, and Legal Professions; and those under the head of *Other Males, twenty years of age and upwards, except Servants*, may be considered as including disabled Paupers, and Almsmen, of all kinds, Swindlers, and all others subsisting by casual means, as well as Proprietors, Annuitants, Mortgagees, and others subsisting on fixed money incomes.

38. Notwithstanding the insignificance, relatively speaking, of the numbers employed in manufacturing operations, more especially so when viewed in reference to the United Kingdom at large, instead of Great Britain separately, and the preponderance of the Agricultural over every other class of interests; the Returns, under the three usual heads, which were made in 1831 for the sake of comparison with the previous Returns of 1811 and 1821, will be seen on reference to either page 8, or 90, *post*, to indicate a decrease of *Agriculturists* in 1831 as compared with 1821, an increase under the head of *Trade, Manufactures, and Handicraft*, and a very great preponderance under the third head; the cause of the variation will be found explained in the

note to page 11, *post*; but what can be said in vindication of those who, in spite of all the evidence adduced, as exhibited in the preceding section, in exposure of the fallacies involved in the Returns of 1811 and 1821, still persist in contending for a preponderance of numbers employed in manufactures compared with those employed in Agriculture? yet, palpable as is the fallacy, a member of the House of Commons, whom I have previously had occasion to refer to in section 15, then holding a prominent situation in the Government, in his place in Parliament, on the 7th March, 1834, after a diffusive species of advocacy of the importance of Foreign Trade, and especially of an unrestrained admission of Foreign Corn into Great Britain, thus endeavoured to sustain his argument:—"I will not," said he, "go into the comparative state of the Population—I will not ask whether, if there be in Great Britain 960,000 families dependent upon Agriculture, and 1,400,000 families dependent upon Manufactures and Commerce, which is the class that most immediately demands the consideration of the Legislature."

39. It is difficult to imagine how any one, much more a member of the Government, should have presumed, after the evidence of the Population Returns of 1831 had been made public, to utter such an inuendo, as that, for every ninety-six persons employed in Agriculture, there were 140 employed in Manufactures and Commerce, when in reality the proportions are, in Great Britain, as 120 in Agriculture to only forty in Manufactures and Commerce; and, if the same rule of proportion be applied to the *United Kingdom* at large, the ratio will be as 240 in Agriculture to less than twenty in Manufactures and Commerce; and, as far as the question applies to the external relations of the Country, the proportion of the Population of the United Kingdom dependent on Manufactures and Commerce does not amount to a 140th part of the whole. Additional confirmation of this will appear hereafter, when I have shown that it is not in reference to the question of employment of the Population merely that truth has been grossly violated in Parliament. On the occasion of the Hon. member for Whitehaven calling the attention of the House to the deranged state of the Nation, on the 22d April, 1833, the same *official functionary* just previously adverted to presumptuously ventured to deny the premises of derangement on which the Hon. member for Whitehaven had based his argument, and endeavoured to impose on the unsuspecting confidence of the House, by asserting that, as far as the condition of the Country could be measured by the rule of consumption, the increased consumption of all the great articles of enjoyment and luxury indicated the highest degree of prosperity; continuing in detail to assert that, since a given period, the consumption of Sugar had increased 83 per cent., of Tea 65 per cent., of Tobacco 31 per cent., and several other articles in like proportion, and exceeding in ratio the increase of Population.

40. The years of comparison in respect to sugar were 1832 with 1818, and on a *prima facie* view of the official accounts the assertion of increase in 1832, as compared with 1818, appears to be true; but it ought to have been stated that, on the 5th January, 1818, the duty was raised from 27s. to 30s. per cwt., and as the increase of duty had been antecedently known it caused the duty to be paid in anticipation of 1818, on three or four months' consumption of sugar at the close of the year 1817, and as the duty was lowered again at the commencement of 1819, it caused an unusual diminution of Stock in the hands of all the dealers at the close of 1818; these circumstances caused the quantity of sugar charged with duty in 1818 to be unusually small, the receipt at 30s. per cwt. having been only £2,331,472, while at 27s. per cwt. in the preceding year it had been £3,967,154, and in 1808, ten years preceding, £4,074,531; and at 24s. per cwt. in 1832, it was only £3,986,519; independent also of the seeming increase of consumption which the special circumstances here disclosed sufficiently explain, the price of sugar in the year 1818 averaged, exclusive of duty, 50s. per cwt., (in 1814 it averaged 73s. 4½d.) making the year's Importation in 1818 equal to a value of £9,163,800., while at the commencement of the year 1832 the price was only 23s. 5½d. per cwt., and the average of the year not more than 26s. per cwt., or a total value of less than £5,000,000: hence, admitting the fact of an actual increase of consumption to have taken place in the ratio asserted on the occasion in question, it may be asked, What consequences have resulted to the producer consequent on the prostration of interest which the difference in value here exhibited must have occasioned?

41. In respect to Tobacco, the comparison of the consumption of the year 1832 was made with that of 1814, and again the *prima facie* evidence of official accounts warranted the assertion; but it is shown at page 203 of my Digest of all the Official Accounts relating to Commerce and Finance during the last half century, that the importation of Tobacco into Great Britain, which in the four years 1788—1791 had averaged upwards of 54,000,000 of lbs. per annum, and which in 1810 amounted to 52,641,800 lbs., in 1813, consequent on the war then waging between Great Britain and the United States of North America, amounted to only 2,510,511 lbs. This suspension of supply caused the price of the article to be enhanced, not in any rate per cent. merely, but five or six fold, which inordinate increase of value caused only 10,503,917 lbs. to be charged with duty in 1814, against 15,043,533 lbs. in 1811; and so far from any increase of consumption having taken place, the total quantity consumed in the five years, ending with 1831, was very considerably less than in the five years ending with 1811, notwithstanding an increase in the total population exceeding 30 per cent. In respect to Tea, the assertion was actually founded upon the consumption of Great Britain at one period against the consumption of the whole of the United Kingdom at another period!! Several other comparisons were ventured upon, all equally fallacious and reprehensible.

42. The main point to which the erroneous suppositions, and false assertions of a preponderance of the Population being dependent on Manufactures and Commerce, have been directed, is the advocacy of an unrestrained Importation of Foreign Corn; and having shown, in section 39, by reference to page 256, *ante*, as well as to the frontispiece to the District Arrangement, the proportion of the Population dependent on each great branch of production or occupation for subsistence, I will in the next place proceed to show the effect which an unrestrained Importation of Foreign Corn would have on each of the several classes and orders of the Community. During the three years, 1832—4, the supply of grain, of the growth of the United Kingdom, has proved equal to the consumption; and, notwithstanding the conceited and hateful theories, some time since extensively, and still, in some degree, indulged in, that all the most productive soils of the United Kingdom have been forced to their utmost extent, and that the Population was increasing in a ratio greatly exceeding the means of subsistence from internal supply, it will hereafter be shown that the power of the soil of the United Kingdom is equal to the production of a much greater supply than any extent of consumption which can at present be anticipated. This conclusion being admitted, and confirmed, it must then be admitted that any induction of external supply for internal consumption, be it much or be it little, must of necessity lead to a corresponding diminution of demand for the internal supply.

43. There is, however, another point of view in which the subject of the Corn Laws may be regarded, viz. that of assuming the internal supply of corn *not* to be equal to the demand, but that some rate of Import duty may be deemed politic to sustain some given, or required, scale of price; in either instance the inevitable tendency of any induction of Foreign Supply will be to cause a lower price to prevail than would otherwise be the case; the question, therefore, of advantage or disadvantage, arising from a free importation of Foreign Corn, resolves itself into one of proportion, as to the number likely to be benefited by a lowness of price and the converse, or by Importation or Non-importation: for it will be seen to be not exclusively a question of price. One portion of the community that would be directly benefited by lowering the price of corn is, that which subsists exclusively on fixed money incomes. This portion may be estimated at about a fortieth part of the whole community; and, estimating the money value of their present annual consumption of corn at £2,500,000 per annum, in the event of such a reduction in price taking place as would give them the same quantity of corn for £2,000,000 of money, instead of £2,500,000, other parties may be indirectly benefited by an enlarged expenditure among them, which the £500,000 would afford, but the question of this benefit will be more particularly explained hereafter.

44. Another party that would be directly benefited by the free importation of corn, or by its importation under a modified rate of duty, is the exporting merchant, and that portion of the manufacturing interest which depends more immediately on external consumption for their productions. It is not lowness of price, however, that will constitute the source of benefit to these parties, but aggregate amount, and the higher the price, the better for them. If any additional quantity of corn be imported, say to the extent of £2,000,000 or £5,000,000 value per ann., so much additional means are created for payment of British productions exported, affording a chance for an enlarged exportation, increased facility of payment, and greater profits; but the numbers directly benefited under such operations will not exceed the 1000th part of the whole community, including shipowners, corn-factors, &c., while, for every million of advantage on one side, five millions of disadvantage would be inflicted on the 1,243,057 agriculturists of Great Britain, an equal number in Ireland, and on all in addition, more immediately dependent on the farmer for employment and subsistence. A common-place opinion universally prevails, that the great mass of the labouring population of the Kingdom would, indiscriminately, be benefited by lowering the price of corn; but no opinion can possibly be more fallacious. For the labourer to be benefited by a lowering of prices, it is necessary to guarantee him a continuance of his pre-existing rate of wages; while, on the contrary, he is not merely subject to an equal, but frequently to a greater reduction in the rate of his wages, than is afforded him by the reduction in the price of commodities. Another fallacious opinion is, that the manufacturing and shopkeeping interests of the country, generally, would also be benefited; and some are so obtuse and perverse as to assert that even the producers themselves will not be precluded from enjoying the blessings of advantage in selling their corn at 35*s.* per quarter, instead of 60*s.* The latter assumption appears to be founded on the supposition of a liberal importation of foreign corn forcing down the rate of rental.

45. The aggregate money value of the saleable produce of the soil of Great Britain, at the present scale of prices, [1834-5] may be estimated at £160,000,000, in the proportions of about £60,000,000 for grain of all kinds; an equal amount for animal food; and about £40,000,000 for Forage, Butter, Cheese, Wool, &c., &c. Out of this, about £40,000,000 are payable for rent, and the proceeds of the whole constitute the means of mutual exchange for an equal value of the various imported and manufactured productions of the kingdom for internal consumption. Now, mark the effect that will be produced upon the various internal interests of the country, by any material change either in the mode of supply, or alteration in the value of grain. The largest importation of foreign corn into Great Britain ever known was in the year 1831, in which year the wheat amounted to 2,311,362 qrs., and that of all other grain to 1,230,445 qrs., exclusive of 2,430,529 qrs. (557,219 of which was wheat) from

Ireland; in that year the price of wheat averaged 66s. 4d. per qr. This large importation rendered the supply greater than the consumption; and the price consequently declined to an average of 58s. 8d. in 1832; in 1833 to about 52s., in 1834 to about 44s., the minimum at the close of the year being only 40s. 1d. The reduction in price having carried the import duty up to a prohibitory rate for consumption, the quantity of grain imported from foreign parts in 1832, amounted to only 641,125 qrs., still less in 1833-4; yet, notwithstanding this inconsiderable importation, it is a lamentable fact, that the present scale of prices, notwithstanding the fairness of the crops, and the favourableness of harvesting during the three last seasons, does not, on the hard-working lands, such as the alkaline clays of Essex, and most of the Districts exhibited in the right hand column of pages 239-40 *ante*, produce an amount equal to the cost of labour and wear and tear of the implements of production, even where no rent is paid. What then must have been the condition of this large portion of the community, had the importation of foreign corn been unrestrained? An importation like that of 1831, with a duty of 10s. per quarter for wheat, would have sent the average price down to 35s., if not to 30s. per quarter, possibly 25s.

46. The aggregate annual production of grain (in quantity), in all Great Britain, may be stated at about 16,000,000 quarters of wheat, and 20,000,000 quarters of all other sorts; now it is the disproportionate effect which the imported, being the less quantity, has upon the greater quantity of internal growth, that constitutes the most important point for consideration. If, by the importation of 3,500,000 quarters of foreign corn, as was the case in 1831, the average price should be reduced 5s. per quarter only, although it would add about £5,000,000 of amount to the means of payment for British products exported (except so far as it did not increase the export of bullion), it would diminish the aggregate value of the corn of British growth double that amount, and probably diminish the value of animal food and all the other products of the soil in an equal degree, whereby the money means of internal exchange would be diminished in the ratio of four to one of increase by the importation; and suppose the importation of foreign corn should lead to an increased demand for bullion, instead of the products of British skill and labour, which it doubtless would, to a very great, if not to the full extent of the value of the import, mark the derangement that would ensue, so long as gold is, as ridiculously as it is unphilosophically, left to be demanded at (relatively speaking) a fixed low rate of value; but the sciolists will doubtless contend that, if bread and all the other articles of subsistence are made *cheap*, it will lead to all other articles becoming *cheap*, and all will be equally benefited; even the landholders or rent receivers, by the reduced price of all commodities, supposing their rents to be reduced one half, will have no cause to complain, inasmuch as they will be able to command as many comforts with half the amount, as they were with the larger sum. But to render the lowering of prices a benefit to those to whom high prices are at present a grievance, it is, as before stated, necessary to ensure the aggrieved party a continuance of their present means of purchase, while it is conclusive, that if the aggregate saleable amount of agricultural produce be reduced from £160,000,000 to £140,000,000 or to £120,000,000 per annum, whether that difference be the defalcation of the rent payer or the rent receiver, the whole trading, handicraft, and manufacturing classes, of necessity, become subject to a corresponding diminution of receipt, and, whether the diminution fall upon wages or profits, a general increased derangement is an inevitable result.

47. One of the assumptions of the sciolists is, "that every shilling added to the price of corn by the Corn Laws is equivalent to a tax on the corn of the United Kingdom of £2,600,000; a duty, therefore, of 10s. per quarter," say they, "would be equal to a tax of £26,000,000;" but mark the senselessness of this assumption, in the first place, in regard to including Ireland, the production of which is estimated at 16,000,000 qrs., 3,000,000 of which are annually imported into Great Britain, exempt from all duty; the duty, therefore, imposed on corn of foreign growth, is a *premium* and not a tax, to the amount of whatever the rate of duty may be, on all corn of Irish growth; and, next, as regards the assumption generally; instead of a tax, every shilling per quarter, added to the selling price of grain of British growth, either as the result of a duty on that of foreign growth imported, or as a natural consequence of increasing demand and consumption, is so much added to the means of increasing the demand and enhancing the value of all the productions of handicraft and manufactures. It is true a case may be assumed, where a duty on foreign corn imported, might seem to operate as an unjust tax on the consumers and the great body of the community; take, for example, any place containing 100,000 persons deriving subsistence by their manufacturing labour, and only fifty persons deriving subsistence from the produce of agriculture, and then suppose a tax of 10*s.* per quarter imposed on foreign corn imported, on the plea of protecting the interest or encouraging the industry of the fifty agriculturists; such a proceeding as that, might seem absurd and unjust to the 100,000 manufacturers; but, even here, such a tax being absurd and unjust would depend on other circumstances. If the tax were levied in a way to lead to a concentration of money means in the hands of two, or three, or a few individuals who would give it an external application like that of vesting it in foreign funds, or of hoarding it in vaults, as is done at the present time by some of the inhabitants of Amsterdam, and as was the habit of the Dey of Algiers, and other eastern Satraps; then indeed it would be an injustice and operate as an oppression as completely as though an invading force had levied black-mail or contribution to the like extent; but, supposing the sum levied to have an internal application for the

mutual protection, or for promoting the convenience and comfort of the whole community, it is just as well levied on corn as on any other commodity, or by any other means.

48. Another assumption of the Declaimers against the existing Corn Laws, is, that by lowering the price of corn, and thereby *cheapening* the means of subsistence, we shall be enabled to successfully "*compete with foreigners,*" and to become "*manufacturers for all the world.*" This assumption may be pronounced as involving every species of absurdity. First as to *cheapness.* What is cheap? the term is relative; bread may be *cheap* at 1*s.* per lb., or it may be dear at 1*d.* per lb., it being in relation to other things and circumstances that it is either the one or the other; next, as to *foreign competition,* this implies that other nations have their speculatists who indulge in the foolish notion of manufacturing for all the world, as well as Great Britain; and therefore, however *low* England might be disposed to *sink,* there is no guarantee against other nations *sinking* still lower. But the absurdity of the notion of "manufacturing for all the world" will be, perhaps, the most effectually exposed by assuming, for the sake of illustration, that such was the case, and by showing the effects that would follow, admitting it to be so. Assume, therefore, that no such thing as foreign competition exists, and that the demand for the products of British industry, is entirely unopposed. What is the equivalent which the nation, in its aggregate capacity, is to receive, for the increase of quantity proposed to be given?

49. Suppose that, in 1835, the manufactured productions exported exceed by some given quantity, say one-half, the quantity exported in any previous year; and suppose, further, that they meet with a ready sale in the several countries to which exported. The beneficial effect of all mercantile or trading operations is determined by their ulterior result; the advantage or disadvantage, therefore, that would arise to Great Britain from becoming "manufacturers for all the world" would depend, not upon the demand, however urgent, which the products exported might meet with; but upon the value which the products received in exchange (be those products corn, wine, oil, or what they may) can be made to realize, and that value will be governed, not by the induction of the products, but by the power and means of consumption; while the extent of consumption will be governed as well by the number of consumers as by their several means, and the extent of their means by the mode of distribution in the rate of remuneration for labour and otherwise, and sometimes it would depend upon the nature of the articles received; the consumption of wine and of oil, of tea and coffee and sugar, may be enlarged, and that to a degree somewhat difficult to define, while the consumption of corn has its limit; for although bread may be deemed, as it is, an article of the first necessity, no person will consume bread beyond a given quantity, any more than he will consume vinegar, mustard, or pepper beyond a given quantity. Man eats bread to satisfy his hunger; he drinks wine for enjoyment.

50. It is stated in § 16, that on my working out in 1819, the Arithmetical Display of all the highly involved relations of British Society I found the mechanical power then in operation equal in production to 120, and in consumption only to ten; that is, machinery, in all the various processes of its construction and reparation, in which ten persons only are employed, when put in operation, either displaces or produces equal to the labour of 120 persons. The disproportion between mechanical and manual power has greatly increased since 1819, and is still increasing: indeed the one may be regarded as advancing in a constantly-increasing ratio, while the other, under existing circumstances, is exposed to continuous depression; hence, suppose in Great Britain the career of "manufacturing for all the world" and an unrestrained importation of foreign corn to have commenced, the immediate consequences would be (supposing the career not to be counteracted by external causes), the creation of new fortunes and increase of existing ones; while others to a greater extent, and ultimately all engaged in agricultural pursuits, would be annihilated; and although the increasing application of machinery would call for an increase of manual attention to those intermitting or accidental operations, which, as *M. Biot* has expressed it, man's divine reason renders him best qualified to execute; still pursue the career of "manufacturing for all the world," and receive corn in common with every other article in exchange, to the utmost extent to which the operation can be carried, the ultimate result would be an increase of inequality in proportion to the increased magnitude of the operation.

51. Besides, Why manufacture for all the world, any more than grow corn for all the world? The latter proposition is quite as rational as the former, admitting even the doctrine of the pedantic disciples of the Theory of Rent, who by a train of reasoning as ridiculous as that of their Geometrical ratio of increase in population, against an Arithmetical law of increase of subsistence, lead themselves to the conclusion that all the productive soils of Great Britain are exhausted; while the very converse is the fact, as will be shown to demonstration hereafter. But admitting it to be so, her colonial possessions would amply justify the proposition, that is, as a counterpart or set off to the proposition for manufacturing for all the world. Both are ridiculous; but, if one is less so than the other, it is that of proposing to grow corn, rather than to manufacture for all the world. If it should be thought, that by having confined my example of the effect of manufacturing for all the world to an operation of exchange of manufactured productions for agricultural productions, without reference to the accession of money-wealth to which it might

lead, the answer is, follow up the investigation as far as you please; so long as the energy of a community is directed to the object of forcing any one interest to preponderate over another, the consequences inevitably to follow must be increasing disproportions to such a degree as either to destroy themselves, or to endanger, if not destroy, the entireness of interest of the whole.

52. As the observations, contained in the preceding sections, imply an objection to the Importation of Foreign Corn, as well as to the uncontrolled extension of manufacturing operations, and as those two questions involve all the great principles of human action, it may very justly be asked, What is the course to be pursued? Such a question, put in reference to any nation, to be properly answered, requires to be considered, not on general principles alone, but in reference to any peculiar circumstances under which a nation may be placed, in regard to locality, relation, climate, numbers, condition, &c. The rule of action applicable to one community may be totally inapplicable to another; and not only so, but a rule of action may be applicable to a nation at one period, and totally inapplicable to the same nation at another period. It is under considerations like these, that the UNITED KINGDOM of GREAT BRITAIN and IRELAND presents herself as a phenomenon in the History of Nations; limited (comparatively speaking) in her central dominion, and relatively inconsiderable in number, she reigns (bunglingly, rather than either majestically or gracefully, it is true) arbitress of the world; and although she has not attained in luxury all that existing evidences of Egyptian and Roman taste, and munificence, as well as History, make us familiar with, yet in refinement, in elegance, in abundance of all the means calculated to render her whole population happy, and an earthly existence delightful, she has not only never been surpassed, but never equalled.

53. Notwithstanding the high and palmy state in which the United Kingdom of Great Britain and Ireland presents herself to the nations of the earth, containing within herself, or commanding all the means of human enjoyment in a much higher degree than ever before existed, and with all the powers of nature, as M. Biot has expressed it, subservient to her will; she also contains within herself all the elements of disorder, and presents also an extent of privation and misery as appalling and deplorable to contemplate, as the means of relieving them are cheering and delightful; for the existence of anomalies so discordant there must be some special and peculiar causes; the causes are, 1st, the uncontrolled application of mechanical power; 2nd, the unparalleled extent of fixed money obligations; 3d, the ascendant influence of a monied interest; 4th, the inducement for, and facility to transfer the value of the products of British labour into foreign security and capital, which the three preceding causes, aided by a standard of value inapplicable to the combination, affords; 5th, speculative and inapplicable legislation; and, 6th, the ascendancy of opinionism.

54. The evil effects which flow from the first four of the previously defined causes, do not arise either as a consequence of their existence or extent, but as a consequence of the absence of due control and regulation. I have shown, in my Introduction to the Display of the Financial Operations of the United Kingdom, in each year since 1792, that it was the progressive extension of mechanical power to manufacturing purposes that supplied the means which sustained the war expenditure, out of which the other three causes expanded; consequently, in proportion as the mechanical power tended to that expansion, if properly directed and controlled, it will prove more than equal to sustain them. It is, therefore, not the extinction or diminution of those causes that is required, but their due regulation and control; nor, as it will be seen as I proceed, will their due control and regulation tend in the slightest degree to diminish either their sphere of action or their several respective interests; but, as the required regulation and control must be given by the Legislature, all the evils, resulting from social derangement, which have so far prevailed, and all the difficulty of effectual removal, appear to have emanated from, and to rest with, the fifth previously defined cause, viz. inapplicable legislation; for, although the sixth may be regarded as the most obnoxious in its influence, as it predominates only as a consequence of inapplicable legislation, if legislation can but be correctly guided, it would of necessity lead to the subversion of opinionism.

55. There is an inherent tendency in Society for some one class or portion to be constantly aiming at obtaining and maintaining an ascendancy; while accidental circumstances occasionally contribute greatly towards the obtaining of an ascendant influence, and the great mistake of legislation has invariably been to cherish those ascendant influences, and to favour the stronger party at the increasing expense of the weaker, instead of constantly endeavouring, as it is its duty to do, to maintain an equilibrium. It is to this mistake in legislation that we are to trace the origin of the Excise laws, as stated in section 52 of the Introduction; the perversion of the funds intended for the augmentation of the smaller Benefices, as stated in section 16; the profligate system of money dealing, which has prevailed since the commencement of the war in 1793, which led in 1819 to £500,000,000 of nominal capital, created between 1793 and 1815, for a great part of which 10½ ounces of gold only were received for every £100 of capital created, being, in 1819, rendered convertible into gold at the rate of from twenty-one to twenty-three ounces for every £100. It was this mistake also which occasioned in 1832 forty members to be returned to Parliament from the manufacturing district of Lancashire and the West Riding of York, as exhibited at pages 148 and 152 of the Alphabetical

Arrangement of the Parishes and Towns of England, against only twenty members from the metropolis and surrounding districts, although the latter preponderate in Population, and are as two to one in Value of Property, as shown at page 146 of the same Alphabetical Display: and which, among numerous other cases that might be mentioned, led in 1834 to the funds levied in upwards of 15,000 provincial districts in England and Wales, for the relief of their own poor, being placed at the control of an arbitrary authority in the metropolis.

56. It is shown in Sections 33-4 that the effect of the extended application of Scientific and Mechanical Power to manufacturing purposes has been to annihilate household industry in the rural districts, and deprive 800,000 to 1,000,000 of families in Great Britain, of the means of supplying themselves with those domestic comforts which, forty years ago, the produce of the spinning wheel, and other occupations connected therewith, was wont to afford; it is the privation thus produced which has led to the inordinate disproportions exhibited at pages 239-40, *ante*. It will be seen, on reference to those pages, that while numerous Parishes and extensive Districts, limited in Population, yield great rentals, other Parishes and Districts, productive only at a great expense of labour, and risk of season, yield comparatively but little rental, and are yet oppressed with local burdens in the proportion of three and four, and in some cases of ten, fifteen, or twenty to one. In tracing the cause of these disproportions to their source, the greatest pressure will be found to prevail in Parishes and Districts in which formerly domestic manufactures more generally prevailed. Were this species of analysis carried through the whole of Great Britain, it would exhibit about 4,000,000 of acres, yielding about £10,000,000 of rental, not contributing more than £750,000 in local taxation for the support of the Poor and the Church establishment; while another 4,000,000 acres might be selected, not yielding more than £3,000,000 of rental, yet oppressed with a demand of £1,500,000 for the relief of the Poor and for Tithes.

57. I first called the attention of the public to the inequalities of Local Taxation in the Introduction to a Statistical Display of the County of Berks, which I published in 1830, in which County I found the extremes to be as fifty to five, or ten to 1; and I then submitted to the consideration of the public an equitable assessment for the whole of the County, if not for the whole of England and Wales, the desirableness of which presented itself more strongly to my mind on the occasion of the official service which I performed in 1832, adverted to in section 28, when, in one instance, it was represented to me that the Parochial Assessments alone, in an extensive parish in Sussex, amounted to fifteen or sixteen shillings in the pound, whereas, on investigation, I found them not to exceed two shillings and sixpence, the mode of Assessment occasioning the misrepresentation. Statistical precision alone would justify the adoption of an equitable rate, in respect to Ecclesiastical as well as Parochial Assessment; but the effects which the uncontrolled application of Mechanical Power have produced in the rural Districts render much greater relief necessary than an equitable rate would afford. Since therefore Mechanical Power has been the cause of the privation and derangement so oppressively felt in all the hard-working Districts of the Kingdom, that is, in all those Districts where the soil is productive only at the expense of great labour and risk of season, it will be as equitable as politic to render Mechanical Power amenable to assessment for their relief.

58. Independent of the privation and derangement which I have shown Mechanical Power to have occasioned in the Rural Districts, on my arriving, in 1819, at the conclusion of the vast disproportion between its producing and consuming power, I saw the necessity of bringing it within the pale of Taxation, not as a measure of Finance, but as one of regulation; the proposition, however, involved so many considerations, that I have never before ventured publicly to declare that necessity; but having now shown so clearly the desolating effects which it has inflicted, and still continues to inflict, on so large a portion of the community, I should deem it a dereliction of duty longer to refrain from the endeavour of awakening the attention of the public and the legislature to the subject. Involving however, as it does, a consideration of the whole of the external relations of the Country, as well as of its internal interests, it is still, in respect to detail, more a matter for state or closet arrangement than for public developement.

59. I have stated in the fourth defined cause of existing derangements (see section 53) that one of the evils resulting from the uncontrolled sway of Mechanical Power, aided by an inapplicable Standard of Value, and an absence of commensurate legislation, has been that of facilitating the transfer of the Value of British Labour into Foreign Security and Capital; this is an evil, both in nature and magnitude, which no control or regulation of the Mechanical Power, as an abstract measure, will now remedy; therefore, inasmuch as it is a combination of causes that are operating to increase those disproportions which, as set forth in the Title to the present Exposition, endanger the existence of the integrity of the Empire, it is not an abstract measure, but a combination of measures, in due reference to each other, that are required to produce the necessary equilibrium. In section 16, I have adverted to the Notes which precede the General Display of the extent of the external transactions of Great Britain with each of thirty-two different parts of the world, in each year since 1813; those notes show that it was the product of Mechanical Power which sustained the war, and which, since the termination of the war, has caused upwards of £100,000,000 value

of the products of British skill and labour to be exported for conversion into Foreign Capital; nor is this the whole of the effect which has resulted from an absence of due legislation, as will be rendered apparent by the following illustration.

60. Since the termination of the war in 1815, it has been the boast of France that she has coined upwards of 2,000,000,000 of *francs*, equal to £80,000,000 in sterling value; and of the United States of North America, that they have liquidated a debt of 127,000,000 of dollars, equal to about £30,000,000 in sterling value. I pause here, under mingled feelings of sympathy for the privation which these two acts have produced among the people of Great Britain; of reproach to those whose duty it was to prevent that privation; and of regret for the general apathy which prevails in regard to the nature and interest of the relations of Society, before stating that both have been effected at the exclusive expense of British skill and labour. Startling and strange, nay preposterous, as this declaration will doubtless appear to all abstract thinkers, it will, like that in section 42, of there being now fewer persons in the United Kingdom deriving subsistence from manufacturing operations than there were forty years ago, prove, on full and fair investigation, to be no more strange than true. It belongs rather to a developement of the nature and extent of the external commerce of the Country than to this exposition, to show the circuitous or involved way in which commercial transactions work to lead to such results. I will, however, here give one or two examples.

61. In addition to the 127,000,000 dollars of *debt* purported to have been liquidated by the United States of North America, it is a fact that will be fresh in the mind of every observer of passing events, that the said United States, in the year just ended, have drawn within their territory upwards of 20,000,000 dollars in specie; and this I shall now show is also wholly at the expense of British skill and labour. During the same year, Great Britain has received from the said United States 731,800 bags and bales of Cotton Wool, in weight about 240,000,000 of lbs., realising about 9*d.* per lb. on an average; this, with rice, tobacco, and other articles exported from the said United States, gave rise to the creation of Bills of Exchange therein on England to the amount of upwards of £10,000,000, which Bills, had no extraneous interference taken place, would have constituted the means of payment for an equal value of the products of British industry; but, unfortunately, the United States' Government interpose, and absorb half the amount of those Bills to remit to money dealers in Europe for bullion: hence the paralysis which, in 1834, has pervaded all those engaged in trading transactions from Great Britain to the United States; that act of the American Government left no alternative to the Exporters from Great Britain but to diminish their transactions to an equal extent, or submit to a reduction in value in proportion to any excess which they might export beyond the residue of Bills of Exchange which remained as commercial equivalents after the United States' Government had ceased to interfere.

62. However obviously injurious to the interests of Great Britain the act just stated may appear, it will probably be asked, How could the injury have been avoided? The question is reasonable, and may be thus answered: The evil or cause of the injury clearly lies in the exclusively fixed price of gold in Great Britain; had, therefore, such a species of circulating medium been adopted, as is proposed in my History of the Origin, Progress, and Present State of Banking in all parts of the World; based on the capital of the twenty-eight millions per annum of Annuities, first consolidating the several denominations of that capital under one head at an invariable rate of interest, gold, as a circulating medium or token of exchange, might then have been dispensed with, and left, as it was from 1810 to 1815, like any other metal to find its own commercial value; under such a scheme of arrangements as I have there laid down, the injury inflicted on the productive industry of Great Britain by the act of the American Government just previously mentioned, as well as the multiplied injuries which have been inflicted by foreign loan transactions, would have been defeated in their *embryo*, instead of being left unmolested to work out the fearful depreciations which the displays of comparative values in my work on the Finances and Commerce of the Country exhibit, and the wide-spread privation which has followed as a necessary consequence of those depreciations.

63. If any thing can add to the humiliation which every perceptive mind must feel for the injuries to which the productive industry of Great Britain is exposed by the transaction just previously elucidated, the following additional facts are highly calculated to embitter the feeling. The cotton wool imported from the United States in 1831, averaged only about 5½*d.* per lb., while that imported in 1834, averaged about 9*d.* per lb.; and thus, while the manufacturing interest were importuning the Government for a modification of the duty from 6 per cent. on the value to five-eighths of a penny per lb., and afterwards to five-sixteenths of a penny per lb., they have, by an unnatural internal competition, enhanced its value to the American grower 3½*d.* or 4*d.* per lb.; or to an aggregate annual value approximating to £4,000,000 in amount; and further, not only in reference to the twenty millions of dollars of contribution which the transaction of 1834 resolves itself into, but also the 127 millions of dollars of debt purported to have been liquidated since 1815, the amount has, in the first instance, been levied on duties on the products of British industry imported into the United States, thereby first enhancing the liability of realizing the proceeds of sale, and ultimately depreciating the value in proportion to the extent of the impost, which on some of the most staple productions, such as iron and wove fabrics, amounted to 50, 60, and 70 per cent. Nor is this all; for as the United States'

Government continued progressively to liquidate the 127 000,000 dollars of debt, a great portion of the amount was as progressively appropriated to the formation of joint-stock manufacturing establishments; to encourage the products of which the United States' Government still continues to levy duties varying from five to fifty per cent. on the like productions imported into their territory from Great Britain, while she has either totally repealed, or reduced to nominal rates, the duty on the wines of France and of all other countries, on tea and all tropical productions, and withal, on all commodities which minister to the comfort and enjoyment of life, while in Great Britain the same articles continue subject either to prohibitory rates of duty or rates varying from 50 to 200, and on some articles, such as brandy, 1000 per cent. on their importing value. *What a contrast!*

64. Injurious and appalling as I have made the transactions adverted to in the preceding sections appear; the captious and self-sufficient declaimers on behalf of Free Trade, and repeal of Corn Law regulations, will, I doubt not, indulge in the notion, that I have overlooked, nay, I expect they will say, that I am ignorant of "*the balance of trade and exchanges,*" in refutation of which I refer again to the Notes adverted to in § 16, which precede my Display of the Nature and Extent of the External Transactions of Great Britain, with each of thirty-two different parts of the World in each year since 1813. It is there shown how far the balance of the transactions between Great Britain and the United States of North America, are involved in their respective transactions with the world at large; it is because they are less involved than the transactions between Great Britain and France, that I selected the operations with the United States in preference to those with France; yet, although the transactions between Great Britain and France are more complicated, involving themselves as they do, not only with the commercial transactions of the whole of Europe and the Americas, but with all the great money transactions in bills of exchange and bullion, which the transfer of capital, absentee expenditure, and other causes extraneous to commerce give rise to, the fact is not the less certain of its having been the products of British skill and labour which supplied the entire amount of the 2000 millions of *francs* in specie which France has coined since 1815.

65. Enough, I think, has now been said to demonstrate, on one side, the unbounded means and power of Great Britain to maintain her supremacy, and dispense with an unsparing hand the blessings of increasing comfort, not only among her own people, but among all the nations of the earth; and, on the other side, the fearful prostration to which the unparalleled combination of power and means is exposed, by the privation and suffering which the inordinate disproportions which, at present, so unhappily prevail, occasion. To remedy the evils which result from the prevailing disproportions, the attention of the legislature is imperatively demanded to a consideration of the effects produced, or which result from the seven following systems or principles of action, viz., 1st. Mechanical Power; 2d. The Circulating Medium; 3d. Ecclesiastical Revenue; 4th. Parochial Assessments; 5th. Corn Laws; 6th. Foreign Loans and transfer of Capital; and 7th. External Commerce generally. On tracing the effect of the working of these seven great principles of action upon the aggregate combination of society, as exhibited in my General Developement of its involved relations, each and all of them will be seen to be operating in a way to greatly increase the inequalities which at present so unhappily prevail; and so far from there being any tendency in the combination to adjust itself, without the intervention of the Legislature, the inequalities will be seen to tend to progressive increase, and to portend the no very distant approach of a crisis of irremediable disorder.

66. On the attention of the Legislature being sincerely and determinately directed to arrive at a correct knowledge of the actual condition of the country, it will be seen that all the great principles of action, enumerated in the preceding section, demand simultaneous regard, and that no abstract or specific measure, in reference to either of them, or any other separately, will prove of the slightest avail towards obtaining the desired equilibrium; their intimate relation not only to each other, but to the aggregate combination of interests of the community at large, renders it indispensable for a series of measures to be simultaneously adopted; but as all proceedings must have a beginning, while their progress may be greatly facilitated by a consecutiveness of design, I will show the order in which the necessary series of measures will require to be proceeded in. The first in order will be the circulating medium; this is required to be based on some invariable standard of value, and to possess some such self-regulating principle as I have laid down in my History of the Origin, Progress, and Present State of Banking, adverted to in § *62*: this will be found susceptible of such regulations as will so effectually check the transfer of capital and foreign loan transactions as to render unnecessary any specific legislative measure respecting them. The next step will be, to establish such arrangements with the several nations of the world, as shall tend to greatly enlarge the external intercourse of the country, upon purely reciprocal terms, and such as to afford the opportunity of importing corn from all countries on terms as satisfactory to the growers of corn in the United Kingdom as to the consumers, and such as to justify mechanical power, being brought under the immediate cognizance and control of revenue, in mitigation of local taxation for the support of the poor and the clergy, to such an extent as shall compensate for the privation which it has occasioned by its annihilation of all domestic industry in the agricultural districts.

67. It will, I doubt not, by some be thought strange that, among the causes of existing derangement I should not have assigned some portion at least of the derangement to the pressure of TAXATION and to the NATIONAL DEBT. In reference to both these great and important subjects, I have repeatedly shown, in the Notes interspersed through my volume of Papers on the Finances and Commerce of the Kingdom, that the value of the mechanical power now in operation, if duly regulated, is more than equal to the money obligation which the events of the last forty-three years have imposed on the country. I have previously shown in § 54, that it was the produce of mechanical power which mainly sustained the war from 1793 to 1816, and that the augmentation of the National Debt followed as a consequence of the enlarged circulation of Bills of Exchange which the combined operations of the Commissariat and of Commerce gave rise to. The present amount of Taxation and of the National Debt, therefore, are not *causes* of the existing derangements, but effects of the extended application of mechanical power, which power being *duly* adjusted, in reference to all the subjects specified in the preceding section, Taxation will not only cease to be felt as an oppression, but present itself as an indispensable means of regulation, while the account, miscalled the National Debt, will present itself as a Bank of National Deposit, and as an indispensable counterpoise in the grand combination of interests which the extended application of mechanical power has so materially tended to create.

68. It is one of the prevailing errors of mankind to ascribe all the embarrassments into which nations become involved, to the influence of Taxation; and it must be admitted that it is too often oppressive. The notions entertained respecting it are, however, frequently erroneous. Taxation may frequently be felt as an oppression by one portion of a community, while, by its MODE of distribution, it may excite new modes of industry, and, in the aggregate, operate advantageously; and in no case is it the *amount* of Taxation which constitutes an evil, but the inapplicability of the source from which it may be derived, and its undue mode of redistribution. As the question applies to the United Kingdom at the present time, however severely in many cases it may be felt, there is no remission of Taxation, either general or local, nor any consequent diminution of expenditure, no commutation or extinction of Tithes, that will compensate for the evil effects that result from the inordinate disproportions which the uncontrolled operation of mechanical power, and ascendancy of the monied interest, are tending constantly to increase. It is an applicable control and regulation of existing means, and not their extinction or diminution, that is required; nor is it the looseness or laxity of existing laws and regulations that will suffice to tranquillize the public mind; but laws and regulations precise and intelligible, rendered equal and impartial in their application to all classes of the community. The seven great systems of action which I have specified in § 65, being regulated and directed on such principles, without calling for any sacrifice of existing interests, will lead to the exciting of such degrees of industry and exertion, as to increase private happiness, public prosperity, and national glory, and enable Great Britain to retain her supremacy among the nations of the earth, as the universal arbitress and benefactress of mankind. That such may be her destiny is my most earnest wish, my anxious and fervent prayer,

J. MARSHALL.

LONDON, FEB. 1835.
